#### Things to know

Before placing an order, please review the following:

- The Cisco® Catalyst® 9300 Series offer structure has three main components: the switch hardware, a
  Network stack perpetual license, and a Cisco Digital Network Architecture (Cisco DNA™) software
  subscription license.
- Cisco DNA Software subscription licenses and Network Stack perpetual licenses are smart product IDs (SKUs). Both licenses are required with a hardware purchase.
- Smart Accounts are strongly recommended and will be mandated post launch (for more information, please see Smart Accounts section).
- Smart Licensing technology is not enabled on the switch at launch but will be available later. At launch, the license SKUs are set up as Smart SKUs but will operate in Right-To-Use (RTU) mode. For details, see Smart Licensing section.
- · Available service options:
  - Solution support
  - Enhanced Limited Lifetime Warranty (E-LLW)
  - Smart Net Total Care® support
  - Embedded software support for Cisco DNA software subscription license

## Purpose of this document

This document is aimed at providing a detailed overview of the ordering process for Cisco Catalyst 9300 Series switches on Cisco Commerce Workspace.

#### Hardware and software order overview

Cisco Catalyst 9300 Series switches can be ordered through Cisco Commerce Workspace as a Cisco DNA Essentials or Advantage subscription. Both options include switch hardware coupled with Cisco IOS° and the Network Stack software. In addition to the hardware and Network Stack software, the offer requires the addition of the term-based Cisco DNA Software subscription license, which includes embedded software support.

## Cisco DNA Software Subscription Overview

License portability			$\checkmark$	✓	
Software services-enabled license portability lets your software licenses stay current through hardware upgrades and replacements at no additional cost.					
Full Flexible NetFlow			$\checkmark$	✓	
This next generation in flow technology optimizes the network infrastructure, reducing operating costs and improving capacity planning and security incident detection.					
IPv6 tunnel capabilities			✓	✓	
Overlay tunneling encapsulates IPv6 packets in IPv4 packets for delivery across an IPv4 infrastructure (a core network or the Internet).					
Easy QoS dynamic monitoring			✓	✓	
Assign policies to applications based on business relevance and business-critical QoS priority for life-saving devices, for example.					
Branch deployment automation			✓	✓	
Support for simplified workflows for physical and virtual branch automation and day-0 router/NFV design.					
Software Image Management (SWIM)			✓	✓	
Automatically manage software upgrades and control the consistency of image versions and configurations across your network, managed by Cisco DNA Center.					
Enterprise Network Functions Virtualization (ENFV)			✓	✓	
Facilitates branch virtualization on any hardware device - Cisco or third party. Supports existing branch migration without hardware upgrade.					
LAN automation			✓	✓	
Accelerates building the SD-Access overlay network without the traditional network planning and implementation process, managed by Cisco DNA Center.

Network Plug and Play (PnP) provisioning			<b>√</b>	<b>√</b>	
Zero-touch provisioning for new device installation allows off-the-shelf Cisco devices to be provisioned simply by connecting to the network, managed by Cisco DNA Center.					
SD-Access and switch insights				✓	
Enables policy-based automation with secure segmentation, complete visibility, and delivery of new services quickly on SDAccess devices, managed by Cisco DNA Center.					
Patch lifecycle management				✓	
Intelligent device management for lifecycle patching, managed by Cisco DNA Center.					
Flexible network segmentation				✓	
Segment your network for security, compliance, and complex processes, managed by Cisco DNA Center.					
Device 360 and Client 360				✓	
Display devices and client connectivity from any angle or context, providing for very granular troubleshooting in seconds.					
Cisco Catalyst 9800 Series embedded wireless controller				✓	
Fabric technology is an integral part of SD-Access. Fabric-enabled wireless is a deployment option, managed by Cisco DNA Center.					
Application policy creation				✓	
Assign policies to applications based on business relevance and business-critical QoS priority for life-saving devices, for example.					

	Features				
	Network Essentials	Network Advantage	Cisco DNA Essentials	Cisco DNA Advantage	
Software Maintenance Upgrade (SMU)				✓	
SMUs, also known as Patching, allows limited updates within the operating software without having to upgrade the entire image. This means bugs and security vulnerabilities can be resolved without having to requalify an entirely new image and potentially without having to reset a switch and incur downtime.					
Path trace				✓	
Visualize the path of an application or service from client through all devices and to the server, troubleshooting issues instantly.					
Network time travel				✓	
Visualize device or client performance in a timeline view to identify the cause of a network issue instead of trying to re-create the issue in a lab.					
Application hosting				✓	
Allows third-party applications to be hosted in a secure container environment (for example, Wireshark and Docker).					
Encrypted Traffic Analytics (ETA)				✓	
Detect malware within encrypted traffic. This is an optional feature of Cisco Stealthwatch, managed by Cisco DNA Center.					
Cisco DNA Services for Bonjour				✓	
This software-defined, controller-based solution enables Bonjour services discovery and advertisement at scale across multiple domains, managed by Cisco DNA Center.					
ERSPAN and AVC				✓	
Monitor and send traffic, detect every application in your network, and optimize bandwidth with applicationaware policies, managed by Cisco DNA Center.					

