

Conference Room Docking Station - Universal Laptop Dock - 4K HDMI, 60W Power Delivery, USB Hub, GbE, Audio - In-Table Connectivity Box For Huddle/Boardroom Collaboration Space

Product ID: KITBZDOCK

Add docking and video conferencing capabilities to a boardroom, classroom or huddle space. This conference table connectivity box bundle lets you:

- Access your room's display and collaboration peripherals with a single connection
- Charge mobile devices using the USB-A charge port
- Power a supported USB-C laptop with USB Power Delivery

During meetings, you may need to set up video conference calls using applications such as Microsoft Teams, Zoom or Google Hangouts. Unlike other boardroom conferencing solutions that are limited to only one or two collaboration applications, this module lets you use your own laptop, so you are not restricted to a specific platform.

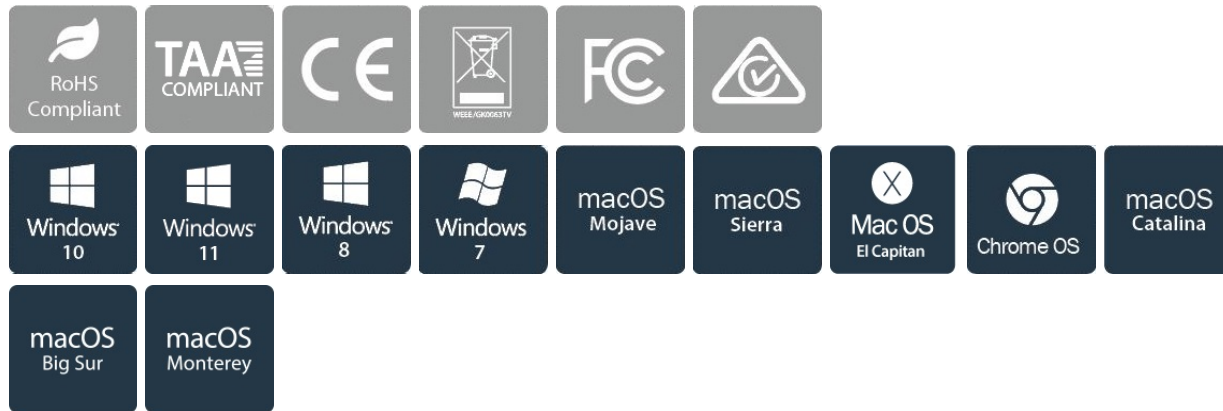

Connect a USB-C or USB-A laptop to the module and access your room's peripherals, webcams, speakers, mics, network and HDMI display. This conference table AV box and docking station module lets you easily connect your laptop with each video conferencing device in your boardroom. You can collaborate with others in the room and around the globe.

For users that are unable to dock or for quick access to the display, the front-facing HDMI port lets you connect a laptop directly to the display.

Design a practical and stylish solution that impresses your visitors and facilitates their needs. The in-table connectivity box is easy to install in a conference room table, desk or lectern, and features a black aluminum finish that complements your table and your peripherals.

KITBZDOCK is backed by a StarTech.com 2-year warranty and free lifetime technical support.

Special Notes / Requirements

Note	<p>Not all USB-C ports support the full functionality of the USB Type-C standard. Ensure that your host USB-C port supports USB Power Delivery 2.0 and DP alt mode.</p> <p>4K resolution is supported. A 4K-capable display is required to achieve 4Kx2K resolution</p> <p>If connected to a USB 2.0 host port, or if using a USB 2.0 host connection cable, performance may be limited (USB 3.0 host cable included)</p> <p>USB 3.0 is also known as USB 3.1 Gen 1; this connectivity standard offers speeds up to 5Gbps</p> <p>The dock connects to the USB-C port on your laptop. The dock can also be connected to the USB-A port on laptops using a USB-B to A cable (included), but Power Delivery to charge your laptop is not available through USB-A</p> <p>DisplayLink drivers are required for connecting your USB-A laptop to the USB-B port on the module. If your laptop doesn't have the proper drivers installed and you're unable to download and install the drivers, you can connect your laptop directly to the HDMI port to access the room's HDMI display.</p>
