

VELOCITÀ

Racing simulator stand

Arozzi is yet again expanding its collection of gaming and streaming gear with the Velocità racing simulator stand. It is the world's first race driving simulator stand compatible with any gaming or office chair. This feature allows users to pick any gaming chair of their choice to add a racing simulator to (racing simulator not included). The Velocità racing simulator stand has plated brackets to add a steering wheel, driving pedals, and gear shifting box.

Hardcore racing gamers can now get a racing simulator to attach to their existing chair without breaking the bank from buying bulky racing simulators that are difficult to store. Velocità's compact and light weight design gives the opportunity for easy storage and for gaming on the go.

FEATURES

- Compatible with any gaming or office chair*
- Compatible with most of the known racing wheels & pedals brands on the market
- Holders for a steering wheel, pedals and a gear shift
- Patent-pending connection mechanism makes the assembly quick and easy
- Compact and lightweight design makes it easy to store
- Adjustable framework to fit your optimal position
- Super sturdy metal construction and build quality

* Any chair that uses a five-star wheel base with detachable castors.
