MORPHEUS³⁶⁰™

TW7800 Series PULSE HD Virtual Hybrid ANC True Wireless Earbuds

■ Qualcomm® aptX™ Adaptive

We designed our Wireless Headphones with the aptX Adaptive Codec for a truly immersive experience. We then added 10mm Dynamic drivers to accentuate their performance. Enjoy listening to the finer details of your music or movies in high-definition sound with powerful bass and experience the subtle nuances of better than CD quality.

■ Virtual Hybrid Noise Cancellation

Virtual Hybrid Noise Cancellation detects and virtually eliminates background noise such as automobile traffic and airplane engines by up to 30dB to allow you to focus on what's important. We engineered our PULSE HD Virtual Hybrid ANC Headphones with Feed Forward technology and use an algorithm on the back-end to convert to full Virtual Hybrid Noise Canceling Headphones.

■ Extended 40-Hour Playtime

our Wireless Earbuds are built to last for up to 6 hours of use on a single charge. The Charging Case provides an additional 420 mAh of charging power to allow for a combined usage time of over 40 hours.

■ Bluetooth® 5.2

we built our Wireless Earbuds on the Bluetooth® 5.2 platform, allowing our Pulse HD Wireless Earbuds to communicate as Bluetooth® Low Energy devices, providing longer battery life for the listener and a stronger signal for better stability.

■ OneTouch Media Controls

our OneTouch Media Controls provide total control of your Music, Videos and Media with the touch of a single button. See side panel for detailed instructions.