	Features

Extended node				✓	
Extend the reach of products connected to the fabric edge devices, managed by Cisco DNA Center.					
Fabric in a box				$\checkmark$	
Add the selected device as a control plane, a border node, and an edge node. Does not require Cisco DNA Center.					
AVB 1588				<b>√</b>	
Audio Video Bridging standards provide the means for highly reliable delivery of low-latency, time-synchronized audio and video streaming services. Does not require Cisco DNA Center.					
AVC (NBAR2)				✓	
Gain application visibility and control through Next-Generation Network-Based Application Recognition. Does not require Cisco DNA Center.					
ETA/MUD+				✓	
Encrypted Traffic Analytics detects malware within encrypted traffic. Manufacturer user description validates the IoT device, extends trust, and applies policy to the device. Does not require Cisco DNA Center.					
Cisco ThousandEyes Network and Application Synthetics				<b>√</b>	
Network performance metrics, dashboarding, visibility into app and service experience, end-to-end visibility across cloud and DC applications					
Cisco DNA Spaces IoT Services on Catalyst Switching				✓	
Cisco DNA Spaces on Catalyst 9000 switches acts as a layer between different wired IoT solutions, giving more options and greater flexibility to help smart buildings proactively adapt to changing conditions.

#### How to order a Cisco Catalyst 9300 Series switch

Both Network Stack licenses and Cisco DNA Software subscription licenses are mandatory at the time of purchase and come in two licensing tier options: Cisco DNA Advantage and Cisco DNA Essentials (-E). The Network Stack licenses, Network Advantage or Network Essentials is included with the hardware, while a Cisco DNA Software subscription term license needs to be selected at the time of order.

To order in the Cisco Commerce Workspace, follow these steps:

- 1. Select the appropriate Network Stack license type -A or -E
- 2. Choose the preferred consumption model Cisco DNA Advantage (default and recommended) or individual.
- 3. Choose the Cisco DNA Software subscription term license (3, 5 or 7 years).
- 4. Add other components (for example: secondary power supply, power cables, etc.).

#### Step-by-Step Ordering in Cisco Commerce Workspace

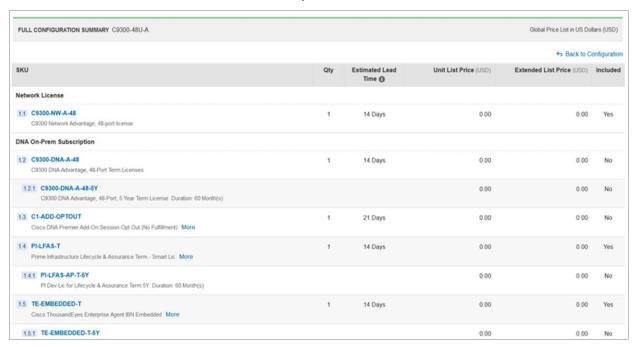

Enter the hardware SKU in Cisco Commerce Workspace.

The Network Stack license is perpetual and included with the hardware by default (it will not be visible in the selection menu) per the respective hardware SKU suffix (example: C9300-48P-E/C9300-48P-A).

