

A New Standard for Server Grade Systems

Titan Series cases are designed to meet the needs of today's server and workstation markets. Front accessible HDD installation is one feature that makes it easy to build and upgrade the system. The front double-hinged door opens up to 270 degrees to make accessing external drives a breeze. Titan's extra deep chassis creates better airflow and accomodates dual Xeon and Opteron based systems. The power supply is the potent and stable TruePower Trio 650 Watt. All of these features and more make the Titan an ideal case for professional system builders and power users.
