Introduction

Purpose

This document describes ordering Cisco physical, virtual, and containerized network security solutions, including:

- Cisco Secure Firewall Threat Defense (FTD).
- Cisco Secure Firewall Adaptive Security Appliance (ASA).
- Cisco Firepower 1000 Series, 1200 Series, 3100 Series, 4100 Series, 4200 Series and 9300 Series Appliances (which can run either FTD or ASA software).

In addition, this guide details the process of enabling extended logging and analytics for both FTD and ASA platforms as well as Cisco ISE Passive Identity Connector (ISE-PIC) for identity integration into FTD.

This guide will help you make sure that the right quantities and types of parts are selected to reduce the risk of order rejection.

Audience

This guide is intended for Cisco sales, partners, and distributors.

Scope

This document covers orderability for the following products, associated licenses and options:

Cisco Secure Firewall (Both Firewall Threat Defense and ASA software).

- Hardware appliances (Cisco Firepower or Cisco Secure Firewall appliances).
- Virtualized and containerized appliances (FTDv, ASA v).

Firewall management solutions

- **Cisco Secure Firewall Management Center** (formerly Firepower Management Center): provides complete and unified management over firewalls, application control, intrusion prevention, URL filtering, and advanced malware protection. Quickly and easily go from managing a firewall to controlling applications to investigating and remediating malware outbreaks. Firewall Management Center is available in all form factors – physical appliance, virtual appliance, public cloud and cloud-delivered (software as a service model).
- **Cisco Defense Orchestrator** helps you establish and maintain a security posture by managing security policies across Cisco security devices. Cisco Defense Orchestrator also incorporates the cloud-delivered version of Secure Firewall Management Center. As a cloud service, it is an always-available, highly reliable, highly scalable, multitenant platform.

Cisco Defense Orchestrator provides management of security policy, objects and configuration for Cisco Adaptive Security Appliance and Cisco Secure Firewall Threat Defense (formerly Next-Generation Firewalls, or NGFW). Also supported are the Meraki MX Firewalls and AWS Security Groups for pure policy and object management. Configuration management for these platforms is still available through their native user interface.

Note: For the Cisco Defense Orchestrator Ordering Guide, please click [here](#).

-
- **Cisco Security Manager software** is an on-premise centralized management platform for Cisco Adaptive Security Appliances (ASA), enabling consistent policy enforcement, troubleshooting, and summarized reports.

Optional Software

- Cisco Secure DDoS Protection (formerly Radware Virtual DefensePro DDoS Mitigation).
- Cisco Secure Client (formerly Cisco AnyConnect Secure Mobility Client).

Support

- Cisco Smart Net Total Care appliance support services.
- Cisco Software Application Support plus Upgrades (SASU).

Note: Any order for a service will be subject to the detailed terms and conditions presented in this guide.

Selecting the Appropriate Management Solution

Several management solutions are available to manage Cisco Secure Firewalls. Use these guidelines to choose the best ask a Cisco expert for advice.

Choosing the right management solution is tied to a few factors:

- The software image you select, either Firewall Threat Defense (FTD) or ASA software image.
- Willingness to use a cloud-based solution for management.
- Need for specific features or environment scale.

Local managers are included with both software options for single firewall deployments:

- ASDM is included with the ASA software image.
- Firewall Device Manager (FDM) is included with the Firewall Threat Defense software Image for all supported appliance models (Cisco Firepower 1000 Series, 4100 Series and 9300 Series).

The Cisco Secure Firewall Threat Defense software image enables centralized management with either an on-premise, virtual or cloud based manager - Cisco Secure Firewall Management Center.

Cisco Defense Orchestrator unites management across Cisco solutions and incorporates the cloud-delivered version of Secure Firewall Management Center. This makes Cisco Defense Orchestrator the best option for customers who want to use a cloud based solution for the management of ASAs, FTDs or a mix of ASAs and FTDs from a single pane of glass.

Devices running the ASA software can be managed centrally with the Cisco Security Manager (on-premise) or Cisco Defense Orchestrator (Cloud).

If a customer wants to manage multiple ASA with FirePOWER Services devices centrally, then two managers are required: Firewall Management Center for threat functions and Cisco Security Manager for firewall functions.

The following table can help guide you in which manager to select with your firewall order.

Licensing

Smart Licensing is Cisco’s licensing system. It enables customers to easily move licenses themselves between similar systems in their organization, overcoming limitations associated with previous device-locked Product Authorization Key (PAK)-based licenses. Become familiar with the new [Smart Software Licensing](#) portion of the ordering process.

End customers must create a Smart Licensing account on Cisco’s Smart Software Manager portal before ordering the Cisco Secure Firewall Threat Defense software on select ASA appliances. Alternatively, Cisco or a partner can help create the Smart Licensing account on behalf of the end customer. The Smart Software Manager portal is available for customers to manage the efficient use of purchased smart licenses. When the order is placed, all ordered licenses are added to the customer’s Smart Licensing account.

Table 1. Product licensing by product type

Product	Licensing
Cisco ASA Virtual appliances	Cisco Smart Licensing
Cisco Secure Firewall Threat Defense Virtual appliances	Cisco Smart Licensing
Cisco Secure DDOS Protection (Radware vDefensePro) on Cisco Firepower 9300 and 4100 Series appliances	Supplied by Radware
Cisco Secure Firewall Management Center	None required
Cisco Secure Firewall Management Center Virtual Appliance	Cisco Smart Licensing
Cisco Security Manager	Cisco PAK Licensing
Cisco Security Analytics and Logging	Either Cisco Smart Licensing or Classic License
Cisco ISE Passive Identity Connector (ISE-PIC)	Either Cisco Smart Licensing or Classic License

With the Cisco Smart License Manager, the customer can connect devices to the Smart Software Manager portal, so purchased licenses can be consumed as needed. These licenses can be relinquished back to the portal when a device is powered down or a user is finished using the license. With [Smart Software Licensing](#), customers can easily check in and check out licenses to use on different platforms. Licenses are no longer locked to a specific platform.

A Smart Account can be created from [Cisco Software Central](#). For more information on setting up a Smart Account, please refer to this [Smart Licensing Deployment Guide](#).

ASA and Firewall Threat Defense License Terminology

This guide consistently uses the license terminology used in the Cisco Commerce tool. As of ASA 9.19.1 and FTD 7.3, new licensing terminology appears in the user interfaces of the management platforms. The differences are only in naming and are not different licenses per se.

Table 3. License terminology differences between Cisco Commerce and the user interfaces of the management platforms

License Name Used in the Cisco Commerce tool		License Name Seen in User Interface
Base	Essentials	
Threat	IPS	
Malware	Malware Defense	
URL License		URL

Cisco Secure DDoS Protection (Radware vDefensePro) Licensing

Licensing of the vDP and Vision will be administered directly by Radware. Once the order is shipped, Radware will send an email to the customer with their serial numbers. Please note the address of the person on the customer order who will receive the email. These serial numbers will be needed along with the MAC address for either vDP and/or Vision after installation. If the email with the serial numbers cannot be found, please open a TAC case to get them reissued. For detailed licensing instructions, please refer to [Radware License Generator](#).

High Availability Pair Licensing

Cisco requires two (2) subscriptions for a High Availability (HA) pair of appliances running Firewall Threat Defense software image, which is configured for active-passive operation. The models available with this optional configuration include:

- Cisco Firepower 1000 Series
- Cisco Secure Firewall 3100 Series
- Cisco Firepower 4100 Series
- Cisco Secure Firewall 4200 Series
- Cisco Firepower 9300 Series
- Cisco Secure Firewall Threat Defense Virtual appliances (except Public Cloud)
- Cisco ASA Virtual appliances (except Public Cloud)

We now offer specially configured bundle SKUs that enable the purchase of a high availability pair of physical appliances and software subscriptions that includes 50% discounted pricing for the second software subscription in the two-appliance bundle.

The bundle consists of:

- Two (2) identically configured hardware appliances
- Two (2) identical software subscriptions

A 50% discount will be automatically applied to the second software subscription in the bundle. See the specific model section in this document for the appropriate bundle PID.

Renewing HA Bundle Software Subscriptions

The 50% pricing discount also applies to HA bundles at time of renewal.

Cisco Secure Client Licensing

Cisco Secure Client (formerly AnyConnect Plus, Apex, and VPN Only) licenses are required to use the Remote Access VPN (RA VPN) functions on all firewalls (physical and virtual) running the Secure Firewall ASA or Secure Firewall Threat Defense code base.

For information on purchasing Cisco Secure Client licenses and sharing the licenses with your Smart Account, please see the [Cisco Secure Client Ordering Guide](#).

Instructions can also be found in the [Cisco Secure Client License FAQ](#).

Service and Support Offerings

Software Application Support Plus Upgrades (SASU)

Cisco Secure Firewall Threat Defense software, ASA with FirePOWER Services, ASA firewall, and Cisco Secure Firewall Management Center security licenses include software subscription support. SASU is essential to keeping your business-critical applications available, highly secure, and operating at optimal performance. For the term of your software subscription licenses, you will receive timely, uninterrupted access to the latest software updates and major upgrade releases, which may contain significant architectural changes and new features and functions. With software subscription support, you will have the latest software working to protect your business. You will also have access to a wide range of online tools and communities that can help you solve problems quickly, maintain business continuity, improve your competitiveness, and make the most of limited resources through increased productivity.