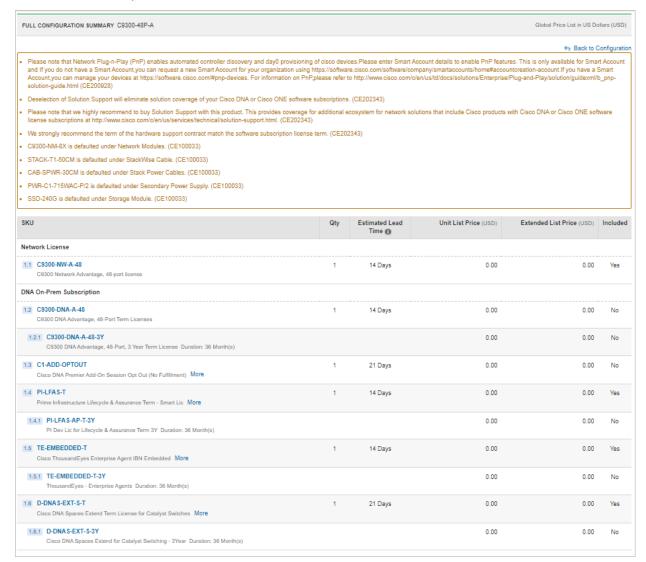

The Cisco ThousandEyes Network and Application Synthetics license is included by default upon the selection of a Cisco DNA Advantage option with a 3 year, 5 year or a 7 year subscription. Each Catalyst 9300 Cisco DNA Advantage subscription entitles the customer to run the equivalent of one ThousandEyes network or web test every 5 mins from a ThousandEyes enterprise agent (22 units per month), up to a maximum of 110,000 units per month of ThousandEyes test capacity per customer.

Expand to "View Full Summary" view to view the Cisco ThousandEyes Network and Application Synthetics license (TE-EMBEDDED-T). The TE-EMBEDDED-T is bundled with the Cisco DNA Advantage subscription and follow the same term as the Cisco DNA subscriptions.

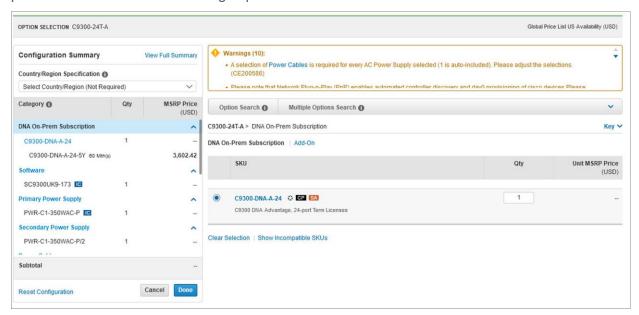

The Cisco DNA Spaces Extend license is included by default upon the selection of a Cisco DNA Advantage option with a 3 year, 5 year or a 7 year subscription. Each Catalyst 9300 Cisco DNA Advantage subscription entitles the customer to run the equivalent of one DNA Spaces gateway and access to IoT device marketplace, Cisco DNA Spaces cloud with included software and support

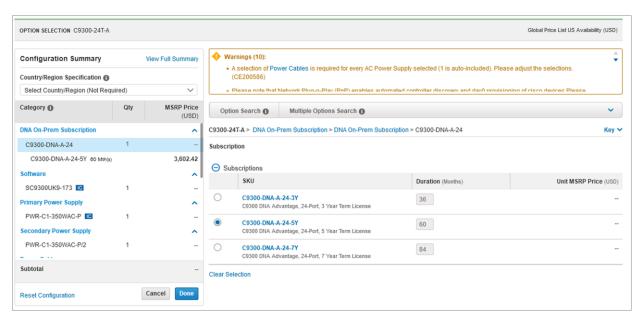

Expand to "View Full Summary" view to view the Cisco DNA Spaces Extend license (**D-DNAS-EXT-S-T**). The **D-DNAS-EXT-S-T** is bundled with the Cisco DNA Advantage subscription and follow the same term as the Cisco DNA subscriptions.

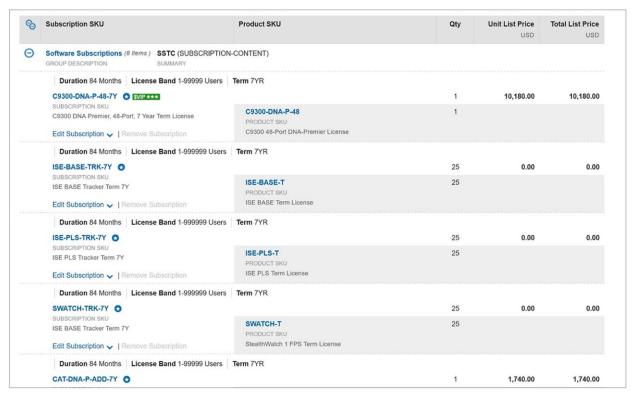

A Cisco DNA Advantage option is available for selection and is the default. Customers are encouraged to purchase the Cisco DNA Advantage option to enable advanced Cisco DNA features as a bundled solution:

