

CLEARSTREAM™ ANTENNAS

CLEARSTREAM™ 4

The ClearStream™ 4 extreme range antenna offers the power and efficiency normally found in antennas up to 10 times its size. It utilizes the patented ClearStream™ Tapered Loop Technology which has delivered the first new and superior antenna design to the market in decades.

This advanced technology allows the ClearStream™ line of antennas to be smaller and more powerful across today's DTV spectrum. Using anodized aluminum, ClearStream™ antennas are engineered for strength and durability.

At a compact 20" x 28" form, the ClearStream™ 4 is the first broad spectrum antenna without the performance compromises typically seen in outdated designs of legacy antennas. The ClearStream™ 4 Quad-Loop design receives all UHF channels available with a 65+ mile range and a beam width of 43 degrees. With its high efficiency balun, the ClearStream™ 4 delivers an impressive 98% of signal reception to the digital tuner rather than being lost through impedance mismatches and phase cancellation. The ClearStream™ 4 is ideal for rural installations or suburban areas where heavy foliage or roofing materials reduce incoming signal strength. No other antenna exists in the marketplace will match its power in such a compact form. The Antennas Direct Lifetime Warranty assures you of its superior build quality and durability.

CLEARSTREAM™ 4

- SKU# - C4
- Description - Clearstream™ 4 Extreme Range Indoor/Outdoor DTV Antenna
- Range: 65+ miles
- Beam width: (HorizontalPlane) 470 to 700 MHz: 43 degrees
- Gain: Max 12.25 dBi
- VSWR: 2.1 or better
- Front to back ratio: Max 17 dB
- Size assembled 20"L x 12.5"W x 6"D
- Lifetime Warranty
- MSRP - \$149.99
