Cisco Unified Computing System overview

The Cisco Unified Computing System™ (Cisco UCS®) is a next-generation data center platform that unites computing, networking, storage access, and virtualization resources into a cohesive system designed to reduce Total Cost of Ownership (TCO) and increase business agility. The system integrates a low-latency, lossless 10/25/40/50/100/200 Gigabit Ethernet network fabric with enterprise-class blade and rack x86-architecture servers. The system is an integrated, scalable, multichassis platform in which all resources participate in a unified management domain.

Portfolio overview

The Cisco UCS Virtual Interface Card (VIC) 15000 Series extends the network fabric directly to both servers and virtual machines so that a single connectivity mechanism can be used to connect both physical and virtual servers with the same level of visibility and control. Cisco® VICs provide complete programmability of the Cisco UCS I/O infrastructure, with the number and type of I/O interfaces configurable on demand with a zero-touch model.

Cisco VICs support Cisco SingleConnect technology, which provides an easy, intelligent, and efficient way to connect and manage computing in your data center. Cisco SingleConnect unifies LAN, SAN, and systems management into one simplified link for rack servers, blade servers, and virtual machines. This technology reduces the number of network adapters, cables, and switches needed and radically simplifies the network, reducing complexity. Cisco VICs can support 512 PCI Express (PCIe) virtual devices, either virtual Network Interface Cards (vNICs) or virtual Host Bus Adapters (vHBAs), with a high rate of I/O Operations Per Second (IOPS), support for lossless Ethernet, and 10/25/40/50/100/200-Gbps connection to servers. The PCIe Generation 4 x16 interface helps ensure optimal bandwidth to the host for network-intensive applications, with a redundant path to the fabric interconnect. Cisco VICs support NIC teaming with fabric failover for increased reliability and availability. In addition, it provides a policy-based, stateless, agile server infrastructure for your data center.

The VIC 15000 series is designed for Cisco UCS X-Series M6/M7 Blade Servers, Cisco UCS B-Series M6 Blade Servers, and Cisco UCS C-Series M6/M7 Rack Servers. The adapters are capable of supporting 10/25/40/50/100/200-Gigabit Ethernet and Fibre Channel over Ethernet (FCoE). They incorporate Cisco's next-generation Converged Network Adapter (CNA) technology and offer a comprehensive feature set, providing investment protection for future feature software releases.

Product overview

Cisco VIC 15230 and 15231

The Cisco UCS VIC 15230 and 15231 (Figure 1) are 2x100-Gbps Ethernet/FCoE-capable modular LAN on motherboard (mLOM) adapters designed exclusively for the Cisco UCS X210c Compute Node. The Cisco UCS VIC 15230 and 15231 adapters enable a policy-based, stateless, agile server infrastructure that can present to the host PCIe standards-compliant interfaces that can be dynamically configured as either NICs or HBAs.

The Cisco UCS VIC 15230 is functionally equivalent to the 15231, but incorporates secure boot technology.

Figure 1. Cisco UCS VIC 15230 and 15231

Figure 2. Cisco UCS VIC 15230 and 15231 Infrastructure

The Cisco UCS VIC 15420 (Figure 3) is a 4x25-Gbps Ethernet/FCoE capable modular LAN On Motherboard (mLOM) designed exclusively for Cisco UCS X210c M6/M7 Compute Node. The Cisco UCS VIC 15420 enables a policy-based, stateless, agile server infrastructure that can present to the host PCle standards-compliant interfaces that can be dynamically configured as either NICs or HBAs.

Figure 3. Cisco UCS VIC 15420

Figure 4.
Cisco UCS VIC 15420 Infrastructure

The Cisco UCS VIC 15422 (Figure 5) is a 4x25-Gbps Ethernet/FCoE capable mezzanine card (mezz) designed exclusively for Cisco UCS X210c M6/M7 and X410c M7 compute nodes. The card enables a policy-based, stateless, agile server infrastructure that can present PCle standards-compliant interfaces to the host that can be dynamically configured as either NICs or HBAs.

The UCS VIC 15000 bridge connector (Figure 6) is required with the mezz card to connect the UCS X-Series Blade Server to Intelligent Fabric Module (IFM) UCSX-I-9108-25G or UCSX-I-9108-100G.

In addition to Ethernet network connectivity to the IFM, the VIC 15422 also provides two PCle x16 Gen4 links to the UCS 9416 X-fabric module for enabling Cisco UCS X440p PCle node connectivity for the X210c or X410c compute node.