This support entitles customers to the services listed here for the full term of the purchased software subscription:

- Software updates and major upgrades, to keep applications performing optimally with the most current feature set.
- Access to the Cisco Technical Assistance Center (TAC), which provides fast, specialized support.
- Online tool building, to expand in-house expertise and boost business agility.
- Collaborative learning, to provide additional knowledge and training opportunities.

No additional products or fees are required to receive these services with a software subscription.

Cisco SASU includes:

- Registered access to Cisco.com.
- 24-hour access to the Cisco TAC and Cisco software specialists.
- Maintenance and minor software release updates.
- Major software upgrade releases.

Please refer to the following link for more detailed information regarding Cisco SASU:

https://www.cisco.com/en/US/services/ps2827/ps2993/services_at_a_glance_sas_sasu.pdf.

Cisco Smart Net Total Care Service

Customers require a Cisco Smart Net Total Care support contract with each appliance to download application signature updates. The Smart Net Total Care Service gives customers access to an abundance of Cisco support tools and expertise, providing them with greater network availability and performance while reducing operating costs. Technical service is required to be attached at the point of the product sale so that customers get the necessary support and entitlement and the best possible return on investment. When ordering Threat Defense software on select ASA hardware, ASA with FirePOWER Services, the Management Center, or Cisco SSL hardware in Cisco Commerce, the appropriate Smart Net Total Care service items are automatically added to your quote.

The Cisco Smart Net Total Care Service provides:

- Global 24-hour access to the Cisco TAC.
- Access to the online knowledge base, communities, and tools.
- Current hardware replacement option: next business day, where available.
- Operating system software updates.
- Smart, proactive diagnostics and real-time alerts on devices enabled with Cisco Smart Call Home.

Please refer to the following link for more detailed information regarding Cisco Smart Net Total Care Service: https://www.cisco.com/en/US/products/svcs/ps3034/ps2827/ps2978/serv_group_home.html.

Cisco Advanced Services

The Cisco Global Security Solutions team provides comprehensive assessment, design, deployment, and migration assistance through the Cisco Advanced Services Transaction (AS-T) model, which involves the use of a Statement of Work (SOW). These Cisco AS-T offers are custom scoped and priced, and partners need to engage a Cisco Services account manager to purchase them.

Cisco Security Plan and Build Services help customers develop and deploy a comprehensive security strategy they can rely on to deliver the industry's most comprehensive advanced threat protection solution. This service incorporates a best-practice review, deployment, and mini-tune-up to help ensure that the system is alerting properly.

Cisco Security Migration Services help customers move from existing Cisco Source fire or competitive environments. Cisco performs an analysis of the current environment, develops a migration plan, tests the plan in a lab, and performs the migration in the production environment.

To order the customized Cisco Security Plan and Build Services and Migration Services, use the Cisco AS-T part numbers in the table below.

Table 4. Cisco AS-T ordering information

Part numbers	Description	Price (US\$)
AS-SEC-CNSLT (-A, -L)	Cisco Security Plan and Build Services	Custom priced
AS-SEC-CNSLT (-A, -L)	Cisco Security Migration Services	Custom priced

Cisco Technical Services

Cisco Technical Services for Cisco products can be quoted and ordered in Cisco tools, including the Cisco Service Contract Center (SCC) and Cisco Commerce (CCW). Tool use varies depending on the service offer and partner type and whether the service is attached at the time of product purchase.

Partner Supported Services (PSS)

Customers who choose to purchase Partner Supported Services (PSS) from an authorized Cisco partner are also entitled to download application signature updates.

For more details, visit <https://www.cisco.com/go/partnerservices> and the [Partner Support Service Global Ordering Guide for Cisco 1-Tier Partners](#).

Cisco Talos Incident Response

Cisco Talos Incident Response (CTIR) provides a full suite of proactive and emergency services to help you prepare, respond and recover from a cyber security breach. CTIR enables 24 hour emergency response capabilities and direct access to Cisco Talos, the world's largest threat intelligence and research group.

You can order and transact CTIR while ordering specific Cisco Firepower 4K and 9K Series master bundles. This will provide you yet another option to create a stronger security posture and stay protected in case of a security breach. The CTIR PID will be auto-attached based on product order size. **The auto-attached SKU can be removed and is not mandatory.**

SKUs and ordering guidance for Cisco Secure Firewall 1000, 3100, 4100, 4200 and 9300 Series

Introduction

Scope: This section describes the pricing and ordering for the following products:

- Cisco Firepower 1000 Series
- Cisco Secure Firewall 3100 Series
- Cisco Firepower 4100 Series
- Cisco Secure Firewall 4200 series
- Cisco Firepower 9300 Series

About the Cisco Firepower 1000, 3100, 4100, 4200 and 9300 Series

The Cisco Firepower 1000, 3100, 4100, 4200 and 9300 Series, when deployed as Layer 3, 4, and 7 firewall sensors, use the Cisco Secure Firewall Threat Defense software image. The Cisco Secure Firewall Management Center provides unified management for firewall and dedicated IPS. The on-device Firewall Device Manager is also available with Secure Firewall Threat Defense software. Alternatively, the Cisco Secure Firewall with Adaptive Security Appliance (ASA) software image is also supported on the Cisco Firepower and Secure Firewall platforms. When running the ASA software image, the ADSM on-device manager is available. Cisco Firepower 4100 and 9300 series appliances are also available with the Cisco Secure DDoS Protection. Alternatively, all Secure Firewalls are available with cloud-based Cisco Secure DDoS Protection.

Cisco Firepower 1000 Series Appliances

The Cisco Firepower 1000 Series comprises three threat-focused security appliances. The 1000 Series addresses SMB, Branch/Distributed Enterprise and Internet Edge deployments. The 1000 Series hardware delivers superior threat defense, at fast speeds, with a smaller footprint than their predecessors, the ASA-5506-X, ASA-5508-X and ASA-5516-X. The 1000 Series is now available in ASA and FTD software images.

Cisco Secure Firewall 3100 Series Appliances

The Cisco Secure Firewall 3100 Series comprises four threat-focused security appliances. The 3100 Series addresses emerging hybrid mid-market and high-end use cases from the Internet edge to the data center, providing superior performance at a highly competitive price point and bringing several high-end capabilities to the mid-market.

Cisco Firepower 4100 Series Appliances

The Cisco Firepower 4100 Series comprises four threat-focused security appliances. The 4100 Series addresses use cases from the Internet edge to the data center. The 4100 Series hardware delivers superior threat defense, at faster speeds, with a smaller footprint. Also, the Cisco Firepower 4100 Series enables an upgrade path, on the customer's timeline, to the Cisco Secure Firewall Threat Defense software, even if the customer chooses the ASA image in the immediate term.

Chassis Overview: Cisco Firepower 4100 Series

Cisco Secure Firewall 4200 Series Appliances

The Cisco Secure Firewall 4200 Series is a high-end firewall designed to meet the security requirements of large enterprises, datacenters, and service providers. It is available in three different performance models, offering superior threat defense within a compact 1 RU form factor. Key features and benefits of the appliance include:

- Cryptographic acceleration architecture preserves performance with SSL and VPN decryption.
- Save space and energy with 1RU form factor.
- Future-proof your investment with 16x node cluster.
- Flexibility of 2x interface module bays for additional interface support.
- Customize and future proof investment up to 400G interfaces.
- 2x SSD for event storage and malware analysis.
- Uptime/resilience with dual management interfaces.
- Fail-to-wire network modules, further enhancing its reliability and fault tolerance.

These platforms can be deployed in both firewall and dedicated IPS modes, providing versatile deployment options. For inline sets and passive interfaces, the 4200 Series supports Q-in-Q (stacked VLAN) with the ability to handle up to two 802.1Q headers in a packet.

Cisco Firepower 9300 Series Appliances

The Cisco Firepower 9300 is a modular, scalable, carrier-grade appliance, available in Network Equipment Building System (NEBS) configurations, designed for service providers, data centers, campuses, supercomputing centers, high-frequency trading environments, and other environments requiring both low latency and the greatest throughput. In the service provider context, it is specifically designed for carriers, content providers, and cloud service providers to protect the Cisco Evolved Programmable Network, Cisco Evolved Services platform, and Cisco Application Centric Infrastructure architectures.

(For more information, please see [Cisco service provider security solutions.](#))

Tightly integrating threat-centric security services from Cisco and its partners, the 9300 appliance lowers integration costs and supports the full realization of highly secure, open, and programmable networks. In addition to providing class-leading security services, it offers low (less than 5-microsecond) latency, throughput for single flows exceeding 30 Gbps, and class-leading performance and port density on a per-rack-unit basis.

Chassis Overview: Cisco Firepower 9300

Supervisor module (included): provides overall chassis management and network interaction

- Network interface allocation and security module connectivity (960-Gbps internal fabric)

2 x Network Module bays

- 10, 40, and 100 Gigabit Ethernet network connectivity options

Security Modules: modular computing capability expands as your needs grow. Pictured are the three bays for Security Modules. A minimum of one must be ordered for standard operation.