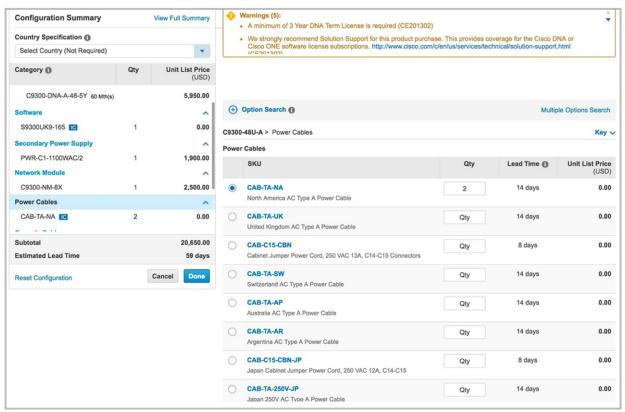

Follow steps below to change from 5 year default term to a 3 or 7 year term for Cisco DNA Advantage Software subscription license

Check Summary to validate all terms are aligned to intended term.

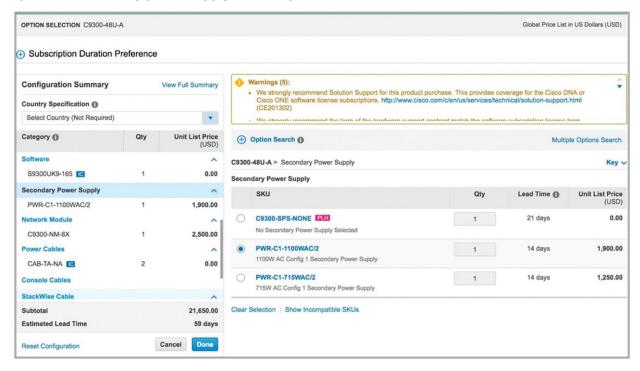

North America cable is defaulted, but another cable can be selected based on country or geography. A power cable must be selected to complete the configuration:

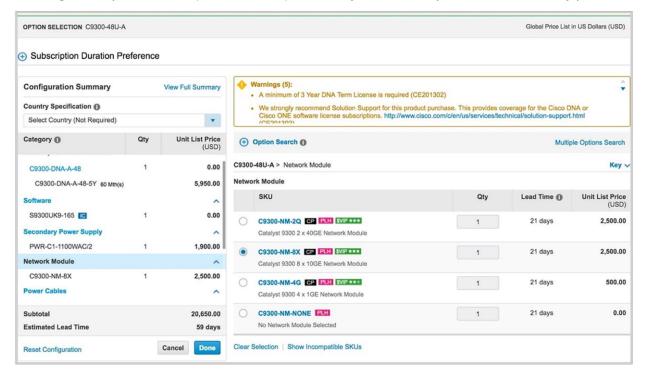

The primary power supply is added by default, based on the hardware model:

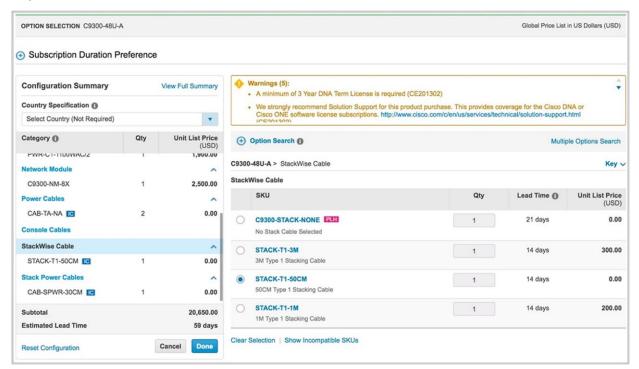

A secondary power supply is selected by default. Please select the C9300-SPS-NONE or C9300L-SPS-NONE option if a secondary power supply is not required.

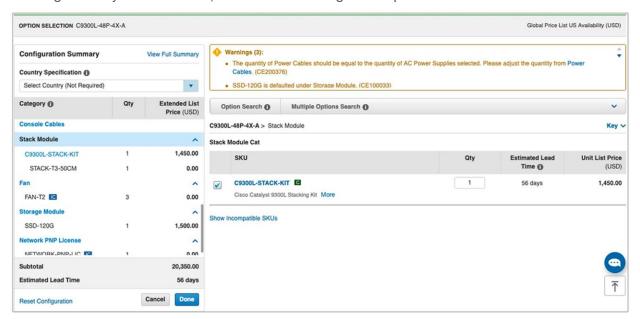

For modular uplink models, C9300X SKUs come with C9300X-NM-2C network module as default and (), C9300 SKUs come with C9300-NM-8X network module as default, but another selection can be made. C9300X-NM-NONE or C9300-NM-NONE can be selected if a network module is not desired. This step is not required when ordering fixed uplink models (C9300L SKUs) since they have fixed uplinks that are already part of the SKU.

