PFAS Substances

PFAS has been widely used as a functional additive in many industries. At HP, we have long led the way in removing potentially harmful substances, reducing hazardous materials, and adopting safer alternatives.

In addition to the PFAS substances that are also IEC 62474 substances (declared on page 1 and designated with an asterisk), additional PFAS substances may be present in this product. The specific CAS numbers of these PFAS substances that are not IEC 62474 substances are withheld due to confidential business information.

We remain committed to delivering high-quality products that are also better for the environment.

To ensure your HP products are recycled appropriately, you can visit www.hp.com/recycling for more information about our recycling services. If the product of interest is not listed below, please contact sustainability@hp.com for assistance.
