Upgrade your vehicle mount computers to the ET6x Series tablets

...and say goodbye to the old way of managing different devices for different applications.

The versatile and rugged ET60/ET65 Android and ET60W/ET65W Windows tablets are ready for whatever you need — a vehicle mount computer in forklifts, a mobile tablet on the warehouse floor and a desktop computer in the office. There's just one platform to purchase and support — simplifying life for IT and giving your operations a new level of adaptability. Best of all, you don't have to sacrifice any ruggedness or performance for your forklift and material handling applications.

Versatile, rugged, high performance — all the right features for your material handling vehicles and beyond.

YOUR EDGE

Do you think a multi-purpose tablet can't transform into a rugged vehicle mount computer?

Think again.

Survives constant pounding

Patent-pending vehicle dock holds the ET6x Series in place under heavy vibration, constant pounding and operations over ramps and bumps

Connects to Private 5G/CBRS networks[1]

Offers consistent, cost-effective outdoor performance in ports and yards

Easy viewing in any environment

10 in. ultra-bright 1000 nit display is easy to view in any lighting, including outside in bright sunlight and inside in dimly lit aisles

No-battery configurations

Can be powered by the forklift, eliminating the need to purchase and maintain batteries

Supports your legacy applications

Run existing warehouse applications right out of the box on any ET6x Series tablet with Ivanti All-Touch TE or StayLinked SmartTE — and any Windows application will run on the ET60W/ET65W

1. ET65/ET65W only; CBRS available in US only
2. ET60 Android only

Ready for the freezer (Android only)

Heated touchpanel ensures clear visibility under heavy condensing conditions for uninterrupted cold chain workflows[2]

Supports the latest wireless connectivity

Faster, more reliable, future-proof connections with support for 5G and Wi-Fi 6E (Android) or Wi-Fi 7 (Windows); optional pass-through antenna ports

Powerful platforms

AI-driven Intel and Qualcomm® processors are designed to support the fastest networks, plus artificial intelligence and machine learning apps

Hose it off with the vehicle

IP66 sealing handles high-pressure vehicle hose-downs, rain and dust

AI-enabled touchscreen (Windows only)

Redefines touch accuracy, flexibility and response times, allowing workers to enter data faster, easier and in more conditions

Advanced AI audio (Windows only)

The latest machine and neural network technologies work together to suppress more noises and more types of noises to take voice clarity to the next level