Figure 5. Cisco UCS VIC 15422

Figure 6. Cisco UCS VIC 15000 bridge connect

Figure 7.Cisco UCS VIC 15422 Infrastructure

Cisco VIC 15427 and 15428

The Cisco UCS VIC 15427 and 15428 (Figure 8) are a quad-port small-form-factor pluggable (SFP+/SFP28/SFP56) mLOM card designed for Cisco UCS C-series M6/M7 rack servers. The card supports 10/25/50-Gbps Ethernet or FCoE. The card can present PCle standards-compliant interfaces to the host, and these can be dynamically configured as either NICs or HBAs.

The Cisco UCS VIC 15427 is functionally equivalent to the 15428, but incorporates secure boot technology.

When a UCS rack server with VIC 15427 or 15428 is connected to a fabric interconnect (FI-6536/6400/6300), the VIC 15428 is provisioned through Cisco Intersight™ Managed Mode (IMM) or Cisco UCS Manager (UCSM) policies. When the UCS rack server with VIC 15427 or 15428 is connected to a ToR switch such as Cisco Nexus® 9000 Series, the VIC adapter is provisioned through the Cisco Integrated Management Controller (IMC) or Intersight policies for a standalone server.

Figure 8. Cisco UCS VIC 15427 and 15428

Figure 9. Cisco UCS VIC 15427 and 15428 Infrastructure

Cisco VIC 15237 and 15238

The Cisco UCS VIC 15237 and 15238 (Figure 10) are dual-port quad small-form-factor pluggable (QSFP/QSFP28/QSFP56) mLOM cards designed for Cisco UCS C-series M6/M7 rack servers. The card supports 40/100/200-Gbps Ethernet or FCoE. The card can present PCle standards-compliant interfaces to the host, and these can be dynamically configured as either NICs or HBAs.

The Cisco UCS VIC 15237 is functionally equivalent to the 15238, but incorporates secure boot technology.

When a UCS rack server with VIC 15237 or 15238 is connected to a fabric interconnect (FI-6536/6300), the VIC adapter is provisioned through Cisco Intersight Managed Mode (IMM) or Cisco UCS Manager (UCSM) policies. When the UCS rack server with VIC 15237 or 15238 is connected to a ToR switch such as Cisco Nexus 9000 Series, the VIC adapter is provisioned through the Cisco IMC or Intersight policies for a UCS standalone server.

Figure 10. Cisco UCS VIC 15237 and 15238

Figure 11. Cisco UCS VIC 15237 and 15238 infrastructure

The Cisco UCS VIC 15411 (Figure 12) is a dual-port 40-Gbps or 4x10-Gbps Ethernet/FCoE-capable modular LAN on motherboard (mLOM) designed for Cisco UCS B-Series M6 Blade Servers. When used in combination with an optional port expander, the Cisco UCS VIC 15411 capabilities are enabled for two ports of 40-Gbps Ethernet. The Cisco UCS VIC 15411 enables a policy-based, stateless, agile server infrastructure that can present to the host PCIe standards-compliant interfaces that can be dynamically configured as either NICs or HBAs.

Figure 12. Cisco UCS VIC 15411

Figure 13.
Cisco UCS VIC 15411 infrastructure

Figure 14. Cisco UCS VIC 15411 with port expander

The Cisco UCS VIC 15235 (Figure 15) is a dual-port quad small-form-factor pluggable (QSFP/QSFP28/QSFP56) PCle card designed for Cisco UCS C-series M6/M7 rack servers. The card supports 40/100/200-Gbps Ethernet or FCoE. The card can present PCle standards-compliant interfaces to the host, and these can be dynamically configured as either NICs or HBAs.

When a UCS rack server with VIC 15235 is connected to a fabric interconnect (FI-6536/6300), the VIC 15235 is provisioned through Cisco Intersight Managed Mode (IMM) or Cisco UCS Manager (UCSM) policies. When the UCS rack server with VIC 15235 is connected to a ToR switch such as Cisco Nexus 9000 Series, the VIC 15235 is provisioned through the Cisco IMC or Intersight policies for a UCS standalone server.

Figure 15. Cisco UCS VIC 15235

Figure 16.Cisco UCS VIC 15235 infrastructure

The Cisco UCS VIC 15425 (Figure 17) is a quad-port small-form-factor pluggable (SFP+/SFP28/SFP56) PCle card designed for Cisco UCS C-series M6/M7 rack servers. The card supports 10/25/50-Gbps Ethernet or FCoE. The card can present PCle standards-compliant interfaces to the host, and these can be dynamically configured as either NICs or HBAs.

