

### LV-8300

- Native WXGA Resolution (1280 x 800 pixels)
- 3000 Lumens
- Short Focal Length 1.2x Zoom Lens
- 29dB Quiet Mode
- 5 Customizable Projection Modes
- Built-in 7W Speaker
- DVI-H Terminal with HDCP Compatibility

### GET YOUR POINT ACROSS WITH WXGA RESOLUTION

With its ability to produce highly detailed graphics and sharp, crisp text, your audience will undoubtedly be impressed by the LV-8300's superb WXGA display resolution. Delivering 1280 x 800 pixels of sharpness and superior clarity, it's perfect for presentations incorporating high-quality visuals and finely rendered text.

### LV-7375

3500 Lumens

- XGA Resolution (1024 x 768 pixels)
- Short Focal Length 1.2x Zoom Lens

### LV-7370

3000 Lumens

- 29dB Quiet Mode
- 5 Customizable Projection Modes

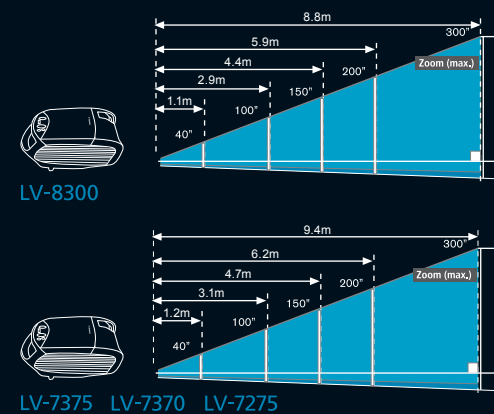

### LV-7275

2600 Lumens

- Built-in 7W Speaker
- DVI-H Terminal with HDCP Compatibility

	LV-7375	LV-7370	LV-7275	LV-8300
LCD Panel	0.63inch (4:3 aspect ratio)			0.59inch (16:10 aspect ratio)
Resolution	1024 x 768, XGA			1280 x 800, WXGA
Lamp Brightness	3500 lm	3000 lm	2600 lm	3000 lm
Contrast Ratio	500:1			
Lens F Number and Focal Length	F1.7 - 2.0, f=19.8 - 23.7mm			F1.7 - 1.9, f=17.7 - 21.2mm
Zoom	1 - 1.2x, non-powered			
Projection Distance	0.8 - 11.3m			0.7 - 10.7m
Screen Size (Diagonal)	21 - 300inch (53.34 - 762cm)			
Key Correction	±30 degrees, vertical (Auto Keystone)			
Noise (Normal / Quiet)	35 / 29dB			
Lamp	230W	210W	230W	
Input	DVI-I, RGB (IN), Component, S-Video, Composite Video, L/R Audio, Stereo Mini Audio, RS-232 Service Port, LAN Port			
Output	RGB (OUT), Stereo Mini Audio			
Built-in Speaker	7W Monaural Speaker			
Dimensions (W x D x H)	317 x 336 x 111mm			
Weight	3.3kg			

#### OPTIONAL ACCESSORIES POSITIONING THE PROJECTORS

- Replacement Lamp (LV-LP31)
- Component Cable (LV-CA32)
- RS-232 Cable
- Ceiling Attachment (LV-CL15)
- DVI Cable (LV-CA29)
- Quick Start Guide
- User's Manual (CD-ROM)
- Warranty
- Remote Control Unit (Batteries included)
- Lens Cover
- VGA Cable
- DVI to VGA Adapter
- AC Power Cord
- Soft Carrying Case

#### KIT CONTENT

#### TERMINALS

- S-Video** (DVD Player / Digital Camcorder)
- Analog RGB** (Computer / Component Video)
- RCA (Composite) Video** (DVD Player / Digital Camera / Digital Camcorder)
- DVI-I (RGB)** (HD DVD Player / Blu-Ray Disc Player etc)

#### Characteristics of DLP and LCD

DLP	LCD
<ul style="list-style-type: none"> <li>• Strong contrast ratios</li> <li>• Small and compact; easy to carry</li> <li>• Only white colors are very bright</li> </ul>	<ul style="list-style-type: none"> <li>• Greater light output (lumens) for brighter images</li> <li>• Better color reproduction</li> <li>• Ideal for office presentations</li> </ul>

# ILLUMINATE YOUR BUSINESS LV PROJECTOR

## GET THE PROFESSIONAL

### OPTIMAL PROJECTION IN ANY VENUE

A versatile 1.2x Canon optical zoom lens makes it easy to get large projections even in rooms with limited space. The LV-8300 can deliver a huge 80-inch image at a mere distance of 2.3m, while the LV-7375, LV-7370 and LV-7275 does the same at 2.5m.

## EDGE WITH LV PROJECTORS

### STYLISHLY FUNCTIONAL DESIGN

A handle incorporated into the body makes it easy to transport the projector to wherever it needs to be. Audio can be played from a powerful 7W built-in speaker, while a newly designed lens cover prevents dust from entering the lens and zoom mechanism.