With three SM-56 Security Modules, Cisco Firepower 9300 features up to 235 Gbps of stateful (ASA) firewalling performance, and 1.2 Tbps of clustered performance with 5 clustered Cisco Firepower 9300 chassis.

Also available: NEBS-compliant modules.

Pictured at right is the rear view of the Cisco Firepower 9300. Note that it is available with dual AC, DC, or HVDC power supplies. Also, the fan assemblies and power supplies are user replaceable.

Reminder: The Cisco Firepower 9300 is available with 10, 40, and 100 Gigabit Ethernet Network Modules.

Special Guidelines for Quoting the Cisco Firepower 9300

Cisco Firepower 9300 ordering is highly customizable, and options are offered separately. You'll nevertheless find the ordering process straightforward.

The following table shows the four core components of a Cisco Firepower 9300 order.

Common hardware is bundled. However, your customer may wish to order extra fans and power supplies with the initial order, as these are hot-swappable, user-replaceable items. Please note that every order will require at least one, and up to three, **Security Modules. Network Modules** are also ordered separately.

Regarding **software licenses**, keep in mind that the Cisco Firepower 9300 runs either the ASA software image or the Cisco Secure Firewall Threat Defense image. Also, please note that the Encryption license is export controlled. It is available for most markets, to customers in countries where U.S. export control permits the export of strong cryptography. For more information, visit [export compliance details](#).

In the **third-party software** category, Cisco Secure DDOS Protection (Radware Virtual DefensePro DDoS-mitigation capability) has been tightly integrated into the Cisco Firepower 9300 and 4100 Series with ASA software, is orderable from and supported directly by Cisco.

ASA Licensing for Cisco Firepower Appliances

The 9300 appliance, 4100 Series, 3100 Series, 4200 Series, and 1000 Series are available with either the Cisco Secure Firewall Threat Defense (FTD) image or the Cisco Adaptive Security Appliance (ASA) image. Cisco Firepower appliances with ASA are available through Smart Licenses. They include a Base license and up to three optional licenses (Encryption, Security Contexts, and Carrier).

Base License (Free)

L-F9K-ASA(=) (for the Cisco Firepower 9300), **L-FPR4100-ASA(=)** (for the Cisco Firepower 4100 Series models), **L-FPR3100-ASA(=)** (for the Cisco Secure Firewall 3100 Series models), or **L-FPR1000-ASA(=)** (for the Cisco Firepower 1000 Series models) and **FPR42xx-BSE** (for the Cisco Secure Firewall 4200 Series models): Licensing on the ASA is simplified for the Cisco Firepower appliances. More than 50 ASA feature licenses are condensed into a single license. This license also includes the following security contexts by default: 10 security contexts for Firepower 9300, 10 security contexts for Firepower 4100 Series, 10 security contexts for Secure Firewall 4200, 2 security contexts for Secure Firewall 3100 Series and 2 security contexts for Firepower 1000 Series.

Encryption License (Free)

L-F9K-ASA-ENCR-K9(=) (for the Cisco Firepower 9300), **L-FPR4K-ENC-K9(=)** (for Cisco Firepower 4100 Series models), **L-FPR3K-ENC-K9(=)** (for Cisco Secure Firewall 3100 Series models) or **L-FPR1K-ENC-K9(=)** (for Cisco Firepower 1000 Series models) and **FPR4200-ENC-K9/ L-FPR4200-ENC-K9=** (for Cisco Secure Firewall 4200 Series models): This license provides for strong encryption (K9) on the platform. The U.S. export of strong cryptography is not available to export-restricted regions. Cisco solutions and products with strong encryption may not be delivered to individuals or entities on the U.S. government's list of denied or restricted parties.

Please review the U.S. Bureau of Industry and Security's list of parties of concern at:

<https://www.bis.doc.gov/index.php/policy-guidance/lists-of-parties-of-concern>.

Additional Security Contexts (Paid)

L-F9K-ASA-SC-10(=) (for the Cisco Firepower 9300), **L-FPR4K-ASASC-10(=)** (for the Cisco Firepower 4100 Series models), **L-FPR3K-ASASC-10(=)** (for the Cisco Secure Firewall 3100 Series models), **FPR4200-ASASC-10/ L-FPR4200-ASASC10=** (for the Cisco Secure Firewall 4200 Series models): This license adds 10 security contexts to an ASA instance on the 9300 appliance, 4100 appliance, 4200 appliance, 3100 appliance respectively.

Carrier License Option (Paid)

L-F9K-ASA-CAR(=) (for the Cisco Firepower 9300) or **L-FPR4K-ASA-CAR=** (for Cisco Firepower 4100 Series models), **FPR42K-ASA-CAR/L-FPR42-ASA-CAR=** (for Cisco Secure Firewall 4200 Series models), or **L-FPR3K-ASA-CAR=** (for Cisco Secure Firewall 3100 Series models): This license covers carrier feature enablement that allows for inspection of Diameter, GTP/GPRS and SCTP protocols

Cisco Secure Firewall Threat Defense Licensing for Cisco Firepower Appliances

Figure 2 provided for general reference only, shows the typical order flow. Start with the primary bundle part numbers and the software image (ASA or Firewall Threat Defense), and then, in the case of the example, associated Cisco Secure Firewall Threat Defense-related licenses and subscriptions for functionality like Security Intelligence and IPS (“T”), Advanced Malware Protection (“M”), and URL Filtering (“C”). This example concludes with ordering the associated virtualized Cisco Secure Firewall Management Center. Note that Cisco Secure Firewall Threat Defense ships standard with the option to activate a 3-month trial license without activation of a Smart License account.

Typical order flow

Ordering Steps for Cisco Firepower 9300, FTD-Based Cisco Firepower 9300

Start with one of the following FTD Bundle SKUs in CCW, example shown above is FPR9K-FTD-BUN.

Select Hardware Options and Quantity.

Chassis Type – AC, DC, or HVDC.

Chassis Options including Netmod, Sup, SFPs, power cables.

Security Module Quantity – up to 3 per chassis.

Select Subscriptions – T=, URL=, AMP=, TC=, TM=, TMC=.

Select Term – 1, 3 or 5 years.

Select Base Software License for each security module.

You can add additional features to the system. For example, starting with FTD release 7.3, you can add Carrier License to Firepower 3100 (**FPR3K-FTD-CAR**), Firepower 4100 (**FPR4K-FTD-CAR**), Firepower 9300 (**FPR9K-FTD-CAR**) and FTD virtual (**FTDV-CAR**) configurations. This license covers inspection of Diameter, GTP/GPRS and SCTP protocols.

Save and exit bundle configuration and select quantity of each bundle configured. Each bundle corresponds to a single-chassis configuration. After saving the configuration, you can change quantity for more than one chassis with the same configuration

Cisco ISE Passive Identity Connector (ISE-PIC)

Due to End-of-Life for the Cisco Firepower User Agent, FTD requires the use of either Cisco Identity Services Engine (ISE) or Cisco ISE Passive Identity Connector (ISE-PIC) in order to control policy based on Active Directory user. This section describes the procedure for ordering Cisco ISE Passive Identity Connector (ISE-PIC). For information on how to order of Cisco Identity Services Engine (ISE) please see the [Cisco ISE Licensing Guide](#).

The Cisco Identity Services Engine (ISE) Passive Identity Connector centralizes, consolidates, and distributes identity information, including IP addresses, MAC addresses, and usernames. It centralizes the authentication information, becoming the single source of truth for its subscribers. Using the Cisco Platform Exchange Grid (pxGrid), the Cisco ISE Passive Identity Connector can support up to 20 subscribers. Further details on the capabilities of the Cisco ISE Passive Identity Connector (ISE-PIC) can be found on the [Cisco ISE Passive Identity Connector Data Sheet](#).

Table 7. Cisco ISE-PIC ordering information

SKU	Description	Services and subscriptions
R-ISE-PIC-VM-K9=	ISE Passive Identity Connector 3,000 session Virtual Machine	CON-ECMU-RISEPIVM
L-ISE-PIC-UPG=	ISE Passive Identity Connector - Upgrade to maximum 300,000 sessions	CON-ECMU-LISEPUPG

Note: You may be entitled to ISE-PIC at no cost if you have a qualifying FMC and valid support contract. For more information see [End-of-Life and End-of-Support for the Cisco Firepower User Agent](#).

Cisco Security Analytics and Logging

This section describes the procedure to enable extended logging and analytics by ordering Cisco Security Analytics and Logging as part of your firewall purchase. The detail ordering process is described [here](#).

The Security Analytics and Logging offer has two distinct delivery mechanisms:

- **Security Analytics and Logging (SaaS):** A cloud-delivered, Software-as-a-Service (SaaS) offering with a Cloud Data Store.
- **Security Analytics and Logging (On prem):** An on-premises appliance-based software application with an On-premises Data Store.

