Reach Declaration

R-Go Tools BV

About REACH

The European Registration, Evaluation, Authorisation and Restriction of Chemical Substances regulations ("REACH") were first introduced in 2006 to improve EU regulation of chemicals and advance public health and safety and protection of the environment. This declaration is evidence of our commitment to REACH compliance. A summary of REACH legal requirements, their applicability to Logitech and our approach to managing REACH compliance is provided below:

- REACH registration is required prior to producing or importing more than 1 ton per annum (tpa) of regulated chemicals into the EU.

- REACH defines a number of Substances of Very High Concern (SVHC and prescribes that the European Chemicals Agency (ECHA) must be notified prior to import or manufacture of more than 1 tpa of SVHCs.

- A public declaration is required if a manufacturer produces products, which may contain more than 0.1% concentration of SVHC weight by weight (w/w), at the article level.

Declaration

- R-Go Tools does not produce or import more than 1 tpa of regulated chemicals. R-Go Tools does not produce or import more than 1 tpa of regulated chemicals. Company registration is therefore not required.
- R-Go Tools does not import or manufacture more than 1 tpa of SVHCs so ECHA notification is not required.
- R-Go Tools does not produce products which contain more than 0.1% concentration of SVHC weight by weight (w/w), at the article level

Following product testing, R-Go Tools B.V. can confirm that non of the 197 substances on the current SHC candidate list are present in reportable levels and therefore deemed REACH compliant. REACH compliant product ranges in all R-Go Tools products, see the complete product list in the appendix.

This declaration is confirmed and approved by the CEO of R-Go Tools