When a UCS rack server with VIC 15425 is connected to a fabric interconnect (FI-6536/6400/6300), the VIC 15425 is provisioned through Cisco Intersight Managed Mode (IMM) or Cisco UCS Manager (UCSM) policies. When the UCS rack server with VIC 15425 is connected to a ToR switch such as Cisco Nexus® 9000 Series, the VIC 15425 is provisioned through the Cisco IMC or Intersight policies for a standalone server.

Cisco UCS VIC 15425 Infrastructure

Features and benefits

The Cisco UCS VIC 15000 Series provide the following features and benefits:

- Stateless and agile platform: The personality of the card is determined dynamically at boot time using the
 service profile associated with the server. The number, type (NIC or HBA), identity (MAC address and
 World Wide Name [WWN]), failover policy, bandwidth, and Quality-of-Service (QoS) policies of the PCle
 interfaces are all determined using the service profile. The capability to define, create, and use interfaces
 on demand provides a stateless and agile server infrastructure.
- Network interface virtualization: Each PCle interface created on the VIC is associated with an interface on the Cisco UCS fabric interconnect, providing complete network separation for each virtual cable between a PCle device on the VIC and the interface on the fabric interconnect.

Next-generation data center features

A hardware classification engine provides support for advanced data center requirements, including stateless network offloads for VXLAN, NVGRE, and GENEVE. Additional features support low-latency kernel bypass for performance optimization through usNIC, DPDK, SR-IOV and server virtualization support using NetQueue and VMQ/VMMQ. The Cisco UCS VIC 15000 Series provide high network performance and low latency for the most demanding applications:

- Big data, High-Performance Computing (HPC)
- · Large-scale virtual machine deployments
- · High-bandwidth storage targets and archives
- NVMe over Fabrics support for NVMe over RoCEv2, NVMe/FC, NVMe/TCP

The Cisco VIC provides industry-leading performance and features.

Table 1 summarizes the main features and benefits of the Cisco UCS VIC 15000 Series.

Table 1. Features and benefits

Features	Benefits
PCIe x16 Gen4 interfaces	Delivers high performance (200 Gb/s) throughput
10/25/40/50/100/200-Gbps unified I/O	 Delivers 4x 10/25/50-Gbps or 2x 40/100/200-Gbps in a single VIC configuration with a Cisco UCS C-Series M6/M7 Rack Server
	 Delivers 2x 100-Gbps or 4x 25-Gbps in a single VIC configuration with the Cisco UCS X210c M6/M7 and X410c M7 compute node with Cisco UCS FI- 6536/6400
	 Delivers 2x 40-Gbps or 4x 10-Gbps in a single VIC configuration with the Cisco UCS B-Series M6 Blade Server with Cisco UCS FI-6536/6400/6300
	 Helps reduce TCO by consolidating the overall number of NICs, HBAs, cables, and switches because LAN and SAN traffic run over the same adapter card and fabric

Features	Benefits
512 virtual adapters and interfaces	 Creates fully functional unique and independent PCle adapters and interfaces (NICs and HBAs) without requiring single-root I/O virtualization (SR-IOV) support from OSes or hypervisors
	 Allows these virtual interfaces and adapters to be configured and operated independently, just like physical interfaces and adapters
	 Creates a highly flexible I/O environment needing only one card for all I/O configurations
	Note: Cisco UCS VIC 15000 Series hardware is SR-IOV capable. Please refer to Cisco UCS Manager configuration limits for your specific OS and environment in the configuration guide.
Low-latency connectivity	Supports usNIC technology, delivering latency as low as 1 microsecond in back-to-back VIC connections; standard latency using the Cisco Nexus series switches in approximately 1–2 microseconds
Cisco SingleConnect technology	A single unified network: the same network brings LAN, SAN, and management connectivity to each server.
Centralized management	Enables the mLOM and mezzanine in X-Series, and mLOM or PCle for M6/M7 rack servers, to be centrally configured and managed by Cisco Intersight
Support for advanced features	 usNIC 802.1Q (QinQ) Small Computer System Interface over IP (iSCSI) and iSCSI boot Ethernet NIC (eNIC) and Fibre Channel NIC (fNIC) DPDK NetFlow N-Port ID Virtualization (NPIV) Receive flow steering Multi-RQ 16K extended (TX/RX) ring PTPv2 (Linux only) VMware NetQueue Windows VMQ/VMMQ Receive side scaling (IPv4/IPv6/UDP/TCP) GENEVE offload support with VMware NSX-T VXLAN offload support for VMware NSX-V, Linux (RHEL, SLES) ENS support for VMware NSX-T VXLAN and NVGRE support on Windows NVMe over RoCEv2 support with RHEL NVMe over RoCEv2 support with ESXi NVMe-TCP qualified with ESXi NVMe-TCP qualified with RHEL SMB Direct support on Windows 2019 and windows 2022 using RDMA over converged Ethernet RoCEv2 VIC secure boot (available with VIC 15420 and 15422 from 4.3(1) release, VIC 15235 and 15425 from 4.3(2) release, and VIC 15230, 15237, and 15427 from 4.3(2c) release) SR-IOV (Support for ESXi with M7 rack-servers in IMC from 4.3(1) release)

