HONEYWELL PC45 DESKTOP PRINTER

Application Brief

The eCommerce boom didn't just impact how businesses meet rising customer demand; it changed the direction of customer demand altogether. Customers would prefer fast, high quality and accurate service wherever they go, no matter in what industry that business resides. That's why fast, accurate and high-quality printing is imperative for businesses wanting to ensure they can meet, and even exceed, their customers' expectations.

The Honeywell PC45 desktop printer can be the ideal solution to help your business meet and exceed rising demands for service. Built on the Honeywell Printer Edge™ platform, the PC45 is engineered to deliver the lifecycle, security, and durability you reasonably expect from an enterprise-grade printing solution.

SITUATION

As consumer behaviors shift to expect more immediacy out of the businesses they engage with on all fronts, delays due to inaccurate labels, security vulnerabilities, connectivity issues or otherwise are simply unacceptable. Printing operations and management have become a critical ingredient in a business' ability to remain competitive in retail, warehousing, manufacturing, transportation and logistics.

Businesses in these industries can be demanding users of their printers. That's why consumer-grade printers deployed within warehouses or in the retail inventory room may not be able to withstand the constant demand to print price tags, supply chain and shipping labels, and barcodes. They need an enterprise-grade solution with a simple set up and are purposefully engineered to handle fast and highly accurate printing without disruption.

Likewise, management of a sprawling fleet of printers across multiple locations can become time consuming for IT teams and troubleshooting printers on-site can open potential security vulnerabilities if not carried out correctly. Additionally, the more time printers are offline for configuration, patching and media replenishment would mean that deadlines could be missed, and profits could be lost.

So, businesses that are serious about making their printer operations a strongpoint of their business rather than a hinderance are investing in a print solution that is designed specifically to help them increase throughput, reduce errors, and stay on schedule.

SOLUTION

The Honeywell PC45 desktop printer is an effective solution to help businesses in a variety of industries accomplish simple and powerful printing performance. Engineered with next-generation hardware and built on the Honeywell Printer Edge™ platform, the PC45 is ready to make measurable value to print operations.

The PC45 is a compact, high-performance desktop printer that continues the legacy of proven E-class and PC43 series printers, with seamless connectivity, upgraded premium printing performance and reliability, and a new suite of supported accessories. The PC45 printer's 3.5-inch LCD touch screen offers a new user interface, improving user-friendly operations and better customer interaction. With tap-to-pair and scan-to-pair connectivity options, connecting the PC45 to your network or smart devices is quite seamless and quick.

Honeywell

The PC45 printer's compact design allows it to make the most of limited spaces without sacrificing print speed, accuracy, or durability. It is a great solution for businesses in need of a compact label printer to optimize workflows, enhance inventory management, improve label and RFID printing.

HONEYWELL PRINTER EDGE™

The PC45 desktop printer is built on the Honeywell Printer Edge™ platform, offering simplified network integration, improved security measures and consistent user experiences. With Honeywell Printer Edge™, PC45 users can remotely connect software apps and effortlessly integrate their printer fleet. Intuitive interfaces offer users the ability to remotely manage multiple printers without having to learn about each individual printer, and centralized printer management allows for remote troubleshooting and updating.

CONTINUED LEGACY

The PC45 continues the legacy of Honeywell's proven E-class and PC43 printers. While it comes with some new unique accessories, the PC45 supports most PC43 accessories such as a cutter tray, heavy-duty springs, media lock, serial cable, parallel cable, thermal printhead, cleaning card and much more.

SIMPLIFIED CONNECTIVITY

The PC45 offers simplified and seamless connectivity where Ethernet is standardized. Supporting Wi-Fi 6, BT5.1, and an optional serial port to cover common business case needs, the PC45 offers businesses the flexibility they need from their printing solution. With tap- and scan-to-pair options, the PC45 offers a smooth connection experience wherever it's needed.

MAXIMIZED PERFORMANCE

The PC45 offers better print performance and higher maximized speeds on wider width media, you have even more options for your printing operations. With low label and ribbon sensor notifications – you can make sure that media is replaced in a timely fashion before it interrupts downstream productivity. Its durable and compact design allows it to fit where you need it most and can withstand multiple operating environments.

LOOK TO THE FUTURE

Honeywell understands pressures placed on the supply chain and how they can impact your business operations. That's why we develop innovative technology that will help address today's challenges and set your business up for future success. Our commitment is to work with you within your operation to help meet your specific needs and desires and to help you achieve your goals now and in the future.

Learn how Honeywell can partner with you to shape the future of your business.
