HyperX Alloy Elite 2 – Mechanical Gaming Keyboard – HX Red (US Layout) (4P5N3AA)

Overview

For play. For work. For everything.

For gamers, streamers, and multi-taskers who need to have more control at their fingertips, the HyperX Alloy Elite 2 is the keyboard for you. With dedicated media keys and a large volume wheel, this fully-featured gaming keyboard's ready for everything from video editing to watching movies. It's built with ultra-reliable HyperX mechanical switches balanced for speed and responsiveness, so you can trust your key inputs. The switches' exposed LEDs pair with the translucent HyperX Pudding Keycaps to give your RGB lighting extra brightness compared to solid-color keycaps. Customize the signature light bar and create lighting profiles with intuitive HyperX NGENUITY software for a brilliant display of colors. Use the software to personalize your setup further with custom Game Mode and macros. A USB 2.0 pass-through provides an extra USB port for your multi-tasking needs. The Alloy Elite 2's sturdy steel frame makes it durable enough for work and play day in and day out.

HyperX Pudding Keycaps

Pre-installed translucent ABS pudding keycaps provide more brilliance compared to solid-color keycaps which let less of your style shine.

Signature light bar & dynamic RGB lighting effects

The signature HyperX light bar and vibrant lighting effects form a truly dazzling display.

HyperX Mechanical switches[1]

These reliable key switches are a balance of responsiveness and accuracy, with a short travel time and actuation distance. They feature an exposed LED for brighter, more luminous RGB lighting.

Dedicated media keys and large volume wheel

Have control at your fingertips with a prominent volume wheel and dedicated keys for media, profiles, and Game Mode.

---

[1] Available switch colors vary per model and country. Please check your local retailer/etailer for availability.