Features	Benefits
Fibre Channel	 Supports Fibre Channel over the UCS unified fabric with Cisco UCS Fabric Interconnect 6300 Series, 6400 Series and 6536
	 Supports NVMe over Fabrics (NVMeoF) for Fibre Channel (FC-NVMe) with RHEL, SLES, and ESXi
	Supports FC multiqueue (FC MQ) on RHEL and SLES
	FDMI on Linux and ESX
	 Supports FCoE Fibre Channel when connected to Cisco Nexus 9000 Series Switches
Network architecture	Provides a redundant path to the fabric interconnect using hardware-based fabric failover
High performance I/O	Supports over 900,000 I/O operations per second (IOPS)
Lossless Ethernet	Uses Priority Flow Control (PFC) to enable lossless Ethernet as part of the Cisco UCS Unified Fabric
Broad OS and hypervisor support	Supports customer requirements for VMware vSphere, Microsoft Windows, Red Hat Enterprise Linux, Citrix XenServer, SUSE Linux Enterprise Server, and Ubuntu. Refer to the Hardware Compatibility List (HCL) for detail list of supported operating systems

Product specifications

Transceiver and cable support

The Cisco UCS VIC supports a wide variety of Ethernet connectivity options using Cisco 10/25/40/100-Gbps transceivers and Cisco 10/25/40/100-Gbps passive cables and active optical cables.

Third-party cables and transceivers are not supported on the Cisco UCS C-series VICs. If a third-party cable or transceiver is installed between a UCS C-series VIC and a fabric interconnect or Top-of-Rack (ToR) switch such as Cisco Nexus 9000 Series, the link will not come up. When connecting a UCS C-series VIC to a fabric interconnect or a ToR switch, only the supported transceivers and cables listed below should be used.

Table 5 lists the supported transceiver options.

 Table 5.
 Cisco UCS VIC transceiver matrix

Product number	Description	
SFP+ 10-Gbps transceivers ⁽⁴⁾		
SFP-10G-T-X ⁽³⁾	10GBASE-T, copper, 30m	
SFP-10G-SR	10GBASE-SR, 850 nm, MMF, 300m	
SFP-10G-SR-S	10GBASE-SR, 850 nm, MMF, 300m, S-Class	
SFP-10G-LR	10GBASE-LR, 1310 nm, SMF, 10 km	
SFP-10G-LR-S	10GBASE-LR, 1310 nm, SMF, 10 km, S-Class	
SFP28 25-Gbps transceivers ⁽⁷⁾		
SFP-25G-SR-S ^(1,6)	25GBASE-SR SFP28 module for MMF	
SFP-25G-SL ^(5,6)	25GBASE-SL SFP28 module for MMF	
SFP-10/25G-CSR-S ^(1,6)	10/25GBASE-CSR SFP28 module for MMF	
SFP-10/25G-LR-S ^(2,6)	10/25GBASE-LR SFP28 module of SMF	
QSFP 40-Gbps transceivers		
QSFP-40G-SR4	40GBASE-SR4 QSFP transceiver module with MPO connector	
QSFP-40G-SR4-S	40GBASE-SR4 QSFP transceiver module, MPO connector, enterprise class	
QSFP-40G-CSR4	40GBASE-CSR4, 4 lanes, 850 nm MMF, MPO	
QSFP-40G-CSR-S	40GBASE-SR-, duplex MMF, LC	
QSFP-40G-SR-BD	40GBASE-SR-BiDi, duplex MMF (LC)	
QSFP-40G-LR4	QSFP 40GBASE-LR4 OTN transceiver, LC, 10KM	
QSFP-40G-LR4-S	40GBASE-LR, 1310 nm, SMF, 10 km, S-Class	
QSFP 100-Gbps transceivers		
QSFP-100G-SR4-S	100GBASE SR4 QSFP transceiver, MPO, 100m over OM4 MMF	
QSFP-100G-SL4	100GBASE QSFP Short Link Transceivers, 30M reach over OM4 MMF, MPO	
QSFP-40/100-SRBD	100GBASE/40GBASE SR-BiDi QSFP transceiver, LC, 100m over OM4 MMF	
QSFP-100G-SR1.2 ⁽⁸⁾	100G SR-BiDi QSFP Transceiver, LC, 100m OM4 MMF, LC	

