

MHL HDTV Cable

Micro-USB 11-pin to HDMI, with USB type-A power

Part No.: **151511**

Mobile High-Definition Link (MHL) allows tablets and smartphones to transmit digital audio and video signals via their Micro-USB connector to be viewed on an HDTV.

The Manhattan MHL HDTV Cable enables you to connect an 11-pin MHL-enabled smartphone or tablet (Samsung Galaxy S3, S4, S5, Mega, Note 2, Note 3 and future 11-pin MHL devices) to an HDTV, monitor or projector through an HDMI connection. It delivers crystal-clear video up to 1080p resolution and eight-channel digital audio for optimal multimedia enjoyment, and has an additional USB connector to simultaneously power and charge your connected mobile device.*

To use, simply plug the standard USB connector on the MHL HDTV Cable into a USB wall charger, then connect it to a power source.

Next, connect the HDMI input of the MHL HDTV Cable to your HDTV, monitor or projector. Finally, plug the Micro-USB input into your smartphone or tablet and enjoy.

Not sure if your smartphone supports MHL technology? Follow this link to see for yourself: <http://meetmhl.com/DolHaveMhl.aspx>.

* Battery drain may be greater than the charging rate in some devices.

Features:

- Works with 11-pin MHL devices (Samsung Galaxy S5, S4, S3, Note 2, Tab 3, Mega or newer)
- Display your MHL device content on an HDTV, monitor or projector
- Supports video up to 1080p with eight-channel, 7.1 surround sound
- Integrated USB charging cable (0.76 m / 2.5 ft.)
- No special viewing app required; plug and play
- Three-Year Warranty