Discounted Bundling When Attaching with Firewall Subscriptions via CCW

- Begin by navigating to the firewall model to be ordered (FPR1150-NGFW-K9, for example).
- Make your software choice under the “Subscriptions” category at the top (wherever present) and navigate to the “Extended Logging and Analytics” category below.
- You are presented with two options to the right: “On-Premises Data Store” or “Cloud Data Store.” Only one option can be selected per firewall being ordered, with either the same or different subscription term as the firewall subscription.
- The “Cloud Data Store” option allows selection of either the Logging License, **SEC-LOG-CL**, or the “Logging Analytics License,” **SEC-ANYL-CL**. Only one option needs be chosen, as the Logging License is nested under Logging Analytics. Both Cloud licenses include access to a Cisco Defense Orchestrator tenant for log viewing only, which can be requisitioned using the link here: <https://www.ciscofeedback.vovici.com/se/6A5348A75C69D114>.
- Choosing either of the two data store options will attach a default logging volume in GB/day for that firewall model, based on expected daily volume per the [Logging Volume Estimator Tool](#). Logging rate comes with a default retention of 90 days rolling storage for Cloud Logging.
- The last three optional licenses are Data Retention extensions, which extend log retention to 1, 2, or 3 years in the cloud.

The screenshot displays the Cisco Commerce Configuration (CCW) interface for the FPR1150-NGFW-K9 firewall model. The interface is divided into several sections:

- Configuration Summary:** Shows the country/region specification (Select Country/Region (Not Required)), category (Subscriptions), and a list of items including FPR1150T-TMC, L-FPR1150T-TMC-3Y, SF-F1K-TD6.6-K9, and FPR1000-ASA. The subtotal is 0.00 and the estimated lead time is 126 days.
- Warnings (2):**
 - Please note that the 3 Year FPR1150-TMC License has been added by default to the configuration. If needed, you may edit the configuration as required. (CE202093)
 - FPR1150-NGFW-K9 quantity 1 requires a minimum quantity of 1 from Power Cables (CE100012)
- Extended Logging and Analytics:** A section with a search bar and a dropdown menu for "On Premise Data Store" and "Cloud Data Store". Below this is a table of selected options:

SKU	Qty	Estimated Lead Time	Unit List Price (USD)
<input type="checkbox"/> SEC-LOG-CL Cloud Logging with 90 days storage - GB/day	16	--	0.00
<input type="checkbox"/> SEC-ANYL-CL Cloud Logging Analytics with 90 days Storage - GB/day	16	--	0.00

<input type="checkbox"/> SEC-CL-DR-2Y Data Retention 2 Year Extension Pack - GB/day	16	--	0.00
<input type="checkbox"/> SEC-CL-DR-3Y Data Retention 3 Year Extension Pack - GB/day	16	--	0.00

- g. If SAL (Op) is desired, the “On-Premises Data Store” tab allows choosing the base Logging and Troubleshooting license, **SEC-LOG-OP**. This license supports remote query by FMC and is hosted on SNA appliance(s), as detailed in section 1.2.2.

The screenshot shows the Cisco Commerce Configuration interface for option selection of FPR1150-NGFW-K9. The interface includes a configuration summary, warnings, and a table for 'On Premise Data Store'.

Configuration Summary:

- Country/Region Specification: Select Country/Region (Not Required)
- Category: Subscriptions, Extended Logging and Analytics, Power Cables, Software Version, Included Items
- Subscriptions:

- Included Items: FPR1000-ASA (Qty: 1, Price: 0.00)
- Subtotal: 0.00
- Estimated Lead Time: 126 days

Warnings (2):

- Please note that the 3 Year FPR1150-TMC License has been added by default to the configuration. If needed, you may edit the configuration as required. (CE202093)
- FPR1150-NGFW-K9 quantity 1 requires a minimum quantity of 1 from Power Cables (CE100012)

On Premise Data Store:

SKU	Qty	Estimated Lead Time	Unit List Price (USD)
SEC-LOG-OP	16	--	0.00

On Prem Logging and Troubleshooting License, GB/day

- h. The process for bundling extended logging and analytics for Firewall FPR9K series devices is different, as the Security Modules (SM) configured as part of order determines the Logging quantity required. The Logging quantities needed are 190, 225 and 257 GBs/day for each SM-40, SM-48 and SM-56 respectively, and this quantity needs to be entered manually for the extended logging and analytics licenses. The system will display a warning of the logging quantities required for each Security Module, as shown below:

The screenshot shows a warning dialog box with the following text:

Warning (1):

- Match "SAL-LOG-OP" quantity for each Security Module selected as per following rule: 190 for each "FPR9K-SM-40", 225 for each "FPR9K-SM-48", 257 for each "FPR9K-SM-56". (CE202343)

Expected Retention Period

The expected retention period for the SAL service under average deployment conditions (see note below table) is as follows:

Table 8. Retention Matrix

Sustained Firewall Events per Second (eps)	Equivalent GB/day	On-premises					Cloud		Direct-to Cloud
		Single node 1TB Storage	Single node 2TB Storage	Single node 4TB Storage	Multinode** Virtual	Multinode HW	Single SEC	MultiSEC

Cisco Secure DDoS Protection (formerly Radware Virtual DefensePro DDoS Mitigation Option)

Overview

Cisco Secure DDoS Protection is provided by Radware Virtual DefensePro (vDP), available and supported directly from Cisco. It is available with the Cisco Firepower 9300 and select Cisco Firepower 4100 Series models running either the ASA or FTD software image. The following table details Firepower model and software image compatibility with Radware vDP.

Table 9. Cisco Secure DDOS Protection (Radware vDP) on Cisco Firepower running either ASA or FTD software image

Firepower Series	ASA Compatibility	FTD Compatibility
9300 Series - All Security Modules	yes	yes
4100 Series - All Models	yes	yes

Performance

The performance figures in the tables below apply to all Cisco Firepower 9300 and 4100 Series model configurations running either the ASA or FTD software image.

Table 10. Key DDoS performance metrics for Cisco Firepower 4100 Series

Parameter	Firepower 4100 Metric
Maximum mitigation capacity/throughput	10 Gbps
Maximum legitimate concurrent sessions	209,000 Connections Per Second (CPS)
Maximum DDoS flood attack prevention rate	1,800,000 Packets Per Second (PPS)

The performance figures in the following table are for Cisco Firepower 9300 with 1 to 3 Security Modules irrespective of Security Module type.

Table 11. Key DDoS performance metrics for Cisco Firepower 9300 with 1, 2, or 3 Security Modules

Parameter	Firepower 9300 with 1 Security Module	Firepower 9300 with 2 Security Modules	Firepower 9300 with 3 Security Modules
Maximum mitigation capacity/throughput	10 Gbps	20 Gbps	30 Gbps
Maximum legitimate concurrent sessions	209,000 Connections Per Second (CPS)	418,000 Connections Per Second (CPS)	627,000 Connections Per Second (CPS)
Maximum DDoS flood attack prevention rate	1,800,000 Packets Per Second (PPS)	3,600,000 Packets Per Second (PPS)	5,400,000 Packets Per Second (PPS)

Capacity vs. Licensing

Performance/Capacity/Throughput is dependent on the number of cores assigned to the vDP virtual device:

- By default, Radware virtual DefensePro (vDP) installs using 6 cores (1 management, 5 software) across each of Cisco Firepower 9300's Security Modules and 4100 Series platforms.
- At install, the number of cores assigned to vDP can be adjusted from 2 to 10 to optimize the throughput performance of Cisco Firepower appliance depending on the customer need.
- While using the default 6 cores, the performance numbers for vDP are constant across platforms. The table below represents the relative performance level expected from ASA and FTD by removing 6 cores from the total available cores on the respective platforms (i.e. 24 cores minus 6 equals 75% of the total performance still available).

Table 12. Expected ASA or FTD image performance with 6 of the available cores assigned to vDP

Cisco Firepower Model	Total vCores	Expected ASA or FTD Performance with vDP Active
Firepower 9300 - SM-56	56	89.3%
Firepower 9300 - SM-48	48	87.5%
Firepower 9300 - SM-40	40	85.0%
Firepower 4145	44	93.2%
Firepower 4125	32	90.6%
Firepower 4115	24	75.0%
Firepower 4112	24	75.0%

Licensing is based on the amount of legitimate traffic, not the capacity of the VM to process information.

- Purchase vDP licenses based on the amount of the client's peak legitimate traffic flow.
- This approach differs from other vendors that charge based on attack volume. Radware licenses are based on **known** legitimate traffic rather than an **unknown** attack volume.

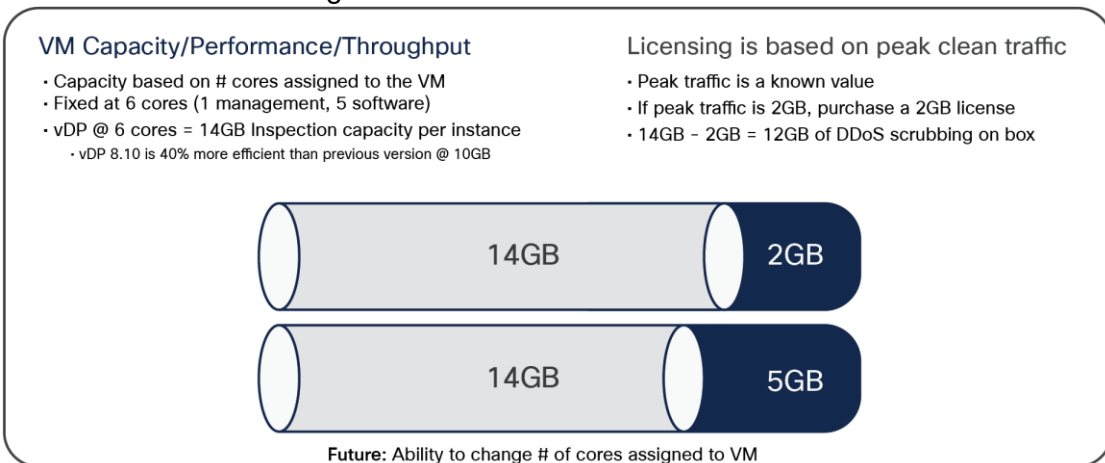

Figure 3.
Capacity vs. licensing

Example 1: Client has a 10-Gbps WAN link with a daily peak traffic flow of 2-Gbps.

