Whether you want to add wireless to your office or deploy across an entire campus, the Bluesocket APs are designed to meet your needs.

Cost Effective, High Performance, Reliable Connectivity

The Bluesocket 2125 outdoor 802.11ac AP offers enterprise-grade performance, with 2x3:2 MIMO, the only AP in its class with an extra receive antenna offering greater coverage, performance and reliability. The BSAP 2125 provides data rates up to 867 Mbps on the 5 GHz radio and 300 Mbps on the 2.4 GHz radio for a total of 1.2 Gbps. With a weather resistant, industrial-grade enclosure and built-in carrier class antenna and Ethernet surge protection, the BSAP 2125 APs provide the highest performance, extended range wireless coverage in the most harsh outdoor environments.

The Bluesocket 2125 APs provide cost effective, high performance, reliable coverage in medium density wireless environments with laptops, mobile phones and tablets. The BSAP 2125s offer higher receive sensitivity on both the 2.4 Ghz and 5 Ghz radios to compensate for Bring Your Own Device (BYOD) type mobile devices such as smartphones and tablets that have a fraction of the transmit power of traditional laptops.

The Bluesocket 2125 APs include six N-type connectors for external antennas, and are fully functional with power delivered by a single port 802.3at (PoE+) solution.

Flexible, Cloud-Managed Options

The Bluesocket APs operate in conjunction with ADTRAN's flexible portfolio of cloud-managed deployment options including public cloud, private cloud or partner cloud with the freedom to migrate among them.

ADTRAN's wireless solutions are built on virtual Wirelss LAN (vWLAN), the industry's premier cloud-managed wireless LAN. ADTRAN's vWLAN® is simple yet powerful: simple in that it is intuitive, easy to learn, setup and use, and powerful with unmatched visibility, security, reliability, scalability and performance. In addition, ADTRAN's ProServices℠ offers the most robust lifecycle professional services—from initial designs, to onsite surveys, to installations, all the way to end-user Help Desk.

Deployments Made Simple—Auto Provision, Auto Configure, Auto Optimize

- **Zero-touch AP deployment:** APs automatically discover vWLAN in the cloud, download firmware and download configuration.

- **DynamicRF:** Radio Resource Management (RRM) technology maximizes performance, adapts to interference, and provides seamless L2/L3 mobility by automatically setting channel and TX power settings, discovering neighbors and load balancing.

Unsurpassed Security, Reliability, Scalability and Performance

- **Context-aware Access Control** allows you to define security policies based on users, device type, ownership, location and schedules. Businesses can now support BYOD or allow guest access while ensuring highest levels of network security.

- **Built-in Wireless Intrusion Detection (W-IDS)** to detect and isolate rogue access points in the network.

- **Built-in High-Availability (HA)** with zero packet loss failover ensures a reliable, always-on network.

- **Elastic Scalability** allows the network to quickly scale without the constraints of legacy hardware controllers.
