3202 Digital Door Station (Brass)

The 3202 Digital Intercom Station is a full duplex capable digital intercom with intelligent voice switching. Featuring an attractive brass finish, its robust housing is ideal for harsh environments.

The 3202 includes a backlit push button and a switch input port with configurable operation. The station can be surface-mounted or flush-mounted using a standard recessed double gang electrical box or wall opening.

The 3202 Digital Door Station is also available with a brushed stainless steel faceplate (model 3201) as well as in a vandal-proof version (model 3203).

Features

- Wall-mount digital intercom station with hands-free capability
- Allows single-pair voice and data communication up to 1,000 feet (300 m)
- Backlit call button and separate speaker and microphone for superior voice quality
- Call button LED flashes while call active
- Speaker tone is provided for call press acknowledgement
- Accepts external switch input (normally open or closed) for elevator button, pull cord, or sensor-activated calling
- Attractive brass finish
- Rugged weather-resistant design is suitable for indoor or outdoor installation
- Surface-mount design for easy installation on virtually any flat surface
