

HDMI Over IP Extender - 1080p

Product ID: IPUSB2HD3

This HDMI over IP extender lets you share an HDMI display or projector with the wireless or wired computer on your network. With intuitive controls and effortless screen sharing, this extender makes it easier than ever for users to collaborate and deliver presentations in boardrooms and office meetings.

The IP video extender supports resolutions up to 1080p and features two built-in USB ports, enabling you to connect remote USB devices to your computer from your display. It's the perfect solution for controlling a computer from wherever the adapter is located.

The IP video extender helps you boost your office productivity, by making it easier for users to collaborate and communicate. The included software lets you connect multiple computers and easily switch between which user is sharing their content with the HDMI display, unlike some wireless video systems that are difficult to configure and require users to disconnect and reconnect manually.

With this IP video extender, you can turn your HDMI television, monitor or projector into an IP display that can connect to any Windows computer on your network, making it perfect for conference rooms and classrooms where different ideas are shared by users who bring their own computers.

With a built-in USB hub, you can use your computer to access two remote USB devices at your remote display, enabling you or your customers to control the computer from the remote location. Remote operation can be used to create interactive digital signage, to engage your customers.

The IPUSB2HD3 is TAA compliant backed by a 2-year StarTech.com warranty with free lifetime technical support.

Note: This HDMI over IP video extender is intended for use on networks with dedicated bandwidth. See our FAQ for further details.

Certifications, Reports and Compatibility

Applications

- Enable your employees or co-workers to share each other's screens on a boardroom display
- Share information with clients at doctors offices and hospitals, while keeping the computer in a remote, secure location

Features

- Collaborate with co-workers by using your network to easily switch between devices shown on a shared display
- Share video with a wireless or wired LAN connection using any Windows computer on your network
- Control the video-over-IP adapter, using the included software
- Built-in 2-port USB hub
- Supports resolutions up to 1080p

Hardware

Warranty	2 Years
Ports	1
Cabling	Cat 5e UTP or better
Audio	Yes
Chipset ID	DisplayLink - DL-195
Daisy-Chain	No

Performance

Maximum Data Transfer Rate	USB - 480Mbps
	Ethernet - 1000Mbps
Max Distance	100 m / 330 ft
Maximum Digital Resolutions	1920x1080
Supported Resolutions	Widescreen (16/32 bit): 1920x1200, 1920x1080, 1680x1050, 1600x900, 1440x900, 1360x768, 1280x800, 1280x768, 1280x720
	Standard(16/32 bit):

1600x1200, 1400x1050, 1280x1024, 1280x960, 1152x864, 1024x768, 800x600

Wide Screen Supported Yes

Audio Specifications Two channel stereo audio supported