- Purchase a 2-Gbps license or higher if the traffic is expected to increase in the near future.
- vDP will be able to mitigate a DDoS attack up to the capacity of the WAN link’s 10-Gbps, after which a cloud scrubbing solution will have to take over at the ISP level.
 - Radware can be set up to automatically notify a cloud scrubber to take over.
 - Radware’s Emergency Response Team (ERT) can assist in configuring vDP for each customer as part of the standard Cisco ECMU support contract for vDP.
 - Radware cloud availability on GPL is on the roadmap.
- **Warning: Do not over-purchase or over-quote the client’s throughput needs. License is based on clean traffic only, not the capacity of the VM.**

The vDP Software Licenses and Support SKUs

The following tables outline the product information and SKUs for ordering. Cisco is only OEMing the Virtual License for Radware Manager Vision. Customers may want additional Manager Options that are provided directly by Radware.

Notes:

- Radware vDP license are based on legitimate traffic. Please refer to this deck for more details: [Cisco Secure DDoS Protection](#)
- L-RDWR-APV-VA includes both APSolute Vision with Security Reporter – 10 vDP
- The CON Service SKUs should automatically be added to the cart with a 12-month term
- Cisco will provide Level 0/1 to determine if problem is Cisco Firepower or vDP. All vDP issues will be escalated to Radware.
- Radware vDP clustering is currently only supported in the Cisco Firepower 9300 intrachassis configuration. This is clustering of multiple security modules (SM-40, SM-48, SM-56) within the same Cisco Firepower 9300 chassis.
- For High Availability (HA), Active-Active and Active-Standby modes are supported.
- Radware Vision Manager is a Virtual License and needs to be installed on its own server, not the Cisco Firepower platform. For version 4.6, VMware ESXi 5.1, 5.5, 6.0, 6.5, 6.7, 6.7U2 or VMware Workstation 8 or 11 are supported. Please check Cisco Secure Firewall Radware DefensePro DDoS Release Notes for details.

Cisco Secure DDOS Protection (Radware vDP) Ordering Steps

Ordering SPARE SKUs for existing equipment:

Spare SKUs are provided (start with “L” and end in “=” sign) to allow you to order the vDP software license for existing equipment. These are the L-FPR-RVDP-10G=. 5G=, and 2G=, respectively.

- Go to the [Cisco Commerce home page](#).
- Create a new estimate or edit an old one.
- In the “Search by SKU” box, paste in one of the SPARE SKUs. Or click on the “Find Products and Solutions” link to the right of the “Search by SKU” box.
- Typing in “Radware” in search box will return all active Radware SPARE SKUs.

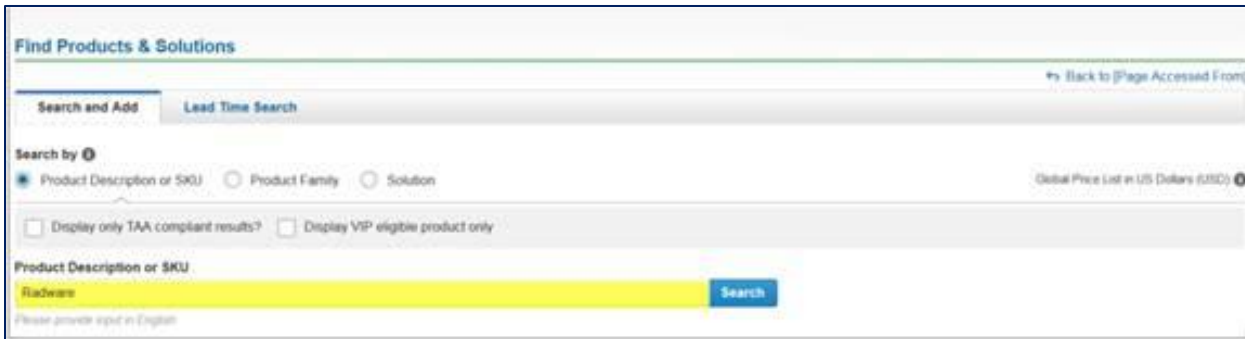

Figure 4.
Find products and solutions

- Once you find the SKU you need, then click the ‘+’ sign to add it to the cart.
- Next click on the “Edit Service/Subscription” link and set the term of the service contract.

Figure 5.
Edit service/subscription

A 12-month (1y) ECME contract is selected by default, but that can be increased up to 60 months (5y).

Note: As of this writing, you have to visit the Edit Service/Subscription link and click done to accept the default 12-month service contract. Otherwise, the cart will produce an error.

If you do not already own Radware Vision Manager, please add to your order SKU: L-RDWR-APV-VA=. This is the Radware Manager Vision and Security Reporter with support for 10 vDP instances.

Secure Workload Ordering Steps in Firewall Bundle

Ordering SPARE SKUs for existing equipment

A Workload SKU is provided to allow you to order workload within a firewall bundle, securing a multi-product discount. The SKU is C1-TAAS-XX-SW-K9 and is available for Firepower 4100 and 9300 bundles.

- Go to the [Cisco Commerce home page](#).
- Select the firewall bundle to be ordered, for example FPR4115-FTD-HA-BUN.
- Click “Select Options” for the bundle to open the configurator.

Hardware, Software and Services	Estimated Lead Time	Unit List Price (USD)	Qty	Unit Net Price (USD)	Discount (%)	Extended Net Price (USD)

When you make your selection, you will see the Service Contract and the Right-to-Use licenses are automatically added to the cart. As with the SPARE license, you can change the length of the service contract by clicking the “Edit Service/Subscription” link. You will find the EMCU contract under the selected Radware SKU.

If you do not already own Radware Vision Manager, please add to your order SKU: L-RDWR-APV-VA=. This is the Radware Manager Vision and Security Reporter with support for 10 vDP instances.

SKUs and Ordering for Cisco Firepower 1000 Series

The following tables outline the product part number information for the Cisco Firepower 1000 Series. Note that the customer may want extra power supplies and fans. You can add these to the order separately. Table 18A and 18B provides the chassis part numbers for chassis running the ASA software and chassis running the Firewall Threat Defense software. Note that software subscriptions can only be added to chassis running the Firewall Threat Defense software. The chassis SKUs are automatically included in the bundle. The bundle also offers the part numbers for network modules, and Table 14 provides part numbers for accessories.

SKUs for 1000 Series Licenses and Subscriptions

When ordering a 1000 Series with the Cisco Secure Firewall Threat Defense image, both licenses and a subscription to optional security services are required. Subscription terms are 1, 3, and 5 years, with the greatest price discount at 5 years. In the listed part numbers, the threat services are identified as follows:

Table 20. Threat Subscription Details

Threat Subscription Abbreviations	Description
T	Threat (Security Intelligence and IPS)
M or AMP*	Malware defense
C or URL*	URL Filtering
1Y	1-Year Subscription
3Y	3-Year Subscription
5Y	5-Year Subscription

*Note that Threat/IPS (T) License is a requirement for the use of Malware (M) or URL (C) license features.

Ordering Example: Cisco Firepower 1010 with FTD

Step 1: Smart Software Licensing

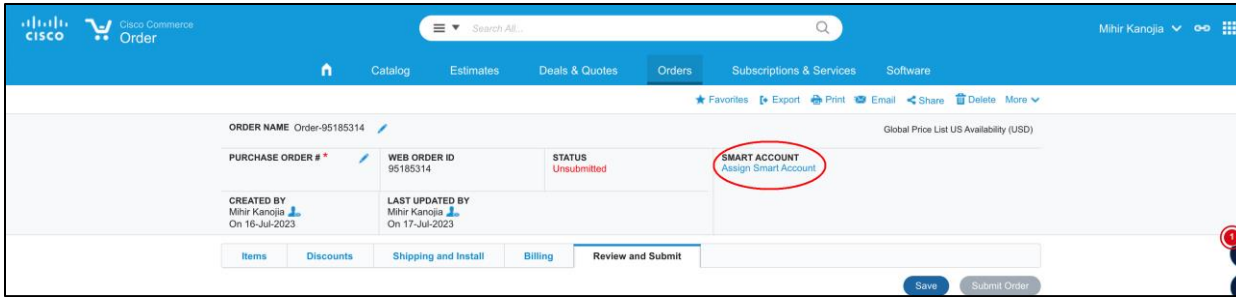

Before placing a Cisco Firepower 1010 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at: <https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

Step 2: Navigate to Catalog -> Products -> Security -> Cisco Firepower 1000 Series. Click on FPR1010-NGFW-K9

The Chassis is added on the cart along with the software subscription. By default the 3 Year FPR1010-TMC license will be added to the configuration.