### EASY MAINTENANCE

Replacing worn-out lamps is a breeze with an easy-to-open design. Simply pop open the top panel and you'll have access to the lamp fixture instantly. In-built replacement counters also remind you whenever lamps and filters need to be changed.

## VERSATILE IMAGING FOR ANY PRESENTATION

### PROJECTION MODES TO SUIT YOUR CONTENT

Choose from five projection modes, each optimized for different types of content, to help you deliver presentations with more visual impact. These modes can also be further customized for users with more specific requirements.

**STANDARD**  
High-quality and accurate color reproduction, suitable for most content

**PRESENTATION**  
Bright and high-contrast display, recommended for slide presentations

**CINEMA**  
For high-quality video content such as HD or DVD movies

**VIDEO**  
For standard video content such as TV broadcast

**sRGB**  
For accurate color reproduction with devices using the sRGB color space (e.g. digital cameras)

## YOUR PRESENTATION DESERVES ONE

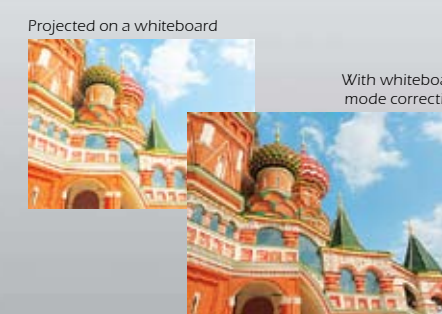

With over 70 years of expertise in imaging technologies, you can be sure that Canon knows how to make outstanding projectors. The latest range of LV Projectors is a testament to this. By combining impeccable imaging performance and user-friendly operation, LV Projectors bring out the best from any presentation. Clearly, it's what your business needs.

### PRECISE COLOR MANAGEMENT

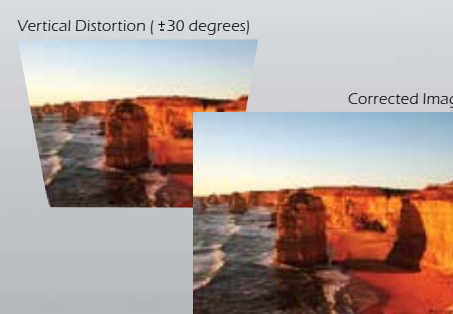

For presentations that demand high color precision, the image settings can be manually fine-tuned to obtain the precise color and tones you desire. Options include individual color levels and color balance, as well as brightness, contrast, and sharpness.

### SCREEN COLOR CORRECTION

This feature helps images appear closer to how they were intended to look when projecting on colored surfaces. Nine screen color options are available for selection. Also included is a new whiteboard mode that eliminates hotspots when projecting images onto a whiteboard.

### KEystone CORRECTION

With the Keystone Correction feature, it is possible to get perfectly squared images even when the projector is facing the screen at an angle. Built-in sensors can detect the projector tilt and automatically correct any vertical distortion of the image. Manual correction can also be performed via the on-screen menu.

### ASPECT RATIO SELECTION

A wide range of aspect ratios is supported to ensure your presentations are displayed exactly as intended.

**AUTO**  
Automatically adjusts the aspect ratio to 16:9, 15:9, or 16:10 to fit widescreen displays.

**WIDE ZOOM (LV-7375/ LV-7370/ LV-7275)**

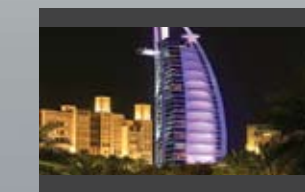

The image is stretched left and right. Parts of the displayed image are cropped at the left and right edges and are therefore not visible.

**TRUE SIZE**  
Adjust the aspect ratio to best fit the screen with minimal image distortion.

**LETTERBOX (LV-8300)**

Best for movies or video content with 16:9 aspect ratio.

### ADDITIONAL FEATURES

**SUPERB CONNECTIVITY**  
LV projectors are compatible with an extensive range of imaging devices – including computers, DVD players, digital cameras and camcorders, VCRs and more. A LAN interface also allows the projector to be remotely control in a networked environment.

**POWER MANAGEMENT**  
To save energy, the projector can be set to automatically turn itself off after 5, 10, 20 or 30 minutes of inactivity. A timer function is also available to power down the projector after a preset time has elapsed.

**ULTRA SILENT OPERATION**  
Even when in use, LV projectors operate at a near silent 29dB – quieter than an empty office – so you can carry out your presentation without any distracting noise from the projector.

**AUTO PC**  
The Auto PC function automatically configures the projector to suit the computer screen's pixel configuration.

**DIRECT POWER ON**  
When activated, the unit will automatically turn on when the power cord is plugged into an outlet, or when a computer signal from a connected computer is sent.
