Network Management Card 3

Remote monitoring and visibility across IT infrastructure is mission critical

Running your business without remote monitoring exposes you to unexpected issues and downtime.

The Schneider Electric Network Management Card (NMC) enables essential and secure remote monitoring and management of your critical power and cooling infrastructure.

Connecting your devices will improve the availability, resiliency and efficiency of your power infrastructure systems and the IT workloads they support.

Monitoring and alarming

Wherever-you-go visibility

Preventative management

Ongoing security compliance

Updating your NMC firmware matters

More and more cybersecurity breaches are linked to **neglected firmware.**

Proactive firmware updates help to protect your infrastructure to the highest level of cybersecurity thereby minimizing potential downtime.

80% Enterprises reported an attack on firmware
(Source: Microsoft Security Signals Report 2021)

Our new Secure NMC System will help you:

Reduce exposure to attack – Protect your connected devices with the latest security updates.

Achieve consistent compliance – Protect your business with the only firmware updates independently certified to the highest cybersecurity compliance level (IEC 62443-4-2 certified).

Never become out-of-date – Stay ahead and easily deploy firmware enhancements for security and hardware optimization.

How to Order

Smart-UPS	rPDU	Subscription Term
SWNMC3SU-1Y-DIGI	SWNMC3PDU-1Y-DIGI	1 Year Digital License
SWNMC3SU-3Y-DIGI	SWNMC3PDU-3Y-DIGI	3 Year Digital License
SWNMC3SU-5Y-DIGI	SWNMC3PDU-5Y-DIGI	5 Year Digital License
SWNMC3SU-6Y-DIGI	SWNMC3PDU-6Y-DIGI	6 Year Digital License

*The Secure NMC subscription is included automatically with **EcoStruxure™ IT** Expert and Data Center Expert purchases.

Delivery

Expect an email with license activation instructions sent to the **Installer Email** contact from **Purchase Order.**
