- 2 Gentle all-ages audio curve
- 3 Inline volume control
- 4 On-ear design
- 5 Durable plastic frame
- 6 Omni directional flip-down microphone boom
- 7 Chew resistant fabric cable

ABOUT

ThinkWrite Technologies built the TW120 ERGO USB Headset with specific qualities at top of mind: long-lasting comfort, remarkable audio transmission, and lightweight durability that will keep kids and adults alike comfortable and connected.

A broader, shortened headband paired with elongated, ergonomically angled earcups results in a headset that provides hours of comfortable listening for any size of person. The TW120, equipped with 30mm drivers delivering extraordinary sound, provides the ideal amount of compression and frequency isolation to produce clear audio without applying unnecessary pressure to delicate ears. With a flip-down, omni-directional microphone boom positioned optimally for voice recording, the ERGO USB Headset is the ideal on-ear headset for school testing, remote and in-office work activities, and everyday usage.

SPECIFICATIONS
