# Universal Case-Compatible Security Kiosk For 7-13 Inch Tablets

## Universal Case-Compatible Security Kiosk

With a secure key-locking grip and an ultra-stable mount, the Universal Case-Compatible Security Kiosk Stand is suitable for your home, school, or point of sale. The easily adjustable diagonal security grip will keep your device secure and easily fits over most cases. The articulating arm allows you to position the device with 360 degrees of rotation and a smooth horizontal hinge. Screw holes in the aluminum base allow the stand to be safely secured to most surfaces, and the minimalist, modern design is non-intrusive and perfectly at home in any setting, while holding the device 8" from whatever it is fixed to. Unable or unwilling to drill holes for the base? No problem: also included is a 70" Kensington security cable that secures to the security grip and can easily be looped around any nearby post or structure. Also included are four differently-sized foam pads that can be used to make sure your device fits snugly and screws for affixing the platform and keys to unlock the security grip.

Easily adjusts for horizontal or vertical views

### Features:

- Key-locking diagonal security grip prevents theft
- Sturdy black aluminum stand resists wear and damage