Product number	Description
QSFP-100G-LR4-S	100GBASE LR4 QSFP transceiver, LC, 10KM over SMF
QSFP-100G-DR-S	100GBASE DR QSFP Transceiver, 500m over SMF, LC
QSFP-100G-FR-S	100GBASE FR QSFP Transceiver, 2km over SMF, LC
QSFP-100G-SM-SR	100GBASE CWDM4 Lite QSFP Transceiver, 2km over SMF, 10-60C, LC

Note:

- (1) SFP-10/25G-CSR-S is supported only at 25G. Interoperability between SFP-25G-SR-S and SFP-10/25G-CSR-S (at 25G) is supported on VIC15428.
- (2) SFP-10/25G-LR-S is supported at 25G only.
- (3) SFP-10G-T-X transceiver is supported at 10G speed with VIC 15428 on ports 2 and 4 when in standby-power. When the server is fully powered-on, SFP-10G-T-X transceiver is enabled for all 4 ports. If user intends to mix cable types on a 15428 VIC card along with SFP-10G-T-X, ports 1 and 3 can support only passive copper cables (10/25G-CUx). The 10GBase-T connections are not supported when the VIC is connected to a Fabric Interconnect.
- (4) 10G connectivity from VIC 15428 is supported with UCS fabric interconnect 6300/6400 series and standalone switches. UCS-FI-6536 does not currently support 10-Gbps connectivity to UCS VIC 15428.
- (5) SFP-25G-SL is supported with UCS-FI-6536.
- (6) FI 6536 with QSA28 (CVR-QSFP28-SFP28) on server-port supports connectivity with VIC14528 using the following SFP28 transceiver. This connectivity is supported with UCS-FI-6536 from IMM Release 4.2(2).
- (7) 25G connectivity from VIC 15428 is supported with UCS fabric interconnect 6400/6500 series, 93180YC-FX3 in Fex mode and 93180YC-FX/93360YC-FX2 standalone switches.
- (8) Supported in standalone mode with 4.3(1).

VIC supports 50/200-Gbps capability but currently there are no 50/200-Gbps transceiver and cable qualified against a ToR switch and they will be included as the VIC is qualified against a supported ToR switch.

Qualified transceiver optical breakout using 3rd party MPO-4xLC fiber breakout cable

- SFP-10G-SR to QSFP-40G-SR4 in 4x10G breakout mode with fabric-interconnect and standalone switches.
- SFP-10G-SR to QSFP-40G-CSR4 in 4x10G breakout mode with fabric-interconnect and standalone switches.
- SFP-10G-LR-S to QSFP-4x10G-LR-S in 4x10G breakout mode with standalone switches.
- SFP-25G-SR-S to QSFP-100G-SR4-S in 4x25G mode breakout mode fabric-interconnect and standalone switches.
- SFP-10/25G-CSR-S to QSFP-100G-SR4-S in 4x25G mode breakout mode fabric-interconnect and standalone switches.
- SFP-10/25G-LR-S to QSFP-100G-PSM4-S in 4x25G mode breakout mode with standalone switches.
- SFP-25G-SL to QSFP-100G-SL4 in 4x25G mode breakout mode with 6536 fabric-interconnect.

