Cisco Wireless Phones 840 and 860 deliver enterprise-grade voice over IP via wireless smartphones to enable mobility-based productivity.

Product overview

The Cisco Wireless Phone 800 Series delivers enterprise-grade voice over IP via wireless, handheld devices. The Cisco Wireless Phones provide an application platform that enables third-party applications in a variety of enterprise environments, including healthcare, retail, and manufacturing. These environments require a device that can withstand abuse, while simultaneously enabling users to access information and collaborate quickly and securely with other team members. Cisco Wireless Phones deliver security with AES encryption that ensures secure voice-over-Wi-Fi functionality.

The 800 series phones are built to leverage either Cisco Unified Communications Manager or Webex Calling for call control. Users can take advantage of common enterprise voice features like conference, transfer, and call park. Administrators will relish the ability to manage productivity-enhancing applications through Cisco Meraki System Manager Enterprise Mobility Management (EMM) or alternately through other third-party EMM providers. Users will achieve new levels of success through collaboration applications like Cisco Webex Teams, which is included in the phones.

Features and benefits

Table 1 outlines some of the key features and benefits of the Cisco Wireless 800 Series Phones.

Table 1. Features and benefits

Feature	Benefit
Android Operating System 10	Enables administrators to control and manage applications deployed to the phones to enable employee productivity
MIL SPEC 810G	Withstands drops to deliver peace of mind and investment protection
IP68 rated hardware (860)	Provides ruggedized hardware that withstands dust and water damage in harsh environments
Hot-swappable battery (860)	Facilitates users to swap batteries in the field without a device restart, providing 100% device uptime
Barcode scanner (optional)	Supports various retail, healthcare, and manufacturing use cases that require barcode scanning

Licensing

The Cisco Wireless Phone 840 and 860 require an Enhanced User Connect License (UCL) or a Cisco Unified Workspace License (UWL) in order to register to Cisco Unified Communications Manager.
