

Flash Voyager

Durable

Water Resistant

Drop-Tested

Durable, Water Resistant, Drop-Tested

The Corsair Flash Voyager USB drive is rugged, stylish, compact, and reliable, making it ideal for transporting MP3s, digital images, presentations and more. Flash Voyager drives are fully Plug and Play with most operating systems and are backwards compatible with USB 1.1.

The Flash Voyager is enclosed in a Corsair proprietary all-rubber housing. Boasting water-resistant properties, this drive allows users to carry more valuable data and applications without compromise.

Reviews of the Flash Voyager have it shown laundered, baked, frozen, boiled, dropped, and even run over by a SUV. After all the punishment it receives, the drive continues to work.

Features:

- Plug & Play functionality in Windows® Vista, XP, 2000, ME, Linux 2.4 and later, Mac OS 9, X and later
- Lanyard and USB cable
- Limited 10-year warranty

HOW MUCH DATA CAN I STORE?

FORMAT	4GB	8GB	16GB	32GB	64GB
