USB-C to HDMI 2.0a Adapter - CEC Enabled

Model: U187B-006B-23

- Displays resolutions up to 4K@60Hz which is 4 times of FHD
- Supports up to 8 channels of high-definition digital audio
- HDMI 2.0a and HDCP 2.2 compliant
- Self-powered, no external power
- Reversible USB 3.1 Type-C connector
- Approximate length: 5.9in (150mm)
- Supports compatible smartphones for extended/mirror view
- Consumer Electronics Control (CEC) enabled
- Full support for Google Hangouts Meet Kit

Connect an HDMI Display to a USB-C Device

The Accell USB-C to HDMI 2.0a adapter easily converts a USB-C port (Type-C) into an HDMI output. The USB-C port on host machines must support DisplayPort Alt Mode (DP Alt Mode) to transfer display data. This adapter is HDMI 2.0 compliant, supporting up to 4K sharp resolution at 60Hz and HDR.

Consumer Electronics Control

Instead of having one remote control for each device, the Consumer Electronics Control (CEC) allows users to control and command connected devices through HDMI by using one single remote control in synchronization, ideal for complicated system setup.
