

CTL Works With Chromebook Keyboard and Mouse

Featuring the latest connected and energy-saving technology, CTL's new wireless keyboard and mouse are designed for productivity and long-life

Expertly Designed

The Works With Chromebook wireless keyboard and mouse were developed using CTL's technician expertise in successfully creating Chromebooks and Chromeboxes and are designed for performance, versatility, and long-life.

The keyboard is available for purchase by itself or paired in a combo with the mouse. Each device features long battery life (29 months for the keyboard and 24 months for the mouse).

Efficiently Connected

Each device features Bluetooth 5.2 technology, which allows parallel transactions between two bluetooth devices to occur simultaneously, resulting in less interference, better performance and faster operation. In addition, BT 5.2 improves battery life because it enables larger amounts of information to be transmitted over lower bandwidth using less power.

Save Space + Time

The CTL keyboard includes a launcher key that is used to quickly do a search in Google, Google Drive, apps, files, and more. Other unique keys include the full screen, overview, and screenshot buttons. The keyboard's slim profile and minimalist design saves space and promotes ergonomic advantages. Quiet keys make for a comfortable typing experience and a number pad with 15FN keys allows easy data input and shortcuts.

Power

We build durable, reliable and secure Chrome Products and provide tailored, end-to-end solutions from education to corporate customers. Whether you need updated video conferencing systems or comprehensive Chromebook deployments, power on with CTL.

This product works with devices capable of running the latest version of Chrome OS and has been certified to meet Google's compatibility standards. Chromebook and the Works With Chromebook badge are trademarks of Google LLC.