Product Configuration: FPR1010-NGFW-K9 | Estimated Lead Time: 35 days | Price List: Global Price List US Availability (USD) | Total (USD): 3,443.88

1: Please note that the 3 Year FPR1010-TMC License has been added by default to the configuration. If needed, you may edit the configuration as required. (CE202093)
 2: FPR1010-NGFW-K9 quantity 1 requires a minimum quantity of 1 from [Power Cables \(CE100012\)](#)

Ordering Example: Cisco Secure Firewall 3140 with FTD

Step 1: Smart Software Licensing

Before placing a Cisco Secure Firewall 3100 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at:

<https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

Step 2: Navigate to Products -> Security -> Cisco Secure Firewall 3100 series-> Cisco Secure Firewall 3140 -> FPR3140-NGFW-K9

The screenshot shows the Cisco Commerce Gateway interface. The top navigation bar includes 'Catalog', 'Estimates', 'Deals & Quotes', 'Orders', 'Subscriptions & Services', and 'Software'. The breadcrumb trail is 'Products > Security > Cisco Secure Firewall 3100 Series'. The main content area features a large banner for 'Cisco Secure Firewall 3100 Series' with a bar chart background. Below the banner, there are two tabs: 'Products' and 'Accessories & Spares'. Under 'Products', there are links for 'Cisco Secure Firewall 3105', 'Cisco Secure Firewall 3120', 'Cisco Secure Firewall 3140', 'Cisco Secure Firewall 3110', and 'Cisco Secure Firewall 3130'. A table is partially visible with columns for 'SKU & Description', 'Unit List Price', and 'Qty'. On the right side, there is a 'Related Content' section with the text: 'There are no data sheets or literature available at this time.'

The screenshot shows the product configuration page for 'Cisco Secure Firewall 3140'. It lists several license options with their respective prices and quantities. Each license has an 'Add To Cart' button, except for the main appliance which has a 'Configure' button. The licenses are:

Step 4: After the cable selection is complete. Click on the Network module to add to the configuration.

The screenshot shows a configuration page for product FPR3140-NGFW-K9. The top navigation bar includes Catalog, Estimates, Deals & Quotes, Orders, Subscriptions & Services, and Software. The main header displays Product Configuration (FPR3140-NGFW-K9), Estimated Lead Time (70 days), Price List (Global Price List US Availability (USD)), and Total (USD) (307,187.21). A warning message states: "1: Power Cables and DC Power Supply cannot be selected at the same time. Please adjust the selections. (CE200068)", "2: A selection of SF-F3K-TD7 2.3-K9 OR HIGHER IS REQUIRED is required when Network Module is selected. Please adjust the selections. (CE200440)", and "3: Please note that the 3 Year FPR3140T-TMC License has been added by default to the configuration. If needed, you may edit the configuration as required. (CE202093)".

The Configuration Summary on the left shows a table with columns for Category, Qty, and Extended List Price (USD). The Network Module category is selected, showing 1 unit of FPR3K-XNM-8X10G for 47,309.49. Other categories include Rack Mounting Options (1 unit, 0.00), Cable Management Option, Base License (1 unit, 0.00), and Included Items (2 units, 0.00). The total price is 307,187.21 and the estimated lead time is 70 days.

The Network Module selection table on the right lists several options:

SKU	Qty	Estimated Lead Time (days)	Unit List Price (USD)
FPR3K-XNM-8X10G (Selected)	1	21 days	47,309.49

FPR3K-XNM-8X1GF	1	21 days	23,651.79

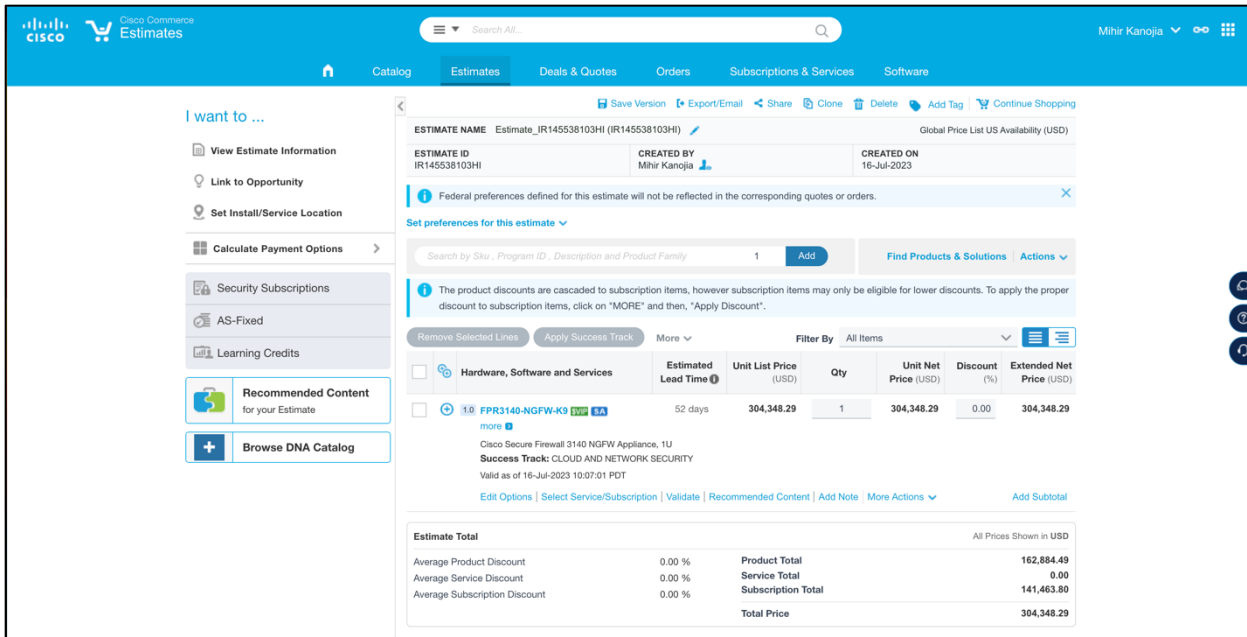

Step 5: Complete the configuration by clicking on done. An alert message appears for the user to confirm the selection.

The screenshot shows the same configuration page as Step 4, but with a "Done Messages" dialog box overlaid. The dialog box contains the following messages:

- Your product configuration has some warnings.
- Click on the "Add/Edit Service" button to select service items.
- Please note that the 3 Year FPR3140T-TMC License has been added by default to the configuration. If needed, you may edit the configuration as required. (CE202093)
- Software Subscription Issues
- Your Software Subscription configuration has some warnings.
- The maximum duration of subscriptions will be automatically applied to the duration of technical services in this configuration. Go to "Edit Service/Subscription" to edit the duration of technical services. (C0970)

The dialog box has three buttons at the bottom: "Return to configuration", "Add/Edit Services", and "Done". The background configuration page shows the total price updated to 304,348.29 and the estimated lead time to 52 days.

Step 6: Product summary page appears with the selected configurations.

Ordering Example: Cisco Firepower 4145 with ASA

Step 1: Smart Software Licensing

Before placing a Cisco Firepower 4100 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at: <https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

Step 2: Navigate to Products -> Security -> Cisco Firepower 4100 Series -> Cisco Firepower 4145 Security Appliance -> FPR4145-ASA-K9

Step 3: Click on the Power cables to make the selection.

The screenshot shows the Cisco Commerce Configuration interface. The top navigation bar includes 'Catalog', 'Estimates', 'Deals & Quotes', 'Orders', 'Subscriptions & Services', and 'Software'. The main content area displays the configuration for 'FPR4145-ASA-K9'. A warning message states: '1: A selection from either DC Power Supply or Power Cables is required. Please adjust the selections. (CE200069)'. Below this, the 'Configuration Summary' table shows the current configuration, including 'DC Power Supply' with a quantity of 2 and an extended list price of 8,506.27. The 'DC Power Supply' table lists the selected item: 'FPR4K-PWR-DC-950' (Firepower 4000 Series 950W DC Power Supply) with a quantity of 2, an estimated lead time of 21 days, and a unit list price of 8,506.27. A 'Show Incompatible SKUs' button is visible below the table.

The screenshot shows the Cisco Commerce Configuration interface with the 'Power Cables' section selected. The 'Configuration Summary' table shows the current configuration, including 'Power Cables' with a quantity of 2 and an extended list price of 0.00. The 'Power Cables' table lists several options, with 'CAB-TA-NA' (North America AC Type A Power Cable) selected. The table includes columns for SKU, Qty, Estimated Lead Time, and Unit List Price. The selected item 'CAB-TA-NA' has a quantity of 2, an estimated lead time of 14 days, and a unit list price of 0.00. Other options include 'CAB-9K10A-AR', 'CAB-9K10A-AU', 'CAB-9K10A-CH', 'CAB-AC-EUR', 'CAB-250V-10A-ID', and 'CAB-250V-10A-IS'.

Step 4: Click on “SFP-Modules – On Chassis ports” to make the selection.