A 3m (C9300X SKUs) or 50cm (C9300 SKUs) StackWise® cable is selected by default for both -E and -A hardware models. 50CM, 1M and 3M stacking cable options are available. If a StackWise cable is not required, C9300X-STACK-NONE or C9300-STACK-NONE should be selected:

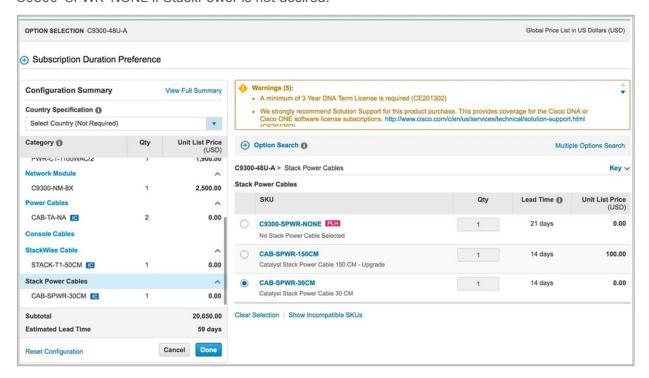

For fixed uplink models (C9300L SKUs), a C9300L-STACK-KIT is selected by default which includes a 50CM stacking cable by default. 50CM, 1M and 3M stacking cable options are available.

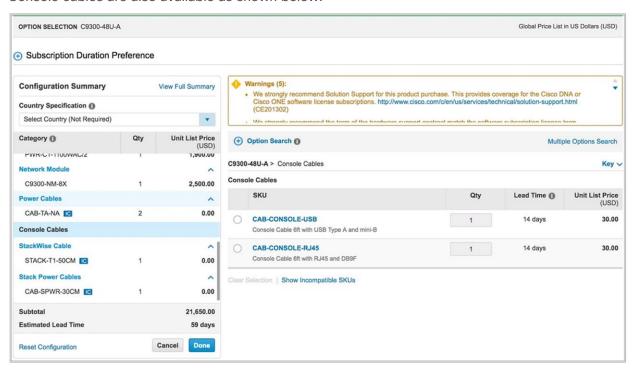

A 30cm (C9300/C9300L) or 150CM (C9300X) Cisco StackPower® cable is selected by default for both -E and -A hardware models. Customers have the option to choose 30CM or 150CM StackPower cable type or select C9300-SPWR-NONE if StackPower is not desired.

Console cables are also available as shown below:

#### Default accessories shipped with the switch

Cisco Catalyst 9300 Series switches ships with the following components and accessories by default:

- Switch
- Default power supply (based on selected switch)
- Secondary power supply (same as default primary)
- 2 Power cables (specific power cable needs to be selected)
- Stacking Kit (for C9300L SKUs only with 50cm stacking cable)
- Stack cable (50cm, 1M) unless not selected (for C9300/C9300X SKUs only)
- StackPower cable (30cm/ 150CM) unless not selected (for C9300/C9300X SKUs only)
- Mounting brackets

#### Licensing

All Cisco Catalyst 9300 Series switches are available with two software options. Each software option includes two components, as shown in Table 1.

Table 1. License Levels and Options

License Level	Network Stack offer (Perpetual and embedded)	Cisco DNA Software Subscription offer (Term based)
-E	Network Essentials	Cisco DNA Essentials (3, 5, or 7 years)
-A	Network Advantage	Cisco DNA Advantage (3, 5, or 7 years)

## Upgrading license level

Customers will have the option to upgrade the Network Stack and Cisco DNA license levels (for example, -E to -A license upgrade) through a license upgrade, which will be available post launch. Customers will purchase the upgrade license and then reach out to CPS to initiate the upgrade process. The customer will be able to select term licenses using the C9300-LIC= or C9300L-LIC= SKU to upgrade a-la-carte Cisco DNA license. The Cisco Catalyst 9300 Series software license upgrade SKUs are listed in the "Ordering information" section.

Note that a license cannot be upgraded at the time of purchase.

#### Smart accounts

As with all Catalyst 9000 family switches, Smart Accounts are mandatory when ordering a Catalyst 9300 Series switch. A <u>Smart Account</u> is a central data repository that provides visibility and access control to all the Cisco software licenses and entitlements across an organization. Smart Accounts allow customers to store, manage, and move assets across locations and devices and begin to use them immediately. Smart Accounts are required for enabling Cisco Smart Software Licensing.

