USB-C
4K Docking
Station

Key Features:
- USB-C Compatibility (Including Thunderbolt™ 3)
- Triple Display MST Docking Station
- Supports up to 3 external displays - Windows™
- Supports up to 2 external displays - Mac™
- 2x USB 3.0 Ports
- 2x USB 2.0 Ports
- Passthrough Power from USB-C charger (not included)
- Supports up to 85W Power Passthrough
- Kensington™ Security Lock Slot
- Enterprise Features
  ° Wake on LAN
  ° MAC Address Pass-Through
  ° PXE Boot

Increase productivity with our plug and play power passthrough docking station, the VisionTek VT2000 USB-C Docking Station for Windows™ and Mac™ laptop systems. With a single USB-C connection, you can connect up to three external displays, transfer files and data at up to 5Gbps speeds, play audio and charge mobile devices.

- Universally Compatible USB-C – Windows™ or Mac™, the VT2000 is compatible through the single, included USB-C 1 meter cable, making this the ideal docking station for mixed system environments. Also compatible with Thunderbolt™ 3 systems.

- USB-C Passthrough Power – Plug your laptop's USB-C power adapter into the dock's USB-C Power-In port on the back to provide passthrough power, up to 85W, depending on system and charger being used. The VT2000 can also be used without a power adapter to charge your mobile devices from the laptop's battery.

- Connect Up to Three External Displays – The VT2000 has three video ports to provide video connection options that suit your needs using MST technology. Use two DisplayPort and one HDMI together for a three-display experience. (Windows™ systems support up to three external displays. Mac™ systems support one extended and one cloned/mirrored external display.)

- Expanded Selection of Ports – Flexibility is the goal with the VT2000, by offering some of the most commonly needed ports in one dock using the included 1 meter USB-C cable.

  ° 1x HDMI and 2x DP ports let you connect external displays to increase your system workspace.

  ° 2x USB 3.0 ports let you connect external storage or mobile devices for sync & charge.

  ° 2x USB 2.0 ports increase the number of compatible devices you can connect when you don't need USB 3.0 speed support, including full sized mouse & keyboard.

  ° 1x SD and 1x MicroSD Reader port let you retrieve data without having to use any of the USB ports.

  ° 1x Combination 3.5mm Audio Input/Output port gives you a single connection option for music listening or video conference participation.

  ° 1x RJ45 port supports speeds up to 1000Mbps (10/100/1000Mbps supported) to keep you wired to the internet, avoiding Wi-Fi connection or security concerns.
