

# What's new in the TC21/TC26?

More versatility, more power — still right-priced for small and big business

The TC21/TC26 set the bar for the level of features available in a value-tier device. Now, it's raising that bar even higher with more features, more power and more versatility. There's a faster processor option to maximize application performance. New accessories increase durability and expand use cases. And new software options and Mobility DNA tools increase workflow efficiency and deliver more value from your investment.

## More computing power

Optional 2.2 GHz octa-core processor for maximum application performance and faster load times to improve efficiency throughout the day

## 5 ft./1.5 m drop spec

For more demanding environments, an optional protective boot increases the drop specification to 5 ft./1.5 m to concrete; boot is compatible with existing charging cradles

## Digital wallet support

With support for Apple VAS and Google Smart Tap, the TC21/TC26 can wirelessly read tickets, loyalty cards, gift cards, boarding passes and more stored in Apple or Google wallets on consumer smart phones<sup>1</sup>

## Mobile-driven workstation

Drop the TC21/TC26 into the optional Workstation cradle to connect to a monitor, keyboard, mouse, printer and more; eliminate the need to purchase fixed workstations — lowering your equipment, management and energy costs<sup>2</sup>

## Process automation with OCR Wedge

Effortlessly capture standardized data, such as information on license plates, container labels, serial numbers on parts and more (optional)

## Easy device tracking

Easily track or find lost or missing devices; a full-scale, cloud-based solution that gives teams visibility into device location and status (optional)

## Real-time Wi-Fi analysis

Mobility DNA Wireless Insights makes it easy to monitor, troubleshoot and resolve Wi-Fi connection issues before users are impacted (optional)

## Zebra DNA Cloud

Consolidated interface on the cloud makes it easy to deploy, configure and manage Mobility DNA tools and applications on your devices<sup>3</sup>