SFP-H10GB-CU3M ⁽⁸⁾	10GBASE-CU SFP+ direct-attached copper cable, 3M	
SFP-H10GB-CU5M ⁽⁸⁾	10GBASE-CU SFP+ direct-attached copper cable, 5M	
SFP-H10GB-ACU7M ⁽⁸⁾	10GBASE-CU SFP+ direct-attached active copper cable, 7M	
SFP-H10GB-ACU10M	10GBASE-CU SFP+ direct-attached active copper cable, 10M	
SFP-10G-AOC1M	10GBASE active optical SFP+ cable, 1M	
SFP-10G-AOC2M	10GBASE active optical SFP+ cable, 2M	
SFP-10G-AOC3M ⁽⁸⁾	10GBASE active optical SFP+ cable, 3M	
SFP-10G-AOC5M ⁽⁸⁾	10GBASE active optical SFP+ cable, 5M	
SFP-10G-AOC7M	10GBASE active optical SFP+ cable, 7M	
SFP-10G-AOC10M	10GBASE active optical SFP+ cable, 10M	
SFP28 25-Gbps cables with integrated transceivers ⁽⁷⁾		
SFP-H25G-CU1M	25GBASE-CU SFP28 direct-attached copper cable, 1M	
SFP-H25G-CU2M	25GBASE-CU SFP28 direct-attached copper cable, 2M	
SFP-H25G-CU3M ⁽⁹⁾	25GBASE-CU SFP28 direct-attached copper cable, 3M	
SFP-H25G-CU4M	25GBASE-CU SFP28 direct-attached copper cable, 4M	
SFP-H25G-CU5M ⁽⁹⁾	25GBASE-CU SFP28 direct-attached copper cable, 5M	
SFP-25G-AOC1M	25GBASE-AOC SFP28 active optical cable, 1M	
SFP-25G-AOC2M	25GBASE-AOC SFP28 active optical cable, 2M	
SFP-25G-AOC3M ⁽⁹⁾	25GBASE-AOC SFP28 active optical cable, 3M	
SFP-25G-AOC4M	25GBASE-AOC SFP28 active optical cable, 4M	
SFP-25G-AOC5M ⁽⁹⁾	25GBASE-AOC SFP28 active optical cable, 5M	

Product number	Description	
SFP-25G-AOC7M	25GBASE-AOC SFP28 active optical cable, 7M	
SFP-25G-AOC10M	25GBASE-AOC SFP28 active optical cable, 10M	
QSFP 40-Gbps cables with integrated transceivers (10)		
QSFP-4x10G-AC7M	40GBASE-CR4 QSFP+ to 4x10GBASE-CU SFP+ active direct-attach breakout cable, 7M	
QSFP-4x10G-AC10M	40GBASE-CR4 QSFP+ to 4x10GBASE-CU SFP+ active direct-attach breakout cable, 10M	
QSFP-4SFP10G-CU1M	40GBASE-CR4 QSFP+ to 4x10GBASE-CU SFP+ passive direct-attach cable, 1M	
QSFP-4SFP10G-CU3M	40GBASE-CR4 QSFP+ to 4x10GBASE-CU SFP+ passive direct-attach cable, 3M	
QSFP-4SFP10G-CU5M	40GBASE-CR4 QSFP+ to 4x10GBASE-CU SFP+ passive direct-attach cable, 5M	
QSFP-4X10G-AOC1M	40GBASE-active optical QSFP to 4xSFP+ active optical breakout cable, 1M	
QSFP-4X10G-AOC2M	40GBASE-active optical QSFP to 4xSFP+ active optical breakout cable, 2M	
QSFP-4X10G-AOC3M	40GBASE-active optical QSFP to 4xSFP+ active optical breakout cable, 3M	
QSFP-4X10G-AOC5M	40GBASE-active optical QSFP to 4xSFP+ active optical breakout cable, 5M	
QSFP-4X10G-AOC7M	40GBASE-active optical QSFP to 4xSFP+ active optical breakout cable, 7M	
QSFP-4X10G-AOC10M	40GBASE-active optical QSFP to 4xSFP+ active optical breakout cable, 10M	
QSFP-H40G-CU1M	40GBASE-CR4 passive copper cable, 1M	
QSFP-H40G-CU3M	40GBASE-CR4 passive copper cable, 3M	
QSFP-H40G-CU5M	40GBASE-CR4 passive copper cable, 5M	
QSFP-H40G-ACU7M	40GBASE-CR4 active copper cable, 7M	
QSFP-H40G-ACU10M	40GBASE-CR4 active copper cable, 10M	
QSFP-H40G-AOC1M	40GBASE active optical cable, 1M	
QSFP-H40G-AOC2M	40GBASE active optical cable, 2M	
QSFP-H40G-AOC3M	40GBASE active optical cable, 3M	
QSFP-H40G-AOC5M	40GBASE active optical cable, 5M	