After a Smart Account has been set up, customers have the flexibility to create subaccounts (virtual accounts) to help manage licenses for departments, areas, or locations within their organization. Licenses can be pooled within virtual accounts as needed. Smart Accounts support role-based user access controls, which allow the delegation of authority to account administrators at the Smart Account level or at the virtual account level. In addition, customers can assign partner visibility and management rights to their virtual or enterprise-level accounts.

#### Introduction to Smart Licensing

Cisco Smart Licensing is a flexible licensing model that provides you with an easier, faster, and more consistent way to purchase and manage software across the Cisco portfolio and across your organization. And it's secure – you control what users can access. With Smart Licensing you get:

- **Easy Activation:** Smart Licensing establishes a pool of software licenses that can be used across the entire organization—no more PAKs (Product Activation Keys).
- Unified Management: My Cisco Entitlements (MCE) provides a complete view into all of your Cisco
  products and services in an easy-to-use portal, so you always know what you have and what you are
  using.
- **License Flexibility:** Your software is not node-locked to your hardware, so you can easily use and transfer licenses as needed.

To use Smart Licensing, you must first set up a Smart Account on Cisco Software Central (software.cisco.com).

For a more detailed overview on Cisco Licensing, go to cisco.com/go/licensingguide.

## Cisco Smart Software Manager

Cisco Smart Software Manager enables the management of software licenses. The interface allows you to activate your product, manage entitlements, and renew and upgrade software. An active Smart Account is required to complete the Smart License registration process. To learn more about end-to-end Smart Account and Smart License management, visit <a href="https://www.cisco.com/c/en/us/buy/smart-accounts/software-manager.html">https://www.cisco.com/c/en/us/buy/smart-accounts/software-manager.html</a>.

#### Smart Account and Smart License availability

Important information about smart account and smart license availability

- Cisco Catalyst 9300 Series switch SKUs are smart SKUs. License entitlements will be deposited in the Cisco Smart Software Manager and the Smart Accounts
- In addition to viewing entitlements, customers will also be able to track consumption

Smart Accounts are mandatory at the time of the order of a Cisco Catalyst 9300 Series switch. If a customer does not have a Smart Account set up prior to the purchase, a new Smart Account must be created at the time of purchase.

#### Deploying Smart Licenses for Cisco Catalyst 9300 Series switches

Cisco Catalyst 9300 Series switches come in different licensing packages in comparison to existing Cisco Catalyst platforms. After Smart Licensing technology (available later) is enabled on the switch, the ordering process will include a requirement to establish a Smart Account where software licenses will be deposited. Smart Licenses are transferable between the same types of devices (for example, from one Cisco Catalyst 9300 Series switches to another). (See Figure 2.)

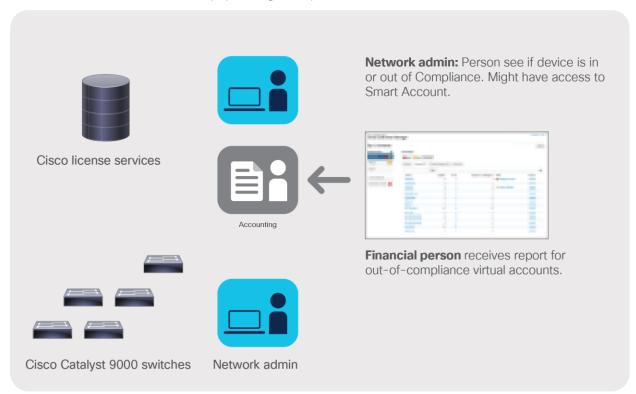

Figure 1.
Deploying Smart Licenses

In the deployment model shown in Figure 2, the Smart Account Cisco back end and Cisco Catalyst 9300 Series switches do not have a communication channel to report usage and consumption. They operate as separate entities. The switches must be configured in RTU mode with correct license level to enable the purchased feature set.

- · Possible deployment modes:
  - RTU: The licensing mode on Cisco Catalyst 9300 Series switches remains RTU in Cisco IOS® XE
     16.5.1a. However, the licensing structure in RTU has been modified to match the same packaging model that will be used with Smart License mode in the future. Unified licensing modes between RTU and Smart License mode will help to simplify the migration and reduce the time for implementing Smart License with usage report
- Consumption reporting: License usage and consumption reporting is performed on Cisco Smart Software Manager only when the device has capability to report Smart License usage. Cisco IOS XE 16.5.1a release does not include the license reporting infrastructure to Cisco Smart Software Manager on the switches

For further information about the Cisco Catalyst 9000 RTU licensing, model, see the Configuration Guide.

