FULL HD 1080P

# EXTREMECAP U3

Capture Uncompressed HD Video up to 1080p 60fps

1080p 60fps Video Capture	USB 3.0 for Uncompressed Video	Compatible with Popular Video Software

ExtremeCap U3 is a USB 3.0 capture box that allows you to capture, record and stream stunning 1080p 60fps video via HDMI and component inputs from HD camcorders, set-top boxes, and any HD video sources. It is capable of transmitting uncompressed 1080p 60 fps video; preserving the smooth of video; twice the amount of frame for video editing comparing to 1080p 30fps. The USB 3.0 Diagnosis Tool is included to ensure the hardware compatibility.
With the bundled software, RECentral, users can record and stream video footages with customizable settings. In terms of software compatibility , the ExtremeCap U3 works perfectly with DirectShow compliant software such as XSplit, Wirecast, Adobe Premiere Pro CS, Sony Vegas, VLC media player, PotPlayer, and so forth.

Software

RECentral

RECentral provides intuitive settings for recording and streaming video up to 1080p 60fps.It also provides quick accessibility to popular streaming platforms such as Justin. tv and Ustream. Furthermore, you can record your voice commentary along with the footages tomake your video more impressive.

Adobe Premiere Pro CS6 & Sony Vegas Plug-ins

Edit uncompressed HD footage with the software you love. The Adobe Premier Pro CS6 and Sony Vegas plug-ins provide smarter operating flow. No more time wasting on moving HD projects back and forth.

AVerMedia USB 3.0 Diagnosis Tool

The AVerMedia USB 3.0 Diagnosis Tool is included for testing the performance of the connected USB 3.0 port. It lets you know whether or not the USB 3.0 port on your desktop or laptop is capable of transmitting 1080p 60fps uncompressed video. The tool provides an option to downscale the video frame rate while the performance of the USB 3.0 port is insufficient.

Specification

Input Signal
· HDMI
· Component
Recording Format
· MP4 (H.264, AAC)

Package Include

· ExtremeCap U3 (Weight: 182g)
· USB 3.0 cable
· Component Video / Stereo Audio
· Quick Installation Guide

System Requirement

· For HD 1080p 60fps Video Preview (H.264)	· For HD 1080p 60fps Video Recording (H.264)
- Intel® Core™ i5-3400 Series with Ivy bridge platform	- Please check compatibility info. on AVerMedia website
and 4G RAM	· VGA Card with Support for DirectX 10.C or above
· For HD 720p 60fps Video Recording (H.264)	· Windows 8 (32/64 bit) / 7 (32/64 bit)
- Intel® Core™ i3-3200 Series with Ivy bridge platform	· USB 3.0 Interface (Verified chipset:
and 4G RAM	Intel Native, Renesas, Fresco)
