NWA220AX-6E

Wireless Access Point with Multi-Gigabit Port Access Point

Quick Start Guide

Version: V1.00 Edition: 1 Date: 2022-12-08 Model: NWA220AX-6E Firmware: V6.00(ABYH.0) Firmware Release Date: 2022-12-08 Firmware Release Note: NWA220AX-6E_V6.00(ABYH.0)C0.rn

Hardware Installation

1 Select a suitable location for the access point (AP) and mount it on the ceiling or wall. Ensure that the AP's LED is visible to allow you to check its status.

2 Connect the AP to a PoE injector or PoE switch using an Ethernet cable. Ensure that the PoE injector or PoE switch is connected to a power source.

3 Connect your computer to the AP's LAN port using an Ethernet cable.

4 Log in to the AP's web configurator using its default settings. Refer to the AP's Quick Start Guide for more information.

5 Set up a wireless network with Nebula. Create a site and add the AP to the site. Refer to the Nebula Quick Start Guide for more information.

6 Log in to the Nebula Control Center (NCC). Go to **Site-wide > Configure > Access points** to create and assign a radio profile to the AP. Refer to the Nebula User's Guide for more information.

7 Go to **Site-wide > Configure > Access points** to create and assign a LAN port profile to the AP. Refer to the Nebula User's Guide for more information.

8 Go to **Site-wide > Configure > Access points** to create and assign a SSID advanced settings profile to the AP. Refer to the Nebula User's Guide for more information.

9 Go to **Site-wide > Configure > Access points** to create and assign a SSID profile to the AP. Refer to the Nebula User's Guide for more information.

10 Go to **Site-wide > Configure > Access points** to create and assign a mesh profile to the AP. Refer to the Nebula User's Guide for more information.

11 Go to **Site-wide > Configure > Access points** to create and assign a firmware profile to the AP. Refer to the Nebula User's Guide for more information.

12 Go to **Site-wide > Configure > Access points** to create and assign a scheduled reboot profile to the AP. Refer to the Nebula User's Guide for more information.

13 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Mesh profile to the AP. Refer to the Nebula User's Guide for more information.

14 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Roaming profile to the AP. Refer to the Nebula User's Guide for more information.

15 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Antenna profile to the AP. Refer to the Nebula User's Guide for more information.

16 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Steering profile to the AP. Refer to the Nebula User's Guide for more information.

17 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Monitoring profile to the AP. Refer to the Nebula User's Guide for more information.

18 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity profile to the AP. Refer to the Nebula User's Guide for more information.

19 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting profile to the AP. Refer to the Nebula User's Guide for more information.

20 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification profile to the AP. Refer to the Nebula User's Guide for more information.

21 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient profile to the AP. Refer to the Nebula User's Guide for more information.

22 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group profile to the AP. Refer to the Nebula User's Guide for more information.

23 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

24 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

25 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

26 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

27 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

28 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

29 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

30 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

31 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

32 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

33 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

34 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

35 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

36 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

37 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

38 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

39 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

40 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

41 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

42 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

43 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

44 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

45 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

46 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

47 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

48 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

49 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

50 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

51 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

52 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

53 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

54 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

55 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

56 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

57 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

58 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

59 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

60 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

61 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

62 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

63 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

64 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

65 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

66 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

67 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

68 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

69 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

70 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

71 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

72 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

73 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

74 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

75 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

76 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

77 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

78 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

79 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

80 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

81 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

82 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

83 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

84 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

85 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

86 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

87 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

88 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

89 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

90 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

91 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

92 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

93 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

94 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

95 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member profile to the AP. Refer to the Nebula User's Guide for more information.

96 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

97 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

98 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

99 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

100 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

101 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

102 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

103 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

104 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

105 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

106 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

107 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

108 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

109 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group profile to the AP. Refer to the Nebula User's Guide for more information.

110 Go to **Site-wide > Configure > Access points** to create and assign a Nebula Smart Client Connectivity Troubleshooting Notification Recipient Group Member Group Member Group Member