The screenshot shows the Cisco Commerce Configuration interface for product FPR4145-ASA-K9. The configuration summary on the left lists items like DC Power Supply, Power Cables, Platform Software, Supervisor Software, and SFP Modules - On-Chassis Ports. The right pane shows the 'Power Cables' selection table with various SKUs and their quantities.

Ordering Example: Cisco Secure Firewall 4225 with FTD

Step 1: Smart Software Licensing

Before placing a Cisco Secure Firewall 4200 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at:

<https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

SKUs for Cisco Firepower 9300 Series Licenses and Firewall Threat Defense Subscriptions

When ordering a Cisco Firepower 9300 firewall with the ASA configuration, a Standard (base) ASA license (L-F9K-ASA) is required.

Alternatively, when ordering a 9300 Series with the Cisco Secure Firewall Threat Defense image, base AVC capability comes by default with Cisco Secure Firewall Threat Defense license (L-FPR9K-TD-BASE=). Additionally, subscriptions can be purchased (one license per security module) to add IPS, URL Filtering, and malware defense capabilities. Similarly, if the customer already has a Firepower 9300, the same PIDs are used to upgrade to the Cisco Secure Firewall Threat Defense image. Subscription terms are 1, 3, and 5 years, with the greatest price discount at 5 years. In the listed part numbers, the threat services are identified as follows:

Table 47. Threat subscription decoder

Threat Subscription Abbreviations	Description
T	Threat (Security Intelligence and IPS)
M or AMP*	Malware defense
C or URL*	URL Filtering
1Y	1-Year Subscription
3Y	3-Year Subscription
5Y	5-Year Subscription

*Note that Threat/IPS (T) License is a requirement for the use of Malware (M) or URL (C) license features.

Ordering Example: Cisco Firepower 9300 with ASA

Step 1: Smart Software Licensing

Before placing a Cisco Firepower 9300 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at: <https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you are able to complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account, and follow the subsequent prompts for Smart Licensing.

Step 2: Navigate to Catalog > Products > Security > Cisco Firepower 9300 Series -> Search for FPR9KT-HA-BUN. Add the chassis to the cart by clicking add.

The screenshot displays the Cisco Commerce Gateway (CCW) interface for an estimate. The top navigation bar includes links for Catalog, Estimates, Deals & Quotes, Orders, Subscriptions & Services, and Software. The main content area shows the estimate details for Estimate_SO145534335HY (SO145534335HY), created by Mhir Kanojia on 16-Jul-2023. The interface includes a search bar, a table of items, and an estimate total section.

Step 3: Check the box 1.0 FPR9KT-HA-BUN and select Options.

Follow the instructions in the yellow box. First click the hardware and make the selection.

Step 4: Click on Edit Options in the FPR-CH-9300-AC Hardware and select the power cables, supervisor and network modules.

Step 7: Product Configuration Summary.

Example of Cisco Firepower Solution Configurations

Below tables show example configurations for ordering the 9300 appliances. Note that these are high-level overviews and that actual orders will include additional items. Fully populated chassis with three SM-48 Security Modules for maximum I/O capability.

SKUs and Ordering Guidance for Cisco Secure Firewall Threat Defense Virtual

Cisco Secure Firewall Threat Defense Virtual is available where virtualized firewall and IPS capabilities are required, including in public cloud environments. It is the virtualized version of Firewall Threat Defense. It enables consistent security policies to follow workloads across your physical, virtual, and cloud environments, and between clouds. Complexity is further minimized with simple provisioning and a single console, the Firewall Management Center (FMC), which enables threat visibility, and automated defense, across your estate. FMC can manage both physical and virtual devices. See the Firewall Management Center section of this guide for FMC part numbers.

In Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP) and Oracle Cloud Infrastructure (OCI) environments, Cisco Secure Firewall Threat Defense Virtual devices can be managed either by an on-premises FMC, or in the respective public cloud with the virtualized FMC. When deployed in AWS and Microsoft Azure environments, two licensing models are available:

- Bring Your Own License (BYOL), where an existing Threat Defense Virtual license is required.
- Hourly billing (a pay-as-you-go model) available through the AWS interface.

Google Cloud Platform (GCP) and Oracle Cloud Infrastructure (OCI) only support the Bring Your Own License (BYOL) licensing model.

For the supported private cloud platforms and Hyper Converged Infrastructure like Cisco Hyperflex and Nutanix AHV the same licenses can be used in the BYOL model.

Cisco Secure Firewall Threat Defense Virtual enables inter-VM and east-west traffic inspection, as well as at ingress and egress points to the cloud. It is designed to address security concerns in both traditional networks infrastructures and to be optionally inserted into Cisco's Application Centric Infrastructure (ACI) for flexible orchestration.

Firewall Threat Defense Virtual performance tiered Subscriptions

Performance tiered licensing is available starting from Firewall Threat Defense Virtual version 7.0. The new licensing model also includes Base License as a subscription. There are 6 tiers in the new performance tiered licensing model which can be ordered using the following SKU's.

Search for the top level subscription SKU - FTDV-SEC-SUB and "Add"

The screenshot displays the Cisco Commerce Estimator interface. At the top, there are navigation tabs for Catalog, Estimates, Deals & Quotes, Orders, Subscriptions & Services, and Software. The 'Estimates' tab is active. Below the navigation, there are several utility buttons like 'Save Version', 'Export/Email', 'Share', 'Clone', 'Delete', 'Add Tag', and 'Continue Shopping'. The main content area shows an estimate summary with fields for 'ESTIMATE NAME', 'ESTIMATE ID', 'CREATED BY', and 'CREATED ON'. A search bar is present with the text 'Search by SKU, Program ID, Description and Product Family'. Below the search bar, there is a table with columns for 'Hardware, Software and Services', 'Estimated Lead Time', 'Unit List Price (EUR)', 'Qty', 'Unit Net Price (EUR)', 'Discount (%)', and 'Extended Net Price (EUR)'. The table contains one entry for 'FTDV-SEC-SUB' with a quantity of 1 and a price of 0.00. Below the table, there is a summary section titled 'Estimate Total' with a table showing 'Average Product Discount', 'Average Service Discount', 'Average Subscription Discount', 'Product Total', 'Service Total', 'Subscription Total', and 'Total Price', all with values of 0.00. At the bottom, there is a disclaimer: '*This Price Estimate does not constitute an offer by CISCO to sell products, but is instead an invitation to issue a purchase order to CISCO until the valid date specified in this price estimate. Such a purchase order will be subject to Cisco's standard procedures, terms and conditions for the acceptance of purchase orders. This order may be subject to indirect tax (VAT, GST, sales tax or other indirect taxes), duty and freight charges even if not noted on this estimate.*'

SKUs and Ordering Guidance for Cisco Adaptive Security Virtual Appliance (ASAv)

The Cisco ASAv brings the power of ASA to the virtual domain and private cloud environments. It runs the same software as the physical ASA appliance to deliver proven security functionality. You can use ASAv to protect virtual workloads within your data center. Later, you can expand, contract, or shift the location of these workloads over time and can span physical and virtual infrastructures. The Adaptive Security Virtual Appliance runs as a virtual machine inside a hypervisor in a virtual host. Most of the features that are supported on a physical ASA by Cisco software are supported on the virtual appliance as well, except for clustering and multiple contexts. The virtual appliance supports site-to-site VPN, remote-access VPN, and clientless VPN functionalities as supported by physical ASA devices. See the [ASAv data sheet](#) for more details.

ASAv is available in both subscription and perpetual licensing models.

Note: For ASAv, remote-access VPN functionality can be licensed separately as outlined in <https://www.cisco.com/c/en/us/products/collateral/security/anyconnect-secure-mobility-client/guide-c07-732790.html>.

Qualys Connector

The Qualys Connector is a software application that collects Qualys Guard vulnerability report data and sends it to the Cisco Secure Firewall Management Center. The Qualys vulnerability data is then aggregated with Cisco's vulnerability information found in the host map. Customers can choose to use Cisco or Qualys vulnerability data, or both, for Impact Flag calculations and automatic rule recommendations.

Firepower Product Licensing and License Activation

- The customer logs on to <https://cisco.com/go/licensing> and uses the Smart Licensing feature to request a token to be installed in the FMC or FDM. This license is then applied to the Cisco Secure Firewall Management Center that is going to manage the feature or appliance.
- Exception: Cisco Secure Endpoint (formerly AMP for Endpoints) does not require an activation key at this time.

High-Availability Configurations

Type 1: Secure Firewall High-Availability

- If the customer wants high availability for sensors, two appliances are required.
- Appliances must be of the same model and generation.
- Both appliances must be identically licensed and have support.
- Licenses will be applied to the same primary Cisco Secure Firewall Management Center managing the high-availability pair.

Snort Subscriber Rule Set: Subscription Options

Personal: This subscription type is for use in a home network environment. If you'd like to purchase a subscription online using a credit card, you may do so. For a personal subscription, please go to <https://www.snort.org/products> to place an order. It is not available to purchase on Cisco Commerce. As you approach the expiration date, renewal by way of Snort.org is automatic for credit card orders and is part of the license agreement.

