

ASUS CORPORATE STABLE MODEL

ASUS Control Center
Up to 36-Month Supply*
EOL Notice & ECN Control

About this program

The CSM program is an initiative designed to provide businesses with stable product supply and enhanced aftersales support. Each CSM mini PC purchase entitles the customer to ASUS Control Center IT-management software suite (CSM edition, worth \$60)* that provides comprehensive control and monitoring. ASUS CSM products also include a stable roadmap and assured 36-month supply availability to ensure customers need not worry about material-supply gaps or extended supply.

*Starting from product launch date. Program offerings may vary by region. Please consult your local sales representative for more information.

Features

| Advantages | CSM Mini PC Features |
|-------------------|---|
| Server management | ASUS Control Center |
| Stable supply | 36+ months product Lifecycle <small>*Starting from product launch date</small> |
| | 6-month EOL notice |
| | ECN control <small>*by request</small> |
| Other support | Windows 10 and Pre-WHQL Ready |

Stable Supply

Supply Flexibility

ASUS has great material-supply flexibility, and is able to respond rapidly to forecast changes. Working with ASUS removes the worry about material-supply gaps.

Extended Supply

Please contact your ASUS representative for information about projects requiring a supply guarantee of 36 months. A supply guarantee may be available with a confirmed purchase order (PO) and minimum order quantity (MOQ).

EOL Notice and ECN Control

ASUS issues an Engineering Change Notice (ECN) before product revisions, an end-of-life (EOL) notice six months before a product's EOL, and a Last Buy Order (LBO) notice three months prior to EOL — allowing lead time for your organization to ready itself for product transition.

*ECN control is available on request.

ASUS Control Center

ASUS Control Center is a centralized IT-management suite that enhances enterprise productivity with comprehensive control through a very friendly user interface. ASUS Control Center provides high visibility and the best IT-management experiences across ASUS enterprise and commercial products. Each purchase of a Corporate Stable Model product entitles the customer to ASUS Sub Control Center IT-management software suite (CSM edition, worth \$60)*.

Hardware & Software Monitoring

Monitor system temperature, fan, voltage and hardware status

Remote Management

Remote desktop, power control, BIOS settings and updates

Asset Management

Software dispatch and device-metadata management

Mobile Control

Stay in command via a smart device

Security

Enable/disable USB storage
