FUJITSU Image Scanner fi-8170

Efficiency at new heights with evolved feeding

- **Reliable.** State-of-art feeding and optical technologies.
- **Quality images.** The best you can get.
- **Paper handling.** Scan with confidence.

State-of-art feeding technology - streamline workflow
In the "Manual Feed Mode", the fi-8170 scans copy forms and passports or booklets up to thicknesses of 7 mm without the carrier sheet. Precise multi-feed detection on a wide range of documents like plastic cards and documents with attachments, enable continual scanning with the same profiles. In addition, the "Automatic Separation Control" optimizes paper feed to match the number of sheets loaded, preventing interruptions. "Image Monitoring" also performs checks, real-time, for image skews, and provides enhanced paper protection.

Optimized high-quality images
The fi-8170 comes with "PFU Clear Image Capture", a unique and dedicated image correction technology that generates unparalleled, high-definition images while keeping power consumption to the minimum. Three sensors detect tips of documents to assure accurate image data without defects and prevents image loss.

Better usability and flexibility for any environment
The fi-8170 supports multiple operation modes according to users' environments, that require sharing among teams with PC-less colleagues, or LAN connectivity and USB 3.2.
The flexibility to use with imprinter options opens up the capability for total document management and assists in document archiving requirements that are prevalent in many industries.

Efficiency optimized, simplicity achieved, with expanded software functionalities
The scanner driver, PaperStream IP, comes with a simplified, user-friendly interface that provides icon visibility for easy setting configurations. Users can consistently achieve scanned outputs of correct orientations with the "Automatic Rotation" function, and store frequently scanned documents in specific formats using the "pattern matching" method. Efficiency with simplification brings users, a reduction to operation time as well - on frequent and routine operations like deleting blank pages, or correcting page orientations, just by following the optimal settings suggested by the "Settings Assistant" on the integrated PaperStream Capture software. Documents can be retrieved more efficiently with the "PDF keyword setting" function, instead of being constrained to file names alone.
