

## Environmental Monitoring Sensor, Temperature, Humidity, Contact-Closure Inputs for Use with TLNETCARD

MODEL NUMBER: TLNETEM

### Description

Connect a TLNETEM module to a Tripp Lite [TLNETCARD](#) on a compatible UPS system and gain the ability to monitor your network's environmental conditions from anywhere in the world. The TLNETEM contains a temperature and humidity sensor as well as a dry contact interface to monitor up to four compatible devices, such as smoke detectors, fire alarms and security systems.

By ensuring the optimum environment in your network closet or data center, the TLNETEM helps prevent equipment failure and costly downtime caused by excessive heat and high-humidity conditions.

### Features

#### Remotely Monitor Your Network Environment

- Allows users to remotely monitor temperature and humidity in network environments
- Helps prevent equipment degradation and failure
- Dry-contact interface enables monitoring of up to four alarm, security and telecom devices

#### Versatile and Easy Installation

- Integrates easily with a Tripp Lite SmartPro or SmartOnline UPS System operating with a [TLNETCARD](#) web management accessory
- Extra-long cable allows the sensor to be mounted up to 12 ft. away from the [TLNETCARD](#)

#### TAA Compliant

- Complies with the Federal Trade Agreements Act(TAA) for GSA Schedule purchases

## Specifications

### Highlights

- Environmental Monitoring Sensor for use with Tripp Lite [TLNETCARD](#) enabled UPS systems
- Reports the ambient temperature, humidity and contact closure status of up to four compatible devices
- Simple installation and integration into existing compatible systems
- TAA compliant

### System Requirements

- Compatible Tripp Lite SmartPro or SmartOnline UPS system with a [TLNETCARD](#) installed
- Web browser or terminal emulator

### Package Includes

- TLNETEM Environmental Monitoring Sensor
- Owner's Manual