#### Software-Defined Access (SD-Access)

Software-Defined Access (SD-Access) enables Policy-based Automation from edge to Cloud with foundational capabilities leveraging controller-based architecture including: Design with Validated Design Templates, Simplified device deployment, Unified management of Wired and Wireless, Network Virtualization with Segmentation, Group Based Policies and Contextual based analytics.

SD-Access can be enabled with Cisco DNA Advantage. Note that customers will need to additionally purchase ISE, which is available in the <u>Cisco DNA Expansion Pack</u>.

#### Services and Warranty

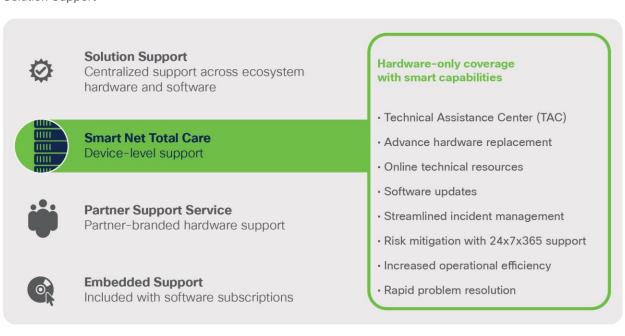

The Solution Support service option is strongly recommended; it provides coverage for a Cisco DNA Essentials and Advantage software licenses. Additional product-level hardware support options are available: Smart Net Total Care® support, partner service support, embedded support, and enhanced limited lifetime hardware warranty. Please note that if Solution Support is not selected, Cisco DNA Software subscription licenses can still be covered by selecting the embedded support option.

It is strongly recommended that the term of the hardware support contract match the software subscription license term to avoid any service support gaps for the duration of the term.

Figures 3 through 6 describe the various service options for Cisco Catalyst 9300 Series switches.

## Cisco Enhanced Limited Lifetime Hardware Warranty

The Cisco Catalyst 9300 Series Switches come with an Enhanced Limited Lifetime hardware Warranty (E-LLW) that includes Next-Business-Day (NBD) delivery of replacement hardware where available and 90 days of 8 x 5 Cisco Technical Assistance Center (TAC) support.

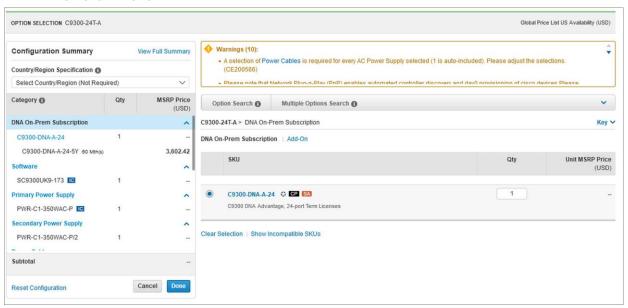

## How to order Cisco Catalyst 9300 Series switches with services

Solution Support is the defaulted service. Customers can attach desired services by following the steps outlined below:

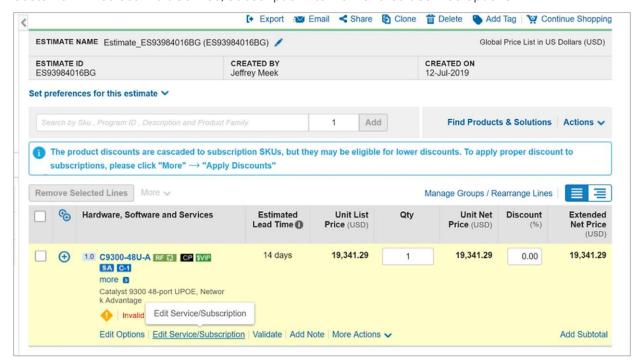

1. Customer will click "Edit Options".

2. Customer will then configure the product. Cisco DNA Software subscription option will be chosen. Then click "Done".

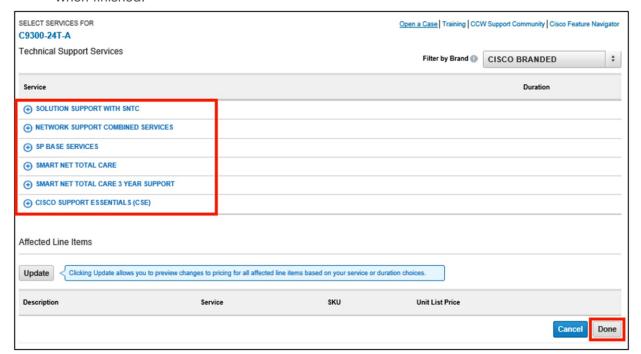

Customer will select "Edit Service/Subscription" to view and edit service options.

