COMTREND

WAP-PC1750W

When High Power alone isn't enough.

Comtrend's WAP-PC1750W, an AC1750 Access Point, offers ultra-fast speeds and exceptional coverage. Not only can it send high power wireless signals to far away locations (560mW), it also has ultra high sensitivity so it can "hear" wireless communication from far away devices (-93dBm). High power and high sensitivity work together to bring you the coverage you need.

KEY BENEFITS

Higher Power + Higher Sensitivity

High Power (560mW) and High Sensitivity (-93dBm) equals the coverage you need.

Connect & Go Installation

Pre-configured for zero setup.

Internal Radius Server

User level password management.

Flexible Deployment

Supports PoE+ for deployment in areas where power is not available.