Product number	Description	
QSFP-H40G-AOC7M	40GBASE active optical cable, 7M	
QSFP-H40G-AOC10M	40GBASE active optical cable, 10M	
QSFP-H40G-AOC15M	40GBASE active optical cable, 15M	
QSFP 100-Gbps cables with integrated transceivers ⁽¹¹⁾		
QSFP-4SFP25G-CU1M	100GBASE QSFP to 4xSFP25G passive copper splitter cable, 1M	
QSFP-4SFP25G-CU2M	100GBASE QSFP to 4xSFP25G passive copper splitter cable, 2M	
QSFP-4SFP25G-CU3M	100GBASE QSFP to 4xSFP25G passive copper splitter cable, 3M	
QSFP-4SFP25G-CU5M	100GBASE QSFP to 4xSFP25G passive copper splitter cable, 5M	
QSFP-100G-CU1M	100GBASE-CR4 passive copper cable, 1M	
QSFP-100G-CU2M	100GBASE-CR4 passive copper cable, 2M	
QSFP-100G-CU3M	100GBASE-CR4 passive copper cable, 3M	
QSFP-100G-CU5M	100GBASE-CR4 passive copper cable, 5M	
QSFP-100G-AOC1M	100GBASE QSFP active optical cable, 1M	
QSFP-100G-AOC2M	100GBASE QSFP active optical cable, 2M	
QSFP-100G-AOC3M	100GBASE QSFP active optical cable, 3M	
QSFP-100G-AOC5M	100GBASE QSFP active optical cable, 5M	
QSFP-100G-AOC7M	100GBASE QSFP active optical cable, 7M	
QSFP-100G-AOC10M	100GBASE QSFP active optical cable, 10M	
QSFP-100G-AOC15M	100GBASE QSFP active optical cable, 15M	
QSFP-100G-AOC20M	100GBASE QSFP active optical cable, 20M	
QSFP-100G-AOC25M	100GBASE QSFP active optical cable, 25M	
QSFP-100G-AOC30M	100GBASE QSFP active optical cable, 30M	

Note:

⁽⁸⁾ Support also includes Nexus 93180YC-EX and 93240YC-FX2 with Cisco IMC Release 4.2(2).

⁽⁹⁾ Support also included Nexus 36180YC-R, 93180YC-EX, and 93240YC-FX2 with Cisco IMC Release 4.2(2).

^{(10) 10}G connectivity from VIC 15428 with 4x10G/4SFP10G cables is supported with UCS fabric interconnect 6300/6400 series. UCS-FI-6536 does not currently support 10-Gbps connectivity to UCS VIC 15428.

^{(11) 25}G connectivity from VIC 15428 with 4SFP25G cables is supported with UCS fabric interconnect 6400/6500 series along with 93180YC-FX, 93360YC-FX2, 9336C-FX2, and 9316D-GX standalone switches.

Ordering information

Table 7 presents ordering information for the Cisco UCS VIC 15000 Series.

