

HSM® Cutline T-Series Rotary Trimmers

HSM T3310 / T4610

All rotary blades of the rotary trimmer series are made of hardened steel which are self-sharpening with every cut. The rotary trimmers cut film and other flexible material to the favored size due to the maximum cut length of 17.95". The automatic, integrated clamping at the cutting edge avoids the dislocation of paper, photos or film.

The benefits of the rotary trimmer of HSM:

- Easy to handle rotary trimmer with hand guard
- Precise cut due to solid cutting blade bracket
- Self-sharpening round blade made of hardened steel
- Automatic, integrated clamping at the cutting edge
- Handle ergonomically designed for optimal force distribution
- Solid base plate with scaling in cm/inch, angles and conventional/special formats

Product-number	Model	Max. paper format	Cutting capacity in sheet	Cutting length in inches	Dimensions (WxDxH) in inches
1000901	T3310	A4	10	12.99"	20.9" x 9.17" x 3.74"
1000902	T4610	A4	10	17.99"	26.1" x 9.45" x 3.8"

All technical specifications are approximate values. Technical and design modifications reserved.
