DOD
LS370W+

The DOD LS370W+

1080p full HD dashcam with Sony Exmor® CMOS sensor, 3" LCD display and circular polarized filter.

The DOD LS370W+ dash cam is the plus version of the stunning DOD LS370W. This plus model retains all the best features that make the LS370W best in class such as discreet design, user friendly interface, superior low light imaging and adds new features like a larger 3" LCD screen and CPL filter that helps reduce glare.

The LS370W+ includes an impressive high ISO sensitivity of up to ISO12800, for excellent images in low light conditions and a 20% larger SONY exmor CMOS sensor that captures all the light from the large f/1.6 aperture and new 7 element Japanese glass lens; producing superior full HD video. In addition, the LS370W+ is packaged with WDR Technology (Wide Dynamic Range), which greatly enhances nighttime recording and a larger 150 degree viewing angle.

PRODUCT FEATURES

- 1080p Full HD video recording
- 30 FPS recording for smooth playback on any screen
- WDR Technology records greater scene details especially at nighttime
- f/1.6 aperture provides the sensor with more light for better images
- 7 element glass lens helps capture a sharper and clearer image
- 150 degree Wide View Angle sees more and reduces distortion
- 3" Widescreen LCD display makes navigation and playback of video files easier
- Circular Polarized Filter (CPL) helps to greatly reduce glare
- Built in G-Sensor triggers a file protection of all video files in the event of an accident
- One touch on/off audio recording makes keeping conversations private simple
- SOS file locking saves files from being recorded over at the touch of a button
- Loop recording allows the dashcam to record over older video without interruption
- Parking surveillance mode (hardwire kit required) records even when you are away from your vehicle
- Motion detection turns the camera recording on when motion is detected
- High efficiency 650mAh battery provides a longer running time and better performance
- Auto Power-on automatically starts recording when ignition is turned on
