Communications Excellence for Small Business

XBLUE Networks

At XBLUE Networks we concentrate on one absolute goal; providing outstanding, unparalleled value to small business.

Designed and engineered with the latest technology, the X-50 VoIP communication system delivers a powerful new level of sophistication and efficiency to allow you to communicate more effectively than ever before.

And, by using these advancements in VoIP technology, we can provide you the best communications solutions for your office at the most economical cost.

The **X-50** can use either traditional phone lines or new low cost VoIP phone lines.

Comes up fully operational—Can be making calls in minutes!

Quick and Easy to install and use—Plus easy web based programming.

The X-50 is also an 802.11n Wireless Router.

Off-site system telephones for seamless home office or remote worker

Optional 24 button modular telephone side-car.

The XBLUE WiFi Adapter provides complete wireless installation and operation of the X-2020 telephone. Simply connect the XBLUE WiFi Adapter to your X-2020 telephone and it will automatically sync with the X-50 Server. Absolutely, no telephone or data wiring is needed!

For wireless installation of a remote X-2020 telephone the XBLUE WiFi Adapter can also easily be programmed to connect to an existing wireless router making installing a remote worker's phone a breeze.

Every telephone is an exceptional quality speakerphone and provides an easy to read 6-line interactive LCD Display.

Use LCD interactive buttons, to review Call Log information and use Personal Phonebook.

And, to make the telephone the easiest to use in the industry, the helpful navigation keys let you scroll through and easily access the abundant feature offering.

Because Voicemail is a standard feature of the X-50 voice messages can be copied and sent to your email. Then listen to voice mail messages and read email all from one unified spot, your email inbox or your smart phone!
