

Film Scanning

35mm Film

Scan all your analogue film for reprinting or archival purposes. Certain models can scan 35mm filmstrip and mounted slides – either positive or negative – in a single operation. The CanoScan 9000F also supports 120 format film (max. 6x 22cm).

Medium Format

Film Automatic Retouching & Enhancement

Technology that uses a dedicated infrared light within the scanner enabling automatic dust & scratch removal and fading, grain & backlight correction.

SilverFast SE

SilverFast SE

SilverFast SE provides enhanced scanning

functionality, intelligent automatic operations and highly controllable colour from preview. This gives you more power to control the scanning process, reducing the requirement for post-scan image corrections and enhancing creative options for the demanding photo professional.

Adobe® Photoshop® Elements 8

Adobe® Photoshop® Elements 8 software combines power and simplicity so you can make your

photos look extraordinary, share your life stories in unique print creations and web experiences, and easily manage and protect all your photos and video clips.

simplicity.

Compact photo and
document scanners.

you can

USB Powered

USB Powered

A separate bulky power adapter is not required since the scanner is powered directly from the USB port. This cuts down on wires and clutter and means the scanner can be used as a mobile scanning solution with a laptop.

EZ Buttons

EZ Buttons

Instant and easy access to various features by simply pressing a corresponding button.

Auto Document Fix

Auto Document Fix delivers beautiful and easy-to-view scan results by advanced image analysis and area-by-area data correction automatically.

When the user activates the 'Recommended Correction' in Auto Scan Mode the perfect correction is applied depending on the type of original.
