Assurance & Security– on the go

WITH THE ON-Q INDOOR IR HD DESK/WALL MOUNT IP CAMERA

The customers' home is their castle. Help them feel safe and comfortable, with around the clock viewing access to every corner of their home.

Helping customers keep an eye on the house – from anywhere and at any time –the CM7100 features high-resolution images, with visibility even in total darkness, and easy access through real-time viewing from computers or mobile device,

as well as email notifications, all for monitoring the home even remotely.

And when integrating with the On-Q Intuity automation system, the CM7100 is also accessible through the in-wall Intuity Command Center and Intuity mobile app – allowing you to view the camera's live feed from the same intuitive interface used to control all a home's technologies.

FEATURES:
- Provides smooth, 720P hi-def imaging at 30 frames per second (FPS)
- Features IR operation for 24/7 protection, even in total darkness
- Offers monitoring through any Android or iOS device
- Flexibly installs on-wall using unique On-Q wall plate and POE, or on any flat surface with desktop stand for use with WiFi and included power supply
- ONVIF compliant for viewing on compatible monitoring software
- Supports SIP/VOIP for two-way audio using the built-in microphone and speaker
- Integrates with the Intuity automation system for superior and unified home control of lights, security, audio, comfort, and more

BENEFITS:
Doesn't miss a thing – With its high-definition recording, even in total darkness, the CM7100 ensures you can see it all when it comes to your home's security.

Peace of mind, always available – Maintain your sense of security on the go, thwith easy viewing, accessible 24/7, from Apple and Android mobile devices.

Personalized notification – The CM7100 also allows for customized email alerts and recording, as well as establish masked off areas to limit false alarms, matching you and your home's specific security needs.
