Q Tablet

Powerful, affordable and ready for work

Part#: INP-120Q32-PR

The InFocus Q Tablet gives you the performance to maximize productivity—at a price low enough to outfit your entire team. Your staff can cut down on the hardware they carry but still access all the business tools they need. That includes built-in apps for presenting content and collaborating using InFocus projectors and displays.
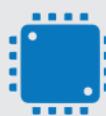

Screen size: 10.1"	**OS:** Windows 8.1 Pro	**Battery Life:** 8 hours	**Connectivity:** USB 3.0, SD card slot	**Processor:** Intel Atom™ 1.33 GHz quad-core

Easy-on-the-eyes 10.1-inch touchscreen

It's the perfect size: Small enough to tote in a bag or briefcase, big enough to comfortably read docs, write emails, browse the Web and hold one-on-one client meetings. An LCD with 1280 x 800 resolution and in-plane switching (IPS) guarantees no squinting or squirming with consistent, accurate viewing from all angles.

Powerful and network-friendly operating system

Designed for touch, Windows 8.1 Pro provides the power and flexibility of a PC in your tablet. Users can personalize the start screen and then flow smoothly between apps. The Windows 8.1 Pro OS also enables fast connection to workplace domains.

Responsive Intel quad-core processor & 2 GB RAM

The Intel Atom GHz quad-core processor with burst speed up to 1.83 GHz provides plenty of horsepower for even heavyweight multitasking. Combine that with 2 GB of RAM for rapid response when opening or closing apps or switching between them.

Lightweight, comfortable design

At only 1.5 pounds, the InFocus Q Tablet goes anywhere, including work sessions, client demos and conference presentations. To chat with a colleague not in the room, there's always video calling via the 2-megapixel, front-facing camera and free trial of InFocus BigConnect video calling app.

Share, view and control business content

Free apps for the Q Tablet provide easy compatibility with the InFocus Mondopad collaboration touch display and other wireless-enabled displays and projectors:

- EZ Display presents media from the Q Tablet to a wireless-enabled projector or display (via SP-WIFIUSB-2 adapter). Show Word docs, PDFs, photos, video and more. Also annotate documents with a variety of colored pens and shapes, and then save the changes.

- ControlView duplicates the InFocus Mondopad desktop on the Q Tablet to give presenters full touch control from across the room.
- Present2 replicates the Q Tablet's screen on a Mondopad for easy, untethered presentations.

Plus, free trials are available for these valuable InFocus apps:
- BigNote turns your tablet into a full-featured electronic whiteboard.
- BigConnect lets you make and receive SIP video calls from the tablet.

Specifications*

INP-120Q32-PR

Display	10.1" 1280 x 800 IPS
Touch	5-point touch, 10-point aware
Operating system	Windows 8.1 Pro (32-bit)
Processor	Intel Atom™ Z3735F 1.33 GHz quad-core (burst speed up to 1.83 GHz)
System memory	2 GB DDR3L
