

**FULL HD  
1080P**

# LIVE GAMER PORTABLE

## **SMART & SHARP, YOUR ALL-PURPOSE SHARING WEAPON**

Live Gamer Portable is a USB box that captures and streams your gameplay up to 1080p. Designed specifically for game lovers, this pocket-size capture device comes with on-board H.264 hardware encoder, which guarantees lower CPU usage and smaller file size even for full HD footages, not to mention the file format is extremely easy to work with for post-editing and uploading. Live Gamer Portable adopts HDMI and component connections as well as supports a wide range of resolutions, which make it applicable for both console and gaming PC. The HDMI pass-through function guarantees smooth HD gaming experience even while recording. On top of that, it can be directly connected to streaming platforms; you can even add live commentary when streaming up. From now on, sharing your legendary matches is no longer a dream.

## Features

### Hardware Compression

With the advanced H.264 hardware encoding technology, Live Gamer Portable takes care of the HD video processing and avoids CPU overload. The hardware encoder also guarantees stable frame rates when you game, record or even stream. That is, the Live Gamer Portable certainly fulfills your desire to have smooth gaming and viewing experiences without frame dropping or choppy games.

### Intuitive Software - RECentral

AVerMedia's exclusive RECentral software provides intuitive settings for live streaming and quick connection to popular streaming platforms. It is capable of broadcasting live gameplay and commentary to TwitchTV and Ustream directly with your own account. On the top of this, it provides TimeShift function, which allows you easily jump back to any footage where you want to start recording.

### User Friendly Hot Button & LED Indicator

The on-board hot button and LED indicator of Live Gamer Portable bring gamers the most convenient user experience. With just one press on the Hot Button, the recording or streaming starts in no time. As for LED indicators, the color of illumination and the lighting frequency help you know the working status with a single glance. Preserving and sharing your gameplay with Live Gamer Portable cannot be easier.

### Fully Compatible with XSplit

For those looking for advanced streaming functionalities, Live Gamer Portable is fully compatible with XSplit Broadcaster! Besides direct streaming and intuitive overlay editing, XSplit Broadcaster lets you add different types of media to the stream, such like webcam, graphics and other video inputs. You can even customize scenes to meet different streaming purposes.

## PC-Free Mode

The Live Gamer Portable provides the option of PC-free mode, allowing you to record the gameplay up to 720p without a PC. Just flip the mode switch, insert a SD card, and you are ready to go! Under PC-free mode, Live Gamer Portable can be powered by your game platform via USB, with no additional power outlet needed. No matter you are PC or console gamers, Live Gamer Portable sets you free from any possible hindrances when you game on the go!
