A Large Solution in a Small Package

The CTL Chromebox CBx Series

The CTL Chromebox CBx Series includes cost-effective, compact devices that power your home or office desktop, kiosks, Point-of-Sale systems, digital signage and more.

Be More Productive

The Intel® processor handles multitasking and streaming video with ease. View media while surfing the web without sacrificing quality. Work more efficiently with reduced page load times, allowing you to power on through work and play.

Stay Connected

With continued use of corporate networks as well as an increase in users working from home, it is crucial to have a reliable and secure internet connection to work efficiently. Wi-Fi 6 makes sure each connected device maintains a quality, secure connection.

Free Up Space

The CBx's compact design means it takes up little or no space, freeing your workspace up for other peripherals. Measuring 6" x 6" x 1 1/2" and weighing only 3 lbs., it can be mounted to the back of most monitors using the included VESA mount.

Power Your Messaging

In addition to its productivity features, the CBx can be used for gaming, digital signage, POS systems, kiosks, call centers and more. The CBx can easily connect to displays, audio hardware and keyboard devices with HDMI input or wirelessly via Bluetooth 5.1.

Fast, Easy and Protected

This versatile, cloud-based device has super fast boot-up and automatic updates, making it easy to manage remotely. Browse a variety of Android apps in the Google Play Store and enjoy streaming your favorite HD media with seamless connectivity. Know your device is protected with built-in security features.

A Design For You

There's a CBx device just for you. Choose from the dependable CBx2-7 model or two new CBx3 models that feature Intel's 12th generation processors. You can upgrade the RAM and storage to customize a device to fit your needs - whether it's for remote workers, call centers, kiosks, or digital signage.
