

# CLEARSTREAM™ ANTENNAS

## CLEARSTREAM™ MICRON XG

The ClearStream™ Micron XG antenna advanced design is perfect for urban areas within 35 miles of broadcast towers. The heightened gain performance of the ClearStream™ Micron XG is achieved with the reflector and the in-line amplifier system and delivers TV signals from widely spaced broadcast towers.

It utilizes the patented ClearStream™ Tapered Loop Technology, which delivers the first new and superior antenna design. The advanced technology allows the ClearStream™ line of antennas to be smaller and more powerful across today's DTV spectrum.

In a compact 11" x 10" form, the ClearStream™ Micron XG is the first broad spectrum antenna without the performance compromises typically seen in the outdated designs of legacy antennas. The sleek, compact design blends with your home decor. ClearStream™ antennas are engineered for strength and durability. The Antennas Direct Lifetime Warranty assures you of its superior build quality. The ClearStream™ Micron XG comes with 6 ft. of coaxial cable, a set of base stands, and an in-line amplifier kit.
