

visioneer® **MOBILE ORGANIZER**

Everything you need to keep your life in order
no matter where your travels take you.

Scan receipts, business cards, documents, and handwritten notes.

Organize your documents and leave the paper behind.

Share your scans and information via searchable PDF files.

USB Powered:
No AC power connection needed to scan.

The only difference between working at your desk and working on the road should be the view.

Why wait until you get back to the office to organize that stack of paper in your briefcase? After all, it's not the paper you want to keep; it's the information on the paper that is important. The Visioneer® Mobile Organizer includes everything you need to scan, organize and share the paper that you collect while out of the office.

More than just a document scanner, the Mobile Organizer doesn't just help clean your paper clutter; it will *organize* it wherever you are! Once all of your papers are scanned and organized, you can easily send them and share the valuable information they contain with your team, clients or headquarters.

Never worry about losing that prospect's business card or that cab receipt again.

The Mobile Organizer dutifully digitizes and organizes documents as you roam. It can scan contracts, receipts, business cards, invoices, magazine articles, documents and photos. It is small enough to fit in any laptop

bag and best of all, it's powered through a USB port, so that's one less cable to drag around. If you have ever had to go searching for a wall outlet in the airport, you know how important this feature is!

The Visioneer Mobile Organizer starts with a small portable scanner that weighs barely more than a 12 oz. bottle of water with dimensions similar to a rolled up magazine. Using Visioneer's most advanced OneTouch scanning technology, the Mobile Organizer can scan any small receipt, ID cards or document up to 8½" x 14" long. It produces clear and sharp scans in color or black and white. This small, lightweight device is an essential piece of business gear for any traveler and it will save you from having to wait in line at the hotel business center.

Worried that your highlighted notes from the meeting won't scan clearly? What about the receipt that was folded in your pocket? Real world documents are never a problem for the Mobile Organizer. Visioneer Acuity image enhancement technology enables the scanner to instantly improve the visual clarity of every scanned image. You get perfect scans from imperfect originals.

Quickly turn that mess of documents, receipts, notes and business cards in your briefcase into organized searchable data in your laptop.

visioneer. MOBILE ORGANIZER

But having a scanner alone is not a system for managing paper.

So we've included several tools to help you realize your goal of mastering the paper that seems to complicate your life and work.

- Software to organize scanned images, create PDF files, edit them, and automatically convert documents into files that are text-searchable.
- Cloud Service to avoid file loss with continuous cloud back up, and retrieval from any computer.
- Tools to share documents faster and more securely than mail or fax.
- eBook "Creating the Nearly Paperless Office" that explains in plain-English how to better capture, access and share your paper documents as digital files like an expert.

We all could use an expert to coach us through scanning, going digital and living practically paperless.

Many times we sort through papers trying to organize them, when we should be purging them! The included eBook is your mentor in getting to this new organized world. Deal with new papers first, no matter how high the old piles are, begin by devising a system for the new arrivals. Make a plan, decide what to do with incoming papers and stick to it. But whatever you do, don't toss it into a pile! Once papers are scanned, any file can be found instantly with your smartphone, tablet or PC.

An organizing system only works if you use it.

A digital filing system is only effective if you can find everything you need, when you need it. The Mobile Organizer turns your paper documents into searchable PDF files so their information can be shared with anyone and quickly found later when it is needed. Finding one document in five is not hard, but one in 500 or 5,000 can take hours. Searching scanned documents by their content is much easier and faster than sorting through that stack of crumpled papers in the bottom of your briefcase!

So, what are you waiting for? This is one travel companion that you want sitting next to you. And it will never ask to share your snack while you're inflight.
