

# SmartPro 1440VA 1440W 120V Line-Interactive Sine Wave UPS - 8 Outlets, Extended Run, Network Card Option, LCD, USB, DB9, 2U Rack/Tower, TAA

# MODEL NUMBER: SMART1500RXLTAA

Provides complete battery backup and pure sine wave power output for servers, switches and other highend distributed IT equipment.

## **Features**

**1.44kVA/1.44kW/120V** Battery Backup for Distributed IT, Telecom or Enterprise Deployments This line-interactive UPS system provides reliable battery backup and AC power protection against blackouts, brownouts, surges and line noise that can damage your valuable IT equipment. The SMART1500RXLTAA is ideal for large and small network devices, high-end workstations, storage and security equipment in labs, server rooms and data centers.

#### Reliable, Expandable Battery Backup Keeps You Operational Through Power Outages

The field-replaceable, hot-swappable VRLA battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Switchover from line to battery power happens within milliseconds to maintain continuous operation of connected equipment without interruption or rebooting. Extra runtime is available by connecting up to four optional extended battery modules (BP48VRXLTAA, sold separately). The SMART1500RXLTAA restarts automatically once power is restored, regardless of battery charge level, saving you a costly site visit.

## Automatic Voltage Regulation (AVR) Corrects Low- and High-Voltage Conditions

Built-in AVR corrects abnormal voltage conditions without using the battery. The SMART1500RXLTAA maintains regulated 120V nominal output during brownouts and overvoltages from 80V to 151V while keeping the battery fully charged and ready to take over in case of power failure.

## **Pure Sine Wave Output and Unity Power Factor**

Pure sine wave output power ensures maximum stability while unity power factor ensures the most watts possible at each power rating, providing maximum compatibility with sensitive equipment.

# Optional LXE Network Management Card Allows Remote Control and Access 24/7

The WEBCARDLXE (sold separately) enables access to advanced features like switchable load banks, automatic email messaging on power events, and full remote control of the UPS. The IP-based Auto Probe feature ensures network uptime by communicating with other network devices and automatically rebooting IT equipment when a loss of connectivity is detected. *Note:* The SMART1500RXLTAA is not compatible with WEBCARDLX.

#### **NEMA 5-15R Outlets Protect Your Connected Components**

Eight managed 5-15R outlets provide connected equipment with pure sine wave AC output and allow you to monitor power consumption down to the outlet group level. Power provided by these outlets is filtered to protect connected equipment against damaging surges and line noise. Four outlets are grouped into two programmable load banks that let you shed non-critical loads to extend runtime for critical loads. Front and rear cooling fans help protect equipment from overheating.

## Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better

This UPS system filters out disruptive electromagnetic and radio frequency interference that can inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

# **ENERGY STAR-Certified to Help You Save Money and Protect the Environment**

By meeting strict U.S. Department of Energy and U.S. Environmental Protection Agency requirements, this ENERGY STAR 2.0 UPS system provides high operational efficiency to signal a reduction in BTU emissions, save on utility and cooling costs and help protect the environment.

## Intuitive Front-Panel Interface for Convenient UPS Operation and Monitoring

The two-line front-panel LCD monitoring screen features 10 selectable screens that allow quick access to a wide range of detailed UPS and site power information. LEDs show UPS status: a green light means utility power is on, an orange light means the UPS is in battery mode and a red light indicates an active alarm or fault. The control panel rotates to accommodate both rack-mount and tower configurations.

#### **Advanced Communications Ports Allow for Automatic Saves and Shutdowns**

RS-232 and USB ports connect to a device for a variety of communication options (cables are included). A dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components. The RPO/ROO port permits emergency shutdown or remote restart of all connected equipment.

## **Versatile Installation Options**

You can mount the SMART1500RXLTAA in just 2U of space in an EIA-standard 19-inch rack using the included hardware. You can also adapt it for tower installation using the included support stands. The 10-foot power cord with NEMA 5-15P plug connects to a compatible AC outlet.

# **TAA-Compliant for GSA Schedule Purchases**

The SMART1500RXLTAA is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.
