

Headphone Splitter

Stereo Y, 3.5mm male to 2 x 3.5mm female, with independent volume control, Black, 30 cm (12 in.)

Part No.: **393980**

High-quality connections with individual control.

The Manhattan Stereo Headphone Splitter with Volume Control splits audio output and allows for more creative configurations and lengths to connect many popular audio components for crisp, clear, error-free transmissions to your mobile media device. With individual volume control, both users can enjoy the entertainment at whatever volume is comfortable to them. Carefully engineered and constructed of quality materials, including molded boots with strain relief, the Manhattan Stereo Headphone Splitter with Volume Control helps ensure maximum conductivity, minimal degradation and the highest performance from connected mobile devices.

Features:

- 3.5mm stereo male to 3.5mm stereo female (2) for easy sharing of single audio output
- Individual audio controls for individual volume preferences
- Small connection housing, to fit into the tightest phone or tablet case
- Ultra-compact, portable adapter design
- Durable but flexible PVC jacket with strain relief
- Corrosion-resistant contacts for best data transmission
- Lifetime Warranty
