

Mac OS X 10.9 and 10.10 are limited to one add-on monitor. See release notes on driver CD for details. See owner's manual for system requirements when using multiple adapters or using the add-on monitor for DVD playback.

USB 3.1 Gen 1 (5 Gbps) to HDMI Dual/Multi-Monitor External Video Graphics Card Adapter, 512 MB SDRAM, 2048 x 1152, 1080p

MODEL NUMBER: **U444-06N-HD**

Description

The U444-06N-HD USB 3.1 Gen 1 to HDMI Dual/Multi-Monitor External Video Graphics Card Adapter lets you connect an additional HDMI monitor, television or projector to the USB Type-C™ (USB-C™) port on your computer, tablet, Ultrabook or smartphone. It's an ideal tool for multitasking, viewing large spreadsheets across screens, editing documents, giving presentations at trade shows and conferences, or playing games and watching movies on large screens.

You can extend video from your primary display to another or duplicate the same desktop on both displays. No external power supply is needed. You can use up to six U444-06N-HD adapters at the same time, connecting up to six additional monitors to a single computer. Just connect the built-in USB-C cable to the USB-C port on your smartphone, tablet, Ultrabook or computer. Then, connect the adapter's HDMI port to a monitor using an HDMI cable to see and hear full high-definition (HD) audio and video.

The U444-06N-HD supports USB 3.1 Gen 1 data transfer speeds up to 5 Gbps, which is ten times faster than USB 2.0. It also supports HD video resolutions up to 2048 x 1152 (60 Hz), including 1080p, and 5.1-channel surround sound. It's compatible with Windows XP, Vista, 7, 8 or 8.1, as well as Mac OS X 10.8.3 and later.

Features

Easy to Add a Display

- Adds an HDMI monitor, television or projector by connecting it to the USB Type-C™ (USB-C™) port on your computer, tablet, Ultrabook or smartphone

Highlights

- Extend video to a second display or duplicate one desktop on both
- Supports HD video resolutions up to 2048 x 1152 (@ 60 Hz)
- Supports USB 3.1 Gen 1 data transfer rates up to 5 Gbps
- No external power supply required
- Compatible with Windows and Mac

Applications

Office workstation

- View large spreadsheets across multiple screens
- Multitask more effectively without overlapping windows
- Edit on one screen while surfing the Internet for information on the other

On the road

- Do multiple screen presentations without bringing another computer
- Easily provide multiple screen exhibitions in a trade show

Graphics workstation

- Use second display for palettes/tools
- Get a panoramic view of large documents

Editing workstation

- Type documents on one screen while viewing reference material on the other
- Compare two documents simultaneously across two screens

Financial analysis

- Have one monitor per data stream
- View charts and live data at the same time
