### Cost Effective, High Performance, Reliable Connectivity

The Bluesocket 2135 outdoor 802.11ac AP offers enterprise-grade performance with three transmit and three receive streams providing data rates up to 1.3 Gbps on the 5 GHz radio and 450 Mbps on the 2.4 GHz radio for a total of 1.75 Gbps. With a weather resistant, industrial-grade enclosure and built-in carrier class antenna and Ethernet surge protection, the BSAP 2135 APs provide the highest performance, extended range wireless coverage in the most harsh outdoor environments.

The Bluesocket 2135 APs provide provide high performance, reliable coverage in ultra-high density wireless environments with laptops, mobile phones and tablets. The BSAP 2135s offer higher receive sensitivity on both the 2.4 Ghz and 5 Ghz radios to compensate for Bring Your Own Device (BYOD) type mobile devices such as smartphones and tablets that have a fraction of the transmit power of traditional laptops.

The Bluesocket 2135 APs include six N-type connectors for external antennas, and are fully functional with power delivered by a single port 802.3at (PoE+) solution.

### Flexible, Cloud-Managed Options

The Bluesocket APs operate in conjunction with ADTRAN's flexible portfolio of cloud-managed deployment options including public cloud, private cloud or partner cloud with the freedom to migrate among them.

ADTRAN's wireless solutions are built on virtual Wireless LAN (vWLAN), the industry's premier cloud-managed wireless LAN. ADTRAN's vWLAN is simple yet powerful: simple in that it is intuitive, easy to learn, setup and use, and powerful with unmatched visibility, security, reliability, scalability and performance. In addition, ADTRAN's ProServices offers the most robust lifecycle professional services—from initial designs, to onsite surveys, to installations, all the way to end-user Help Desk.

### Deployments Made Simple—Auto Provision, Auto Configure, Auto Optimise

- **Zero-touch AP deployment:** APs automatically discover vWLAN in the cloud, download firmware and download configuration.
- **DynamicRF:** Radio Resource Management (RRM) technology maximises performance, adapts to interference, and provides seamless L2/L3 mobility by automatically setting channel and TX power settings, discovering neighbors and load balancing.

### Unsurpassed Security, Reliability, Scalability and Performance

- **Context-aware Access Control** allows you to define security policies based on users, device type, ownership, location and schedules. Businesses can now support BYOD or allow guest access while ensuring highest levels of network security.
- **Built-in Wireless Intrusion Detection (W-IDS)** to detect and isolate rogue access points in the network.
- **Built-in High-Availability (HA)** with zero packet loss failover ensures a reliable, always-on network.
- **Elastic Scalability** allows the network to quickly scale without the constraints of legacy hardware controllers.