Business: This subscription type is for use in businesses, nonprofit organizations, colleges and universities, government agencies, consultancies, and other venues where Snort sensors are in use in a production or lab environment. This subscription type does not include a license to redistribute the Snort Subscriber Rule Set except as described in section 2.1 of the Rule Set license agreement.

If you'd like to purchase a Rule subscription online using a credit card, you may do so. Customers or end users who cannot purchase by credit card are requested to contact a partner or distributor who can purchase on their behalf through Cisco Commerce. If you need assistance with a quote, contact snort-sub@cisco.com. Unlike Snort.org automatic renewals, orders placed in Cisco Commerce require a manual renewal to trigger another subscription. Important: Email address of the recipient of the subscription license needs to be included on the order for electronic delivery.

For more information, visit: <https://www.snort.org/products>.

SKUs and ordering guidance for Cisco Security Manager

Cisco Security Manager provides scalable and centralized operations management for ASA functions, including policy and object management, event management, reporting, and troubleshooting for Cisco ASA firewall functions. The Security Manager can be used to manage:

- Cisco Firepower 1000, 3100 4100, 4200 and 9300 series platforms with ASA software.
- Cisco Secure Firewall ASA Virtual on Private and Public Cloud.
- Cisco Secure Client (formerly AnyConnect Secure Mobility Client).

Security Manager is available in two feature levels: Standard and Professional (Table 64). Enterprise customers with numerous security devices will benefit from Security Manager Professional, and customers with fewer security device deployments will find Security Manager Standard an exceptional value. For small-scale and simple deployments, the Cisco Adaptive Security Device Manager (ASDM) is available to provide on-device, GUI-based firewall network operations management for Cisco ASA deployments.

Note: Modern server hardware is required. Please see the Cisco Security Manager data sheet for more details.

SKUs and ordering guidance for Cisco Secure Firewall Management Center

The **Cisco Secure Firewall Management Center**, available as a physical or virtual appliance, provides unified management of:

- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 1000 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 3100 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 4100 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 4200 Series appliances.
- Cisco Secure Firewall Threat Defense Virtual.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 9300.
- FirePOWER module of Cisco ASA with FirePOWER Services (up until release 7.4).
- Cisco Secure Intrusion Prevention System (IPS) and Cisco Secure Firewall malware defense solutions (up until release 7.0).
- Cisco Secure Firewall Threat Defense for Integrated Services Routers (ISR).

The Firewall Management Center provides a centralized management console and event database repository. It is available in a range of physical appliance models, as a virtual appliance for private and public cloud platforms or a cloud-delivered version that is delivered via the Cisco Defense Orchestrator. One physical or virtual management appliance can manage multiple appliances as long as all the appliances are running the compatible firewall configuration.

The appropriate Firewall Management Center hardware is selected based on the firewall configuration deployed and the number of appliances and events to be monitored. Firewall Management Center 1600, 1700, 2600, 2700, 4600 and 4700 physical appliances or the Firewall Management Center virtual appliance can be used to manage Cisco ASA with Firepower Services and the Firewall Threat Defense (FTD) software image. Cisco Security Manager is required to manage ASA physical or virtual appliance firewall functionality. Cisco Defense Orchestrator delivers the cloud-delivered version of Firewall Management Center and a consistent and simplified cloud-based security policy management for ASA, ASA with FirePOWER Services, and FTD devices. For more details, visit [Cisco Defense Orchestrator \(CDO\)](#) home page. For CDO ordering details, visit the [Guidelines for Quoting Cisco Defense Orchestrator Products](#).

FMC-M5-PS-AC-770W=	Cisco Secure Firepower 770W AC Power Supply for FMC1600, 2600, 4600
UCSC-PSU1-1050W=	Cisco Secure Firepower 1050W Power Supply for FMC1700, 2700, 4700

For new deployments, a compatible Management Center can be ordered with Firepower 3100 Series, 4100 Series, 4200 Series, and Secure Firewall 9300 devices. For small-scale FTD deployments, Firewall Device Manager on-device manager is included (except for CSF 4200).

Note: To manage network operations in large-scale deployments of devices running the ASA software image, using Cisco Security Manager or Cisco Defense Orchestrator is highly recommended.

SKUS and Ordering Guidance for Cisco Secure Firewall Management Center Virtual Appliance

The PAK-enabled, 2- and 10-device Firewall Management Center Virtual Appliances (FMCv) are part of a promotional offer to more cost-effectively manage FirePOWER Services or Firewall Threat Defense on small-scale deployments of low-end ASA-X Series appliances. However, the 2-, 10-, and 25-device FMCv Smart License or PAK SKUs do not have any limitations with respect to which appliances they can manage. For add-on licenses requirement for new devices on your FMCv, it is recommended to migrate to a higher FMCv model that supports additional devices.

Note: FMCv SKUs are not tied to specific Private or Public Cloud platforms. The SKUs listed can be used with any supported Private or Public Cloud Deployment.

Licensing Guidance for Cisco Secure Firewall Management Center

Firewall Management Center physical appliances do not require any separate management licenses. Firewall Management Center virtual appliances require only one of the licenses mentioned in the previous table based on the number of devices being managed. These licenses cannot be combined, for example, entitlement for management of four (4) managed devices, a minimum of one (1) Cisco Secure Firewall Management Center, for 10 devices is required. Use of two (2) Cisco Secure Firewall Management Center, for 2 devices licenses is not compliant for this use-case. Separate to the Firewall Management Center, the managed devices each require classic or Smart subscription feature licenses. Firewall Management Center Virtual Appliance Smart SKUs can manage any device running Firewall Threat Defense software.

IMPORTANT: For version 6.3 and later:

Enablement of strong crypto features (3DES/AES VPN) continues to happen automatically via Smart Licensing for those customers that are not subject to export restrictions or require an export license. However, those customers who are subject to export restrictions or require an export license will be asked to select a \$0 strong crypto enablement key during configuration of any FMC device with version 6.3+.

For those customers who are subject to export restrictions or require an export license that upgrades an existing FMC to version 6.3+, there are spare versions of the PIDs available (those with "=" suffix).

To determine if you are subject to export restrictions or require an export license, customers can log in to CSSM and try to generate an installation token. For those customers that do NOT have export restrictions, this box will be checked by default. If you do NOT see this box or are NOT able to check the box, this means that your account is subject to export restrictions. See image below:

The standalone Cisco Secure Firewall Management Center is optimal for high-availability pairing. For the FMC, a high-availability or redundancy feature helps ensure continuity of operations. The secondary Management Center must be the same model as the primary appliance.

The Cisco Secure Firewall Management Center Virtual Appliance also supports High Availability on some Private and Public Cloud offerings. Use of High Availability for Cisco Secure Firewall Management Center Virtual requires an additional identical license.

Product high-availability configuration:

High availability for the Management Center

- If the customer wants high availability for the Management Center, an additional appliance is required.
- The secondary Management Center must be of the same model and generation as the primary one.
- License keys for all sensors, feature licenses (including Cisco Firepower), and subscriptions managed on the primary Management Center can be duplicated and loaded onto the secondary Management Center using the original activation keys.

High availability for the Management Center Virtual Appliance

- If the customer wants high availability for the Management Center Virtual Appliance, two (2) identical licenses (see Table 67) are required.
- High Availability support is varied across Private and Public Cloud as well as model types, please review the latest guidance provided in the Cisco Secure Firewall Management Center Administration Guide for specific information.
- High availability for the Management Center Virtual Appliance is not supported with the Cisco Secure Firewall Management Center, for 2 devices license.

Connect and protect bundle ordering

Overview

Partners can now order Cisco’s security portfolio tailored for 3 specific customer use cases: Secure Campus, Secure Branch and Secure Hybrid Datacenter. The bundles include products that address the real-world needs of each use case. The bundles are designed to simplify ordering and providing an attractive price-point.

Please contact your partner for eligibility and additional information.

Cisco Commerce

[Cisco Commerce](#) is the primary tool used for ordering Cisco products and new services offered on the Cisco Price List. Three main steps are involved in creating an order: creating a quick quote, converting a quote to an order, and submitting an order.

Cisco Commerce Software Subscriptions and Services (CCW-R) is used to quote, order, and manage your service contracts and software subscriptions. Use [CCW-R](#) to create new or renew Technical Services (TS) and software subscription (Term-and-Content) quotes, submit approved orders, and manage your contracts.

Cisco Capital Financing

The significant benefits offered by the Cisco Firepower 9300 make it the natural choice for service provider security and provisioning. As with any technology investment, the question is whether the new system is affordable. The answer is Cisco Capital financing. We can give customers the financing solution that works best for them. We offer both flexible repayments to help mitigate cash flow issues and operating leases to help negate capital expenditures.

Cisco Capital can help remove or reduce the barriers preventing organizations from obtaining the technology they need. Total solution financing programs help customers and partners:

- Achieve business objectives.
- Accelerate growth.
- Acquire technology to match current strategies and future needs.
- Remain competitive.

Cisco Capital also helps your customers achieve financial goals such as optimizing investment dollars, turning capital expenditures into operating expenses, and managing cash flow. And there's just one predictable payment. Cisco Capital operates in more than 100 countries, so regardless of location, customers and partners have access to a trusted means to secure Cisco products and services.