3. Customer will select "Change Services" to change services if needed.

4. The customer can then choose from a variety of different service options. Click "Apply" the "Done" when finished.

## How to order Cisco ThousandEyes internet and cloud intelligence with your existing Catalyst 9300 switches

Customers with existing Catalyst 9300 switches can claim the credits to Cisco ThousandEyes by following the steps mentioned in this document.

#### How to order Cisco DNA Spaces Indoor IoT Services with your Catalyst 9300 switches

Customers ordering new Catalyst 9300 switches with DNA Advantage licensing:

The Cisco DNA Spaces Onboarding team does proactive outreach to customers that order DNA Advantage on eligible 9300 switches. Customers may also contact the DNA Spaces team to request account activation by following the format below

Customers with existing Catalyst 9300 switches with DNA Advantage licensing:

Customers should contact the DNA Spaces team to request account activation. Customers contacting Cisco to activate a Cisco DNA Spaces account should provide the following information to the DNA Spaces Support and Onboarding team:

- Send email to <u>dnaspaces@cisco.com</u>
- Title the Subject Heading as "Activate Cisco DNA Spaces for Catalyst Switching"
- Provide Company / Account name

- Smart account domain:
  - Contact name for Account Provisioning
  - Contact email for Account Provisioning
  - Contact phone for Account Provisioning
  - Quantity for activation: # of switches (based on quantity of DNA Advantage ordered)
  - Provide Web Order/ Sales #
  - New/Existing DNA Spaces account

## Distribution ordering addendum

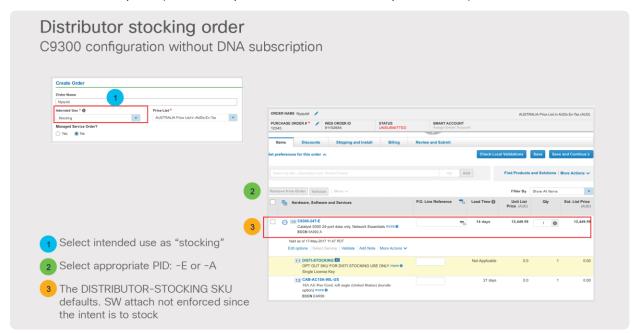

This section details the steps necessary to order Cisco Catalyst 9300 Switches through distribution partners.

**Figure 7.**Distribution ordering options for Cisco Catalyst 9300 Series switches

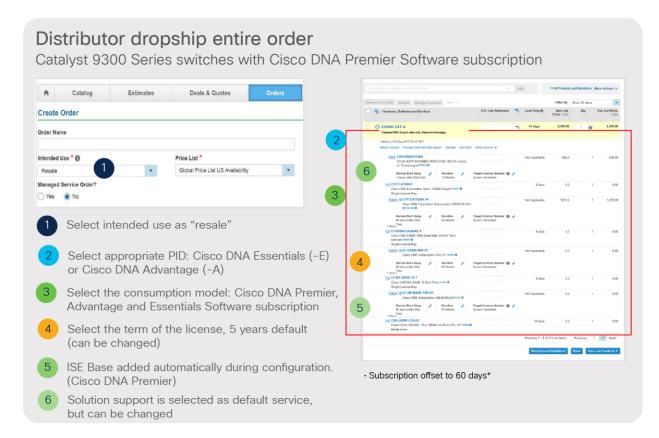

#### Cisco Catalyst 9300 Series switches for stocking

By selecting "Stocking" as "Intended Use", the system will show only hardware and does not include the Cisco DNA subscription (the subscription must be ordered at point of sale).

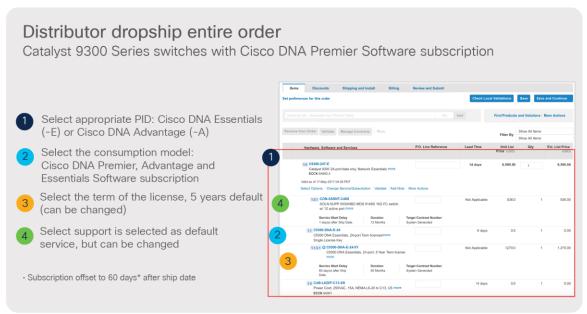

**Figure 8.**Distributor ordering Cisco Catalyst 9300 Series switches for stocking

Figure 9 shows the scenario where the distributor will dropship the entire order from Cisco to the end customer. The intended-use drop-down menu is set to Resale, which allows the default options for hardware support and software to become available. Hardware support can be changed to premium Solution Support or Smart Net Total Care, or it can be removed completely.