 Table 7.
 Ordering information

Part number	Description
UCSX-ML-V5D200G	Cisco UCS VIC 15231 2x100G mLOM for Cisco UCS X210c M6 Compute Node
UCSX-ML-V5Q50G	UCS VIC 15420 4x25G mLOM for Cisco UCS X210c-M6 Compute Node
UCSX-ME-V5Q50G	UCS VIC 15422 4x25G mezz for Cisco UCS X210c-M6 Compute Node
UCSX-V5-BRIDGE	UCS VIC 15000 bridge connector for VIC 15420 mLOM and VIC 15422 mezz in an X210c M6 Compute Node
UCSC-M-V5Q50G	Cisco UCS VIC 15428 Quad port 10/25/50G mLOM for C220-M6, C240-M6, C225-M6, C245-M6
UCSC-M-V5D200G	Cisco UCS VIC 15238 Dual port 40/100/200G mLOM for C220-M6, C240-M6, C225-M6, C245-M6
UCSB-ML-V5Q10G	Cisco UCS VIC 15411 mLOM for Cisco UCS B-Series M6 Blade Server
UCSC-P-V5Q50G	Cisco UCS VIC 15425 Quad port 10/25/50G PCle for Cisco UCS C-Series M6 rack servers
UCSC-P-V5D200G	Cisco UCS VIC 15235 Dual port 40/100/200G PCIe for Cisco UCS C-Series M6 rack servers
UCSX-ML-V5D200G-D	Cisco UCS VIC 15231 2x100G mLOM for Cisco UCS X210c-M7 and X410c-M7 Compute Node
UCSX-ML-V5Q50G-D	UCS VIC 15420 4x25G mLOM for Cisco UCS X210c-M7 and X410c-M7 Compute Node
UCSX-ME-V5Q50G-D	UCS VIC 15422 4x25G mezz for Cisco UCS X210c-M7 and X410c-M7 Compute Node
UCSX-V5-BRIDGE-D	UCS VIC 15000 bridge connector for VIC 15420 mLOM and VIC 15422 mezz in an X210c-M7 and X410c-M7 Compute Node
UCSC-M-V5Q50G-D	Cisco UCS VIC 15428 Quad port 10/25/50G mLOM for C220-M7, C240-M7
UCSC-M-V5D200G-D	Cisco UCS VIC 15238 Dual port 40/100/200G mLOM for C220-M7, C240-M7
UCSC-P-V5Q50G-D	Cisco UCS VIC 15425 Quad port 10/25/50G PCle for Cisco UCS C-Series M7 rack servers
UCSC-P-V5D200G-D	Cisco UCS VIC 15235 Dual port 40/100/200G PCle for Cisco UCS C-Series M7 rack servers
UCSC-M-V5D200GV2	Cisco UCS VIC 15237 Dual port 40/100/200G mLOM for UCS C-Series M6 rack servers
UCSC-M-V5D200GV2D	Cisco UCS VIC 15237 Dual port 40/100/200G mLOM for UCS C-Series M7 rack servers
UCSC-M-V5Q50GV2	Cisco UCS VIC 15427 Quad port 10/25/50G mLOM for Cisco UCS C-Series M6 rack servers

Part number	Description
UCSC-M-V5Q50GV2D	Cisco UCS VIC 15427 Quad port 10/25/50G mLOM for Cisco UCS C-Series M7 rack servers
UCSX-ML-V5D200GV2	Cisco UCS VIC 15230 2x100G mLOM for Cisco UCS X-Series M6/M7 Compute Nodes
UCSX-ML-V5D200GV2D	Cisco UCS VIC 15230 2x100G mLOM for Cisco UCS X-Series M6/M7 Compute Nodes

Note: When ordering Cisco UCS VIC 15000 Series, the part numbers with "-D" suffix are ordering PIDs specific to UCS M7 servers, and the PIDs without "-D" to UCS M6 servers. There is no difference in functionality and operation for VICs with and without "-D".

System requirements

The Cisco UCS VIC 15000 Series is designed for use on Cisco UCS X-Series M6/M7 servers, B-series M6 blade servers, and C-series M6/M7 rack servers.

Warranty information

Find warranty information at Cisco.com on the Product Warranties page.

Product sustainability

Information about Cisco's Environmental, Social, and Governance (ESG) initiatives and performance is provided in Cisco's CSR and sustainability <u>reporting</u>.

Cisco Unified Computing Services

Using a unified view of data center resources, Cisco and our industry-leading partners deliver services that accelerate your transition to a unified computing architecture. Cisco Unified Computing Services help you quickly deploy your data center resources, simplify ongoing operations, and optimize your infrastructure to better meet your business needs. For more information about these and other Cisco Data Center Services, visit https://www.cisco.com/go/unifiedcomputingservices

Why Cisco?

The Cisco Unified Computing System continues Cisco's long history of innovation in delivering integrated systems for improved business results based on industry standards and using the network as the platform. Recent examples include IP telephony, LAN switching, unified communications, and unified I/O. Cisco began the unified computing phase of our unified data center strategy several years ago by assembling an experienced team from the computing and virtualization industries to augment our own networking and storage access expertise. As a result, Cisco delivered foundational technologies, including the Cisco Nexus Family, supporting unified fabric and server virtualization. Cisco UCS completes this phase, delivering innovation in architecture, technology, partnerships, and services. Cisco is well positioned to deliver this innovation by taking a systems approach to computing that unifies network intelligence and scalability with innovative ASICs, integrated management, and standard computing components.

Cisco Capital

Flexible payment solutions to help you achieve your objectives

Cisco Capital® makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. Learn more.

Document history

New or revised topic	Described in	Date
Added new transceiver matrix	Where applicable	October 20, 2022
Added PCIe VIC cards	Where applicable	June 1, 2023
Added new supported device details	Where applicable	June 23, 2023
Added X410c compute node support	Where applicable	September 12, 2023
Updates for new VIC models	Where applicable	October 1, 2023
