Targus® Privacy Screen for Lenovo® Carbon X1 G9 / G10 14-inch Laptop

Designed specifically to fit Lenovo® CarbonX1 G9 / G10 Laptop. To protect your information, tiny vertical blinds on the surface of the privacy screen narrow the viewing angle so data is only visible directly in front of the monitor up to 30 degrees away from the center of the screen. Onlookers will only see a dark unclear screen when attempting to view the information from a side angle. In addition to providing security, the screen also blocks the glare to help reduce eye strain. The Targus Laptop Privacy Screen can be easily attached by using clear adhesive strips designed for LCD filters or with the included tab guides that stick to the edge of the LCD bezel to hold the screen in place. Users can also position the tabs so the screen easily slides on and off. Highly portable and easy to use, the Targus Privacy Screen prevents onlookers from seeing valuable information often viewed on a laptop or LCD monitor.

- Protects on-screen private information with constrained viewing angles to 30° from either side
- Filters blue light upto 40%, minimising exposure can reduce the potential of sleep deprivation induced fatigue
- Anti-reflective coating blocks screen glare and minimises unwanted distraction for more comfortable viewing, so you can focus as well as reduce eyestrain
- Over 12% brighter than competitive solutions for greater clarity and visibility
- Reusable silicon adhesive strips for quick and easy installation
- 2 Year Limited Warranty

Suited for Workplace or Personal Use
One study found that employees are 50% less productive when their visual privacy is at risk, and that two in three employees expose sensitive data outside the workplace¹.

With more of us working in open office settings, on-the-go, or in unsecured environments, visual privacy is a critical consideration for employers and employees alike. Privacy screens add a layer of protection that encourages productivity at the same time it protects confidential information.

30° Viewing Angle
Even in public places like hotel lobbies, airplanes, or cafes, the 4Vu™ Privacy Screen keeps your data safe from prying eyes. Your content is visible only to the person directly in front of the screen and up to 30° on either side. You have full clarity and visibility, while onlookers or passersby see only a black screen.

Reduced Glare, Even in Bright Rooms
Our anti-reflective coating reduces glare and improves light transmittance under most viewing conditions. The result is brightness that's up to 12.4% higher than competitive privacy screens for comfortable, clear views.

Four Easy Installation Options
Quickly and easily attach the screen directly to your display using on the four convenient installation options.

Under bezel tabs: attach directly to a privacy screen and slide under the laptop bezel for a clean look.

Slide tabs: attach to the side of a laptop's LCD frame to hold the privacy screen in place.

Long adhesive strips: stick on to the LCD screen for a firm, fixed hold.

Universal flexi-hinges: attach to the top of the privacy screen and over the top of the laptop to create a seamless on/off experience with a simple flip. Use the included adhesive lift tab, to easily flip from privacy mode to public mode without fingerprints. Two versions are provided: 1 for bezelless screens; 1 for infinity screens.

Tabs and long adhesives can be used up 50 times and are able to be cleaned with water or tape to remove any dust before reuse; flexi-hinges can flip over 1000 times

Blue Light Filtering
Whilst blue light is all around us, too much screen time can lead to increased exposure of artificial blue light, which disrupts the natural stimulation to our brain from diurnal cycle, leading to potential of 'digital eye strain' short term and sleep deprivation led fatigue long term. The 4Vu™ Privacy Screen filters blue light to reduce eye strain and minimize the potentially harmful effects on your vision.
