

Wi-Fi Video Doorbell

DS-HD2

Hikvision's Wi-Fi Doorbell brings home the most convenient and robust security. This Internet-connected security device is more than just a doorbell—it provides 24/7 protection for all residents, including children and pets. Users can communicate with visitors, check for deliveries, and establish safety around their home with Hikvision's DS-HD2 Doorbell. With its subtle, contemporary design and customizable appearance, the Hikvision Wi-Fi Doorbell combines a versatile aesthetic while providing continuous monitoring.

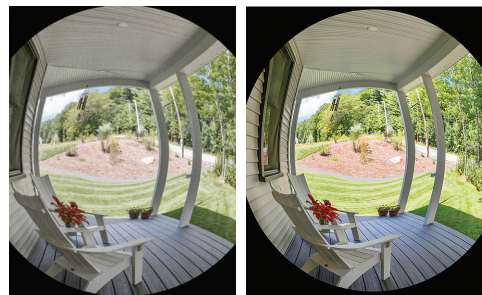

H.265 Video Technology

The DS-HD2 doorbell also includes advanced H.265 video compression technology, achieving better video quality with only half the bandwidth and half the storage space of the older H.264 video compression standard. And with a frame rate of 15 fps, you can be sure to capture every detail in real time.

AI Powered Human Detection

With the DS-HD2, you can easily see and communicate with visitors at your door from your smartphone or other device. Simply download the manufacturer's app and connect the doorbell to your home's Wi-Fi network to access live video streams and receive notifications when the doorbell is pressed or when motion is detected.

Security Starts at the Front Door

This smart doorbell is equipped with a camera that uses advanced AI technology to detect the presence of people at your door. The camera has a wide field of view (FOV) of 170 degrees horizontally and vertically, and a lens with a focal length of 2.1 mm and an F2.4 aperture, providing clear and detailed video footage of your front door.

The doorbell is equipped with a micro SD card slot, allowing you to store video footage locally with up to 256GB of storage. This is especially useful if you have limited internet connectivity or want to keep a backup of your video footage.

Specifications
