## Catalyst Quality for Small Deployments

Save time, money, and effort with proven technology from the company known for network innovation. The Cisco Catalyst 1000 Series switches provide simplicity, flexibility and security for small businesses. Created by the same engineers that have delivered award-winning networking products for decades, these switches raise the standard for essential network access.

The compact, fanless design with PoE+ capability means Cisco Catalyst 1000 Series can hide in plain sight in an open-plan office, co-working lounge, or classroom without disturbing the environment. Even smaller networks must serve multiple functions, and these switches make it easy to meet competing demands with expanded support for VLANs. Larger-scale access control tables enable network administrators to segment traffic for greater security and control. The Single IP Management is also available on the Cisco Catalyst 1000 Series switches. The uplink ports can be used to connect up to eight switches and manage them via a single IP address.*1
*1 1GE switches only can be grouped with 1GE switches, and 10 GE switches can only be grouped with 10 GE switches.

Cisco IOS software image
Command-line interface (CLI) and/or intuitive web UI manageability options

- Device management support with over-the-air access via Bluetooth, Simple Network Management Protocol (SNMP), RJ-45, or USB console access
- Network monitoring through sampled Flow (sFlow)

Security with 802.1X support for connected devices, Switched Port Analyzer (SPAN), and Bridge Protocol Data Unit (BPDU) Guard

- Reliability with a higher Mean Time Between Failures (MTBF) and an Enhanced Limited Lifetime Warranty (E-LLW) support

## Cisco Catalyst 1000 Series

Cisco SMB Switches Positioning Map

*1 You can continue with Catalyst 2960-L while preparing for partner-led readiness for Catalyst 1000 (Catalyst 1000 is not sold in AU). *2 You can continue with Catalyst 2960-X/XR while building up T2 partner-led readiness for Catalyst 9200.

## Cisco Catalyst 1000 Series

Benefits of Transitioning to Cisco Catalyst 1000 Series

| Feature |  | $\begin{gathered} \text { Catalyst } \\ \text { 2960-Plus } \end{gathered}$ | Catalyst 2960-L | Catalyst <br> 1000 | Benefit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Scale and Performance | Downlinks | $\begin{aligned} & 24 \times \mathrm{FE} \\ & 48 \times \mathrm{FE} \end{aligned}$ | $\begin{aligned} & 8 \times 1 \mathrm{GE} \\ & 16 \times 1 \mathrm{GE} \\ & 24 \times 1 \mathrm{GE} \\ & 48 \times 1 \mathrm{GE} \end{aligned}$ | $\begin{gathered} 8 \times 1 \mathrm{GE} \\ 16 \times 1 \mathrm{GE} \\ 24 \times 1 \mathrm{GE} \\ 48 \times 1 \mathrm{GE} \end{gathered}$ | More throughput and more power to meet growing demands for connectivity from a wider array of smart devices. |
|  | Uplinks | $\begin{gathered} 2 \times 1 \mathrm{GE} \\ 2 \times 10 G E \end{gathered}$ | $\begin{aligned} & 2 \times 1 G E \\ & 4 \times 1 G E \\ & 4 \times 10 G E \end{aligned}$ | $\begin{aligned} & 2 \times 1 \mathrm{GE} \\ & 4 \times 1 \mathrm{GE} \\ & 4 \times 10 G E \end{aligned}$ |  |
|  | Maximum PoE Budget | Up to 370 W | Up to 370 W | Up to 740 W |  |
|  | Perpetual PoE |  | $\checkmark$ | $\checkmark$ |  |
|  | Operating Temperature | Up to 45 dC | Up to 45 dC | Up to $50 \mathrm{dC}^{* 1}$ |  |
|  | Single IP Management |  |  | $\checkmark$ | Greater flexibility to allow for more deployment scenarios. |
|  | Fanless |  | $\checkmark^{* 2}$ | $\checkmark^{* 2}$ |  |
|  | Over-the-Air Bluetooth |  | $\checkmark$ | $\checkmark$ | Increased options for network setup mean you can allocate resources in different ways as your organization and network grows. |
|  | Dynamic VLAN Assignment |  | $\checkmark$ | $\checkmark$ | Increased support for VLANs and more advanced quality of service help keep networks secure while meeting multiple requirements for connectivity. |
| Functionality | DHCP Relay and Server |  | $\checkmark$ | $\checkmark$ |  |
